

Designation: **E237–02 (Reapproved 2012) E237 – 02 (Reapproved 2019)**

## Standard Specification for Laboratory Glass Microvolumetric Vessels (Volumetric Flasks and Centrifuge Tubes)<sup>1</sup>

This standard is issued under the fixed designation E237; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon ( $\epsilon$ ) indicates an editorial change since the last revision or reapproval.

### 1. Scope

1.1 This specification covers volumetric flasks and four types of centrifuge tubes, widely used in microchemistry.

NOTE 1—Specifications for several items listed below were developed by the Committee on Microchemical Apparatus, Division of Analytical Chemistry, American Chemical Society.<sup>2</sup>

1.2 Product with a stated capacity not listed in this standard may be specified Class A tolerance when product conforms to the tolerance range of the next smaller volumetric standard product listed in **Table 1**.

1.3 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

[E921 Specification for Export Packaged Laboratory Apparatus](#)

[E1133 Practice for Performance Testing of Packaged Laboratory Apparatus for United States Government Procurements](#)

[E1157 Specification for Sampling and Testing of Reusable Laboratory Glassware](#)

### 3. Volumetric Flasks

3.1 The volumetric flasks shall be of either Style I or Style II of **Fig. 1** and shall conform to the requirements of **Fig. 1** and **Table 1**. Each flask shall be marked with the symbol “TC” (or “IN”), the capacity, “20°C”, “20 °C”, and a 16 mm<sup>2</sup> marking area. (All in an optional location on the flask.)

### 4. Centrifuge Tubes

4.1 Centrifuge tubes of four types shall conform to the requirements prescribed in **Tables 2-4** and **Figs. 2-5**. The types shown fit into the metal shields supplied with commercially available centrifuges. Removal of the glass stoppers from the centrifuge tubes shown in **Fig. 3** and **Fig. 4** is advisable before centrifugation. The four types of centrifuge tubes specified are as follows:

4.1.1 Conical bottom, plain (**Fig. 2**).

4.1.2 Conical bottom, stoppered (**Fig. 3**).

4.1.3 Conical bottom, stoppered and graduated (**Fig. 4**).

4.1.4 Cylindrical bottom, plain (**Fig. 5**).

<sup>1</sup> This specification is under the jurisdiction of ASTM Committee E41 on Laboratory Apparatus and is the direct responsibility of Subcommittee E41.01 on Apparatus, Laboratory Ware and Supplies.

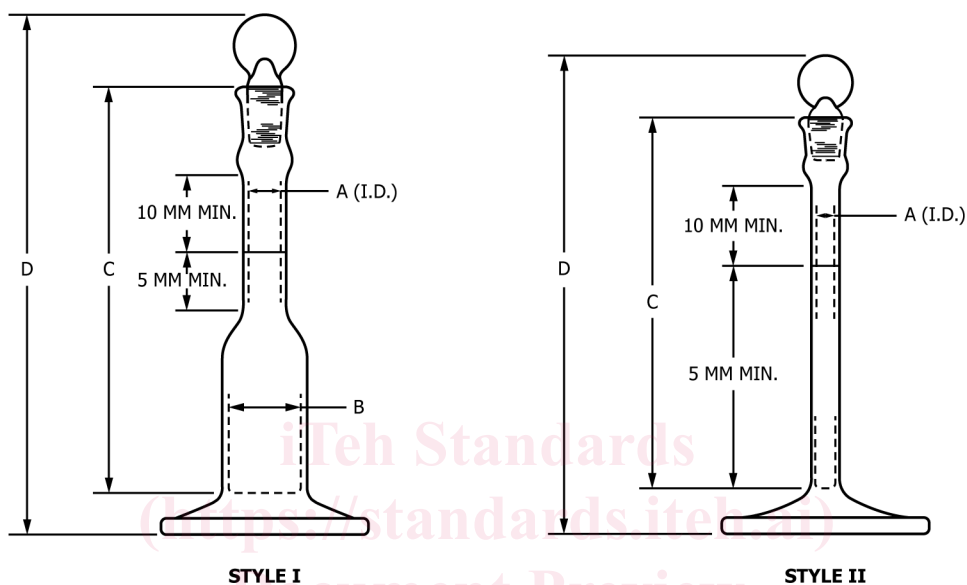

Current edition approved Nov. 1, 2012; Jan. 1, 2019. Published November 2012; January 2019. Originally approved in 1964. Last previous edition approved in 2007; 2012 as E237 – 02(2007); (2012). DOI: 10.1520/E0237-02R12; 10.1520/E0237-02R19.

5	115 ± 2	13.0 ± 0.50	13.5 ± 1.0	40 ± 2	4.0 ± 0.5	9

## 5. Sampling and Testing

5.1 Refer to Specification E1157.

## 6. Calibration

6.1 Flasks and graduated tubes shall be calibrated in accordance with Practice E542 and conform to applicable requirements of Specification E694. Glass shall be Type I, Class A of Specification E438 and annealing shall be in accordance with Specification E671.
