SIST ETS 300 519 E2:2003

Foreword

This second edition European Telecommunication Standard (ETS) was produced by the Special Mobile Group (SMG) Technical Committee (TC) of the European Telecommunications Standards Institute (ETSI).

This ETS describes the Advice of Charge (AoC) supplementary services within the European digital cellular telecommunications system (Phase 2) and corresponds to GSM 02.86, version 4.1.5.

The specification from which this ETS has been derived was originally based on CEPT documentation, hence the presentation of this ETS may not be entirely in accordance with the ETSI/PNE rules.

Reference is made within this ETS to GSM-TSs (NOTE).

NOTE: TC-SMG has produced documents which give the technical specifications for the implementation of the European digital cellular telecommunications system. Historically, these documents have been identified as GSM Technical Specifications (GSM-TSs). These TSs may have subsequently become I-ETSs (Phase 1), or ETSs (Phase 2), whilst others may become ETSI Technical Reports (ETRs). GSM-TSs are, for editorial reasons, still referred to in GSM ETSs.

Transposition dates	
Date of adoption of this ETS:	30 April 1996
Date of latest announcement of this ETS (doa):	20 August 1996
Date of latest publication of new National Standard or endorsement of this ETS (dop/e):	18 February 1997
Date of withdrawal of any conflicting National Standard (dow):	18 February 1997

SIST ETS 300 519 E2:2003

0 Charging supplementary services

0.1 Scope

This European Telecommunication Standard (ETS) describes the supplementary services belonging to the group CHARGING SUPPLEMENTARY SERVICES.

The general aspects, including definitions and recommended provision, of the description of the GSM supplementary services are given in specification GSM 02.04.

Charging services are the supplementary services associated with charging aspects. The group of supplementary services CHARGING SUPPLEMENTARY SERVICES comprises two services:

- Advice of Charge (Information) - section 1;
- Advice of Charge (Charging) - section 2.

Advice of Charge supplementary services will use the Charge Advice Information described in specification GSM 02.24.

In principle, the same type of mobile station can be used for both services of Advice of Charge, except where the application demands special features - e.g. the payment mechanism in a payphone.

Only one of these services may be subscribed to at any one time.

0.2 Normative references

This ETS incorporates by dated and undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references, the latest edition of the publication referred to applies.
