AMENDEMENT 1

Reference number
ISO/IEC 9592-1 : 1989/Amd.1 : 1992 (E)

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Introduction

This amendment specifies additions and changes to ISO/IEC 9592-1 to support the inclusion of ISO/IEC 9592-4.

Unless otherwise specified, all references in this amendment refer to ISO/IEC 9592-1.

Information processing systems—Computer graphics—Programmer's Hierarchical Interactive Graphics System (PHIGS)—Part 1: Functional description

Amendment 1

Page 3

1 Scope and field of application

Replace the first sentence of the first paragraph with the following sentence.

"ISO/IEC 9592 is a multi-part standard that specifies a set of functions for computer graphics programming, the Programmers's Hierarchical Interactive Graphics System (PHIGS)."

Add the following paragraph before the last paragraph:

"This part of ISO/IEC 9592 is the base part and forms the kernel of PHIGS functionality. ISO/IEC 9592-2 and ISO/IEC 9592-3 are related to archives. Other parts may be defined that presume the functionality of part 1. They may extend part 1 specifications, including, but not limited to, specifying additional output primitives, aspects of output primitives and attributes; extending lists of enumerated types; extending the error lists; etc. Additional parts shall describe their relationship to part 1."
