**About the IEC**

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

**About IEC publications**

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

**IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)**

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

**IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)**

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

**IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)**

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

**IEC online collection - [oc.iec.ch](http://oc.iec.ch)**

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

**Electropedia - [www.electropedia.org](http://www.electropedia.org)**

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

## CONTENTS

FOREWORD.....	9
1 Scope.....	11
2 Normative references .....	11
3 Terms, definitions <b>and abbreviated terms</b> .....	12
<b>3.1 Terms and definitions</b> .....	12
<b>3.2 Abbreviated terms</b> .....	19
4 General requirements for all displays on the bridge of a ship .....	19
4.1 Relationship to IMO standards .....	19
4.2 Application of IEC 60945.....	21
4.2.1 Remark.....	21
4.2.2 General requirements .....	21
4.3 Arrangement of information.....	21
4.3.1 Consistency of layout <b>and logical grouping</b> .....	21
4.3.2 Consistent presentation of information.....	22
4.3.3 Separation of operational display area.....	22
4.4 Readability.....	22
4.4.1 Readability under all ambient light conditions .....	22
4.4.2 Legibility of alphanumeric data and text.....	25
4.4.3 Presentation of text <b>and icons</b> .....	25
<del>4.4.4 Icons .....</del>	<del>25</del>
4.5 Colours and intensity .....	26
4.5.1 Discrimination of colours – Requirement.....	26
4.5.2 Methods of test and required results .....	27
4.6 Symbols.....	27
4.6.1 Operational information .....	27
4.6.2 Electronic chart information .....	28
4.7 Colour coding <del>of information</del> .....	29
4.7.1 Colour coding for discrimination.....	29
4.7.2 Colour coding of information .....	29
4.7.3 Colour coding in combination with other attributes .....	29
4.7.4 Flashing of information .....	30
4.8 Integrity marking .....	30
4.8.1 Indication of source, validity and integrity status .....	30
4.8.2 Colour coding of validity and integrity .....	30
4.8.3 Indication of presentation failure .....	31
4.9 Alerts and indications.....	31
4.9.1 Operational status .....	31
4.9.2 List of alerts.....	32
4.9.3 Alert related information from multiple sources .....	33
4.9.4 Speech output for alarms and warnings .....	33
4.10 Presentation mode.....	33
4.10.1 Requirement.....	34
4.10.2 Methods of test and required results .....	35
4.11 User manuals, instructions and reference guides .....	35
4.11.1 Requirement.....	35
4.11.2 Methods of test and required results .....	35

5	Presentation of operational information .....	35
5.1	Application .....	35
5.2	Presentation of own ship information .....	35
5.2.1	Graphical representation of own ship – Requirement .....	35
5.2.2	Methods of test and required results .....	36
5.3	Presentation of chart information .....	36
5.3.1	Alteration of chart information .....	36
5.3.2	Colours and symbols for charted information .....	36
5.4	Presentation of radar information .....	37
5.4.1	Radar video images .....	37
5.4.2	Target trails .....	38
5.5	Presentation of target information .....	38
5.5.1	Providing target information .....	38
5.5.2	Consistent user interface for target information .....	39
5.5.3	Indication of exceeding target capacity .....	39
<del>5.5.4</del>	<del>Merging AIS targets from multiple source .....</del>	<del>41</del>
5.5.4	Presentation of repeated AIS reports .....	41
5.5.5	Filtering sleeping AIS targets .....	41
5.5.6	Activation of AIS targets .....	43
5.5.7	Graphical presentation of targets .....	43
5.5.8	Target selection .....	44
5.5.9	Indication of target derivation .....	45
5.5.10	Presentation of tracked radar target information .....	45
5.5.11	Presentation of reported AIS target information .....	46
5.5.12	Continual update of target information .....	47
5.5.13	Own ship's AIS information .....	48
5.5.14	Obscuring the operational display area .....	48
5.6	Operational alerts .....	48
5.6.1	Alert status .....	48
5.6.2	CPA/TCPA alarms .....	49
5.6.3	Acquisition/activation zones warnings .....	49
5.6.4	Lost target warnings .....	50
5.7	AIS and radar target association .....	50
<del>5.7.1</del>	<del>Target association .....</del>	<del>50</del>
5.7.1	Requirement .....	50
5.7.2	Methods of test and required results .....	51
5.8	AIS presentation <b>user selectors and their status indications</b> .....	51
5.8.1	Requirement .....	51
5.8.2	Methods of test and required results .....	52
5.9	Trial manoeuvre .....	54
5.9.1	Requirement .....	54
5.9.2	Methods of test and required results .....	54
5.10	Measurement .....	54
5.10.1	Measurement from own ship .....	54
5.10.2	Bearing and range measurements .....	54
5.11	Navigation tools .....	55
5.11.1	General requirements .....	55
5.11.2	Range rings .....	55

5.11.3	Variable range marker (VRM) .....	56
5.11.4	Bearing scale.....	56
5.11.5	Electronic bearing line (EBL) .....	57
5.11.6	Parallel index lines (PI).....	58
5.11.7	Offset measurement of range and bearing .....	59
5.11.8	User cursor.....	60
5.12	<b>AIS data link message processing capacity .....</b>	<b>61</b>
5.12.1	General .....	61
5.12.2	Requirements .....	61
5.12.3	Methods of test and required results .....	61
5.13	<b>AIS data report .....</b>	<b>61</b>
5.13.1	General .....	61
5.13.2	AIS data report capacity .....	61
5.13.3	AIS data report display .....	62
5.13.4	Graphical presentation of AIS AtoN dimensions .....	65
5.14	<b>AIS locating device .....</b>	<b>65</b>
5.14.1	General .....	65
5.14.2	AIS locating device capacity .....	66
5.14.3	AIS locating device display .....	66
5.15	<b>AIS ASM .....</b>	<b>68</b>
5.15.1	General .....	68
5.15.2	Categories .....	69
5.15.3	AIS ASM capacity .....	71
5.15.4	AIS ASM display .....	73
5.16	<b>Presentation of AIS synthetic target .....</b>	<b>75</b>
5.16.1	Requirement.....	75
5.16.2	Methods of test and required results .....	76
5.17	<b>Presentation of association of DSC received call with a displayed AIS object.....</b>	<b>77</b>
5.17.1	Requirement.....	77
5.17.2	Methods of test and required results .....	77
5.18	<b>AIS ASM information extending reported AIS target information .....</b>	<b>78</b>
5.19	<b>Received AIS safety related messages .....</b>	<b>79</b>
5.19.1	Requirements .....	79
5.19.2	Methods of test and required results .....	80
5.20	<b>Sent AIS safety related messages.....</b>	<b>81</b>
5.20.1	Requirements .....	81
5.20.2	Methods of test and required results .....	81
6	<b>INS, radar and chart displays .....</b>	<b>82</b>
6.1	<b>General.....</b>	<b>82</b>
6.1.1	Application.....	82
6.1.2	Multifunction displays .....	82
6.1.3	Simultaneous display of radar and chart data .....	82
6.1.4	Range scales.....	83
6.1.5	Operational display area.....	83
6.1.6	Motion display modes .....	83
6.1.7	Orientation modes .....	84
6.1.8	Off-centring .....	84
6.1.9	Stabilisation modes .....	85

6.2	Radar displays .....	85
6.2.1	Application.....	85
6.2.2	Radar video image.....	86
6.2.3	Brightness of radar information.....	86
6.2.4	Display of chart information on radar .....	86
6.2.5	Priority of radar information .....	87
6.2.6	Display of map graphics .....	88
6.3	Chart displays.....	88
6.3.1	Application.....	88
6.3.2	Display of chart information .....	88
6.3.3	IMO ECDIS display categories.....	89
6.3.4	Adding or removing information from the display.....	90
6.3.5	Safety contour .....	90
6.3.6	Safety depth .....	90
6.3.7	Chart scale .....	90
6.3.8	Display of radar and target information .....	91
6.3.9	Display of additional information .....	91
6.4	Composite task-oriented presentations .....	92
6.4.1	User-configured presentations .....	92
6.4.2	Information associated with the task-at-hand .....	92
6.5	Single and simple operator actions .....	92
6.5.1	Applicability .....	92
6.5.2	Requirement.....	93
6.5.3	Methods of test and required results .....	93
6.6	User and default settings .....	93
6.6.1	General .....	93
6.6.2	User-settings .....	93
6.6.3	Default settings .....	94

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – PRESENTATION OF NAVIGATION-RELATED INFORMATION ON SHIPBORNE NAVIGATIONAL DISPLAYS – GENERAL REQUIREMENTS, METHODS OF TESTING AND REQUIRED TEST RESULTS**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

**This commented version (CMV) of the official standard IEC 62288:2021 edition 3.0 allows the user to identify the changes made to the previous IEC 62288:2014 edition 2.0. Furthermore, comments from IEC TC 80 experts are provided to explain the reasons of the most relevant changes.**

**A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text. Experts' comments are identified by a blue-background number. Mouse over a number to display a pop-up note with the comment.**

**This publication contains the CMV and the official standard. The full list of comments is available at the end of the CMV.**

IEC 62288 has been prepared by IEC technical committee 80: Maritime navigation and radiocommunication equipment and systems. It is an International Standard.

This third edition cancels and replaces the second edition published in 2014. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Clause 4 has been revised to remove requirements for indications of alerts which are now given in IEC 62923-1;
- b) Clause 5 has been extensively revised to add new requirements for AIS, ASM and DSC presentation together with three new supporting annexes, Annex J, Annex K, Annex L;
- c) Annex A and Annex B have been revised to incorporate changes to IMO circular SN.1/Circ.243;
- d) Annex E has been revised to incorporate changes to IMO resolution MSC.191(79) and renamed as "Operational controls and logical grouping".
- e) two new annexes have been added, Annex H on operator actions and Annex I on default settings in support of IMO circular MSC.1/Circ.1609.

The text of this International Standard is based on the following documents:

Draft	Report on voting
80/1013/FDIS	80/1017/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/standardsdev/publications](http://www.iec.ch/standardsdev/publications).

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

# MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – PRESENTATION OF NAVIGATION-RELATED INFORMATION ON SHIPBORNE NAVIGATIONAL DISPLAYS – GENERAL REQUIREMENTS, METHODS OF TESTING AND REQUIRED TEST RESULTS

## 1 Scope

This document specifies the general requirements, methods of testing, and required test results, for the presentation of navigation-related information on shipborne navigational displays in support of IMO resolutions MSC.191(79) **as amended by MSC.466(101) in June 2019**, and **where applicable** MSC.302(87). **1**

This document also supports the guidelines included in the related IMO Circulars MSC.1/Circ.1609 on the standardization of user interface design for navigation equipment and SN.1/Circ.243 as revised in June 2019 on the presentation of navigation related symbols, terms and abbreviations. **1**

This document also specifies the presentation of AIS data reports and the AIS Application Specific Messages defined for international use in IMO SN.1/Circ.289 and intended to be received by a ship for display onboard. **2**

NOTE All text in this document whose wording is identical to text contained in an IMO document is printed in *italics*. Reference to the document is noted at the beginning of the paragraph. The notation contains a prefix referring to the document and a suffix with the paragraph number from the document (for example, (MSC191/1); (SN243/1), etc.).

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60945:2002, *Maritime navigation and radiocommunication equipment and systems – General requirements – Methods of testing and required test results*

IEC 61174, *Maritime navigation and radiocommunication equipment and systems – Electronic chart display and information system (ECDIS) – Operational and performance requirements, methods of testing and required test results*

IEC 61966-4, *Multimedia systems and equipment – Colour measurement and management – Part 4: Equipment using liquid crystal display panels*

~~IEC 62065, *Maritime navigation and radiocommunication equipment and systems – Track control systems – Operational and performance requirements, methods of testing and required test results*~~

IEC 62388, *Maritime navigation and radiocommunication equipment and systems – Shipborne radar – Performance requirements, methods of testing and required test results*

IEC 62923-1, *Maritime navigation and radiocommunication equipment and systems – Bridge alert management – Part 1: Operational and performance requirements, methods of testing and required test results*

IHO S-52, *Specifications for chart content and display aspects of ECDIS*

~~IHO S-52 Annex A, IHO ECDIS presentation library~~ **3**

*IMO, Seafarers' Training, Certification and Watchkeeping Code (STCW Code)*

IMO A.694(17):1991, *General requirements for shipborne radio equipment forming part of the global maritime distress and safety system (GMDSS) and for electronic navigational aids*

IMO MSC.191(79):2004, *Performance standards for the presentation of navigation related information on shipborne navigational displays*

IMO MSC.192(79):2004, *Performance standards for radar equipment*

IMO MSC.232(82):2006, *Revised performance standards for electronic chart display and information systems (ECDIS)*

IMO SN.1/Circ.243/~~Rev.1:2014~~Rev.2:2019+Corr.1, *Guidelines for the presentation of navigation related symbols, terms and abbreviations*

~~IMO MSC.252(83):2007, Performance standards for integrated navigation systems (INS)~~

IMO SN.1/Circ.289:2010, *Guidance on the use of AIS application-specific messages*

IMO MSC.302(87):2010, *Performance standards for bridge alert management (BAM)*

IMO MSC.1/Circ.1609:2019, *Guidelines for the standardization of user interface design for navigation equipment*

IMO A.1021(26):2009, *Code on Alerts and Indications*

VESA-2001-6, *Flat Panel Display Measurements (FPDM)*

### **3 Terms, definitions and abbreviated terms**

For the purposes of this document, the following terms, definitions and abbreviated terms apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

#### **3.1 Terms and definitions**

##### **3.1.1**

##### **activated AIS target**

(MSC191/A) target ~~activated~~ representing the automatic or manual activation of a sleeping target **4** for the display of additional graphically presented information

~~EXAMPLE—Heading line, velocity vector, etc.~~

##### **3.1.2**

##### **automatic identification system**

##### **AIS**

system which complies with the requirements set forth in Annex 3 of IMO Resolution MSC.74(69)
