**About the IEC**

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

**About IEC publications**

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

**IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)**

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

**IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)**

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

**IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)**

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

**IEC online collection - [oc.iec.ch](http://oc.iec.ch)**

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

**Electropedia - [www.electropedia.org](http://www.electropedia.org)**

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**FIXED CAPACITORS FOR USE IN ELECTRONIC EQUIPMENT –****Part 2: Sectional specification – Fixed metallized  
polyethylene-terephthalate film dielectric DC capacitors****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60384-2 has been prepared by IEC technical committee 40: Capacitors and resistors for electronic equipment.

This fifth edition cancels and replaces the fourth edition published in 2011. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) revision of all parts of the document based on the ISO/IEC Directives, Part 2:2018 and harmonization with other similar kinds of documents;
- b) the document structure has been organized to follow the new sectional specification structure decided by TC 40;
- c) revision of tables and Clause 5 so as to prevent duplications and contradictions.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
40/2821/FDIS	40/2830/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60384 series, published under the general title *Fixed capacitors for use in electronic equipment*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

[IEC 60384-2:2021](#)

<https://standards.iteh.ai/catalog/standards/sist/fad71cd6-1563-4e4b-b68a-978e4b30afcc/iec-60384-2-2021>

**FIXED CAPACITORS FOR USE IN ELECTRONIC EQUIPMENT –****Part 2: Sectional specification – Fixed metallized  
polyethylene-terephthalate film dielectric DC capacitors****1 Scope**

This part of IEC 60384 applies to fixed capacitors for direct current, with metallized electrodes and polyethylene-terephthalate dielectric for use in electronic equipment.

These capacitors have a possibility of "self-healing properties" depending on conditions of use. They are primarily intended for applications where the AC component is small with respect to the rated voltage. Two performance grades of capacitors are covered: grade 1 for long-life application and grade 2 for general application.

Capacitors for electromagnetic interference suppression and surface mount fixed metallized polyethylene-terephthalate film dielectric DC capacitors are not included, but are covered by IEC 60384-14 and IEC 60384-19, respectively.

The object of this document is to prescribe preferred ratings and characteristics and to select from IEC 60384-1 the appropriate quality assessment procedures, tests and measuring methods, and to give general performance requirements for this type of capacitor. Test severities and requirements prescribed in detail specifications referring to this sectional specification are of equal or higher performance level, because lower performance levels are not permitted.

[IEC 60384-2:2021](#)

<https://standards.iteh.ai/catalog/standards/sist/fad71cd6-1563-4e4b-b68a-978e4b30afcc/iec-60384-2-2021>

**2 Normative references**

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60063:2015, *Preferred number series for resistors and capacitors*

IEC 60068-1:2013, *Environmental testing – Part 1: General and guidance*

IEC 60384-1:2016, *Fixed capacitors for use in electronic equipment – Part 1: Generic specification*

IEC 61193-2:2007, *Quality assessment systems – Part 2: Selection and use of sampling plans for inspection of electronic components and packages*

ISO 3:1973, *Preferred numbers – Series of preferred numbers*

**3 Terms and definitions**

For the purposes of this document, the terms and definitions given in IEC 60384-1:2016 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

### 3.1

#### **grade 1 capacitors**

<long-life> capacitors intended for long-life applications with stringent requirements for the electrical parameters

### 3.2

#### **grade 2 capacitors**

<general purpose> capacitors for general application where the stringent requirements for grade 1 are not necessary

### 3.3

#### **rated voltage**

$U_R$

maximum DC voltage that can be continuously applied to a capacitor at the rated temperature

## 4 Preferred ratings and characteristics

### 4.1 Preferred characteristics

Preferred climatic categories only shall be given in the preferred characteristics.

The capacitors covered by this specification are classified into climatic categories in accordance with the general rules given in IEC 60068-1:2013, Annex A.

[\[978e4b30afcc/iec-60384-2-2021\]\(https://standards.iec.ch/online Standards/500.html?cd6-1563-4e4b-b68a-978e4b30afcc/iec-60384-2-2021\)](https://standards.iec.ch/online Standards/500.html?cd6-1563-4e4b-b68a-</a></p></div><div data-bbox=)

The lower and upper category temperatures and the duration of the damp heat, steady-state test shall be chosen from the following:

- |   |                                      |
|---|--------------------------------------|
| – lower category temperature:                   | –55 °C, –40 °C and –25 °C            |
| – upper category temperature:                   | +85 °C, +100 °C, +105 °C and +125 °C |
| – duration of the damp heat, steady-state test: | 21 days and 56 days                  |

NOTE With continuous operation at 125 °C in excess of the endurance test time, accelerated ageing is considered (see detail specification).

The severities for the cold and dry heat tests are the lower and upper category temperatures, respectively.

### 4.2 Preferred values of ratings

#### 4.2.1 Nominal capacitance ( $C_N$ )

Preferred values of nominal capacitance are values chosen from the E series of IEC 60063, which are given in Table 1, and their decimal multiples ( $\times 10^n$ , where  $n$  is an integer).

#### 4.2.2 Tolerance on nominal capacitance

The preferred tolerances on the nominal capacitance are ±5 %, ±10 % and ±20 %.

#### 4.2.3 Rated voltage ( $U_R$ )

The preferred values of rated voltages are: 40 V – 50 V – 63 V – 100 V – 160 V – 200 V – 250 V – 400 V – 630 V – 1 000 V – 1 600 V. These values conform to the basic series of preferred values R5 and R 10 given in ISO 3.

The sum of the DC voltage and the peak AC voltage applied to the capacitor shall not exceed the rated voltage. The value of the peak AC voltage shall not exceed the following percentages of the rated voltage at the frequencies stated and shall be not greater than 280 V:

- 50 Hz: 20 %
- 100 Hz: 15 %
- 1 000 Hz: 3 %
- 10 000 Hz: 1 %

unless otherwise specified in the detail specification.

#### 4.2.4 Category voltage ( $U_C$ )

The category voltage is equal to the rated voltage for upper category temperatures up to 85 °C.

For the upper category temperature of 100 °C, the voltage is 0,8  $U_R$ .

**iTeh STANDARD PREVIEW**  
For the upper category temperature of 105 °C, the voltage is 0,75  $U_R$ .  
**(standards.iteh.ai)**

For the upper category temperature of 125 °C, the voltage is 0,5  $U_R$ .

[IEC 60384-2:2021](#)

**4.2.5 Rated temperature** <https://standards.iteh.ai/catalog/standards/sist/fad71cd6-1563-4e4b-b68a-978e4b30afcc/iec-60384-2-2021>

The standard value of rated temperature is 85 °C.

### 5 Test and measurement procedures, and performance requirements

#### 5.1 Visual examination and check of dimensions

See IEC 60384-1:2016, 4.4.

#### 5.2 Electrical tests

##### 5.2.1 Voltage proof

###### 5.2.1.1 General

See IEC 60384-1:2016, 4.6, with the details of 5.2.1.2 to 5.2.1.4.

###### 5.2.1.2 Test circuit

Delete the capacitor  $C_1$ .

The product of  $R_1$  and the nominal capacitance ( $C_N$ ) of the capacitor under test ( $C_X$ ) shall be smaller than or equal to 1 s and greater than 0,01 s.

$R_1$  includes the internal resistance of the power supply.

$R_2$  shall limit the discharge current to a value equal to or less than 1 A.

### 5.2.1.3 Test conditions

The voltages in Table 1 shall be applied between the measuring points of IEC 60384-1:2016, Table 3, for a period of 1 min for qualification approval testing and for a period of 1 s for the lot-by-lot quality conformance testing.

**Table 1 – Test points and voltages**

Test point	Test voltage
1 a)	Grade 1: 1,6 $U_R$ Grade 2: 1,4 $U_R$
1 b), 1 c)	2 $U_R$ with a minimum of 200 V

### 5.2.1.4 Requirements

See Table 9.

The occurrence of self-healing breakdowns during the application of the test voltages is allowed.

## 5.2.2 Capacitance

### 5.2.2.1 General **iTeh STANDARD PREVIEW** (standards.iteh.ai)

See IEC 60384-1:2016, 4.7, with the details of 5.2.2.2 and 5.2.2.3.

#### 5.2.2.2 Measuring conditions [IEC 60384-2:2021](#)

<https://standards.iteh.ai/catalog/standards/sist/fad71cd6-1563-4e4b-b68a-978e4890aace4ecf60384-2:2021>

The capacitance shall be measured at or corrected to a frequency of 1 kHz.

For nominal capacitance values > 10  $\mu\text{F}$ , 50 Hz to 120 Hz may be used, but 1 kHz shall be the reference frequency.

The applied peak voltage at 1 kHz shall not exceed 3 % of the rated voltage, and the applied peak voltage at 50 Hz to 120 Hz shall not exceed 20 % of the rated voltage, with a maximum of 100 V (70 V RMS).

### 5.2.2.3 Requirements

The capacitance shall be within the specified tolerance. See Table 9.

## 5.2.3 Tangent of loss angle ( $\tan \delta$ )

### 5.2.3.1 General

See IEC 60384-1:2016, 4.8, with the details of 5.2.3.2 to 5.2.3.5.

### 5.2.3.2 Measuring conditions for measurements at 1 kHz

Tangent of loss angle shall be measured as follows:

- frequency: 1 kHz;
- peak voltage:  $\leq 3$  % of the rated voltage;
- inaccuracy:  $\leq 10 \times 10^{-4}$  (absolute value).
