

Designation: D7495 – 12 (Reapproved 2019)

Standard Specification for Minimum Requirements for Accreditation Bodies That Accredit Agencies Testing and Inspecting Road and Paving Materials¹

This standard is issued under the fixed designation D7495; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This document contains minimum requirements for establishing and implementing an accreditation program for agencies testing and inspecting road and paving materials.

1.2 The criteria in this document are applicable to accreditation programs which accredit agencies testing and inspecting road and paving materials.

1.3 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.*

1.4 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

2. Referenced Documents

2.1 *ASTM Standards:*²

ANSI/ISO/IEC 17025 General Requirements for the Competence of Testing and Calibration Laboratories

3. Terminology

3.1 *Definitions of Terms Specific to This Standard:*

3.1.1 *accreditation body*—authoritative body that manages an accreditation program.

3.1.2 *accreditation program for agencies testing and inspecting road and paving materials*—a program administered by an independent authority to fairly and equitably recognize an agency for conformance to defined quality criteria.

3.1.3 *agency*—the organization engaged to test or inspect, or both, road and paving materials as required by a specification or contract.

3.1.4 *evaluation authority*—an independent entity, apart from the testing laboratory being evaluated, that has the capability to provide an unbiased evaluation of the professional and testing activities of testing laboratories.

3.1.5 *testing agency quality system*—the organizational structure, staff responsibilities, policies, standard operating procedures, and processes which, when implemented, assist the testing agency in achieving its quality objectives.

4. Significance and Use

4.1 This document supplements ANSI/ISO/IEC 17011 and together these two documents provide the minimum requirements for an accreditation body which accredits agencies testing and inspecting road and paving materials.

4.2 The user is cautioned that accreditation granted by an accreditation body can only serve a useful purpose if the procedures followed to obtain the accreditation are practiced on a daily basis by the testing agency. It is not the existence of the system but the routine implementation of the procedures and policies of the quality system that is important.
