About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES –
TEST CODE FOR THE DETERMINATION OF
AIRBORNE ACOUSTICAL NOISE –****Part 2-13: Particular requirements for cooking fume extractors**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60704-2-13 has been prepared by subcommittee 59K: Performance of household and similar electrical cooking appliances, of IEC technical committee 59: Performance of household and similar electrical appliances. It is an International Standard.

This fourth edition cancels and replaces the third edition published in 2016. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) alignment with IEC 61591:2023;
- b) change of title, scope and definitions 3.103 and 3.104: this document deals with cooking fume extractors (this covers range hoods and down-draft systems);

- c) exhaust pipe of down-draft systems specified;
- d) built-in range hoods in recirculation mode with an air outlet device specified;
- e) alignment with IEC 60704-1:2021.

The text of this International Standard is based on the following documents:

Draft	Report on voting
59K/376/FDIS	59K/380/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

This International Standard is to be used in conjunction with IEC 60704-1:2021.

This document supplements or modifies the corresponding clauses in IEC 60704-1:2021, so as to establish the test code for cooking fume extractors. When a particular subclause of IEC 60704-1:2021 is not mentioned in this document, that subclause is applicable as far as reasonable. Where this standard states "addition", "modification" or "replacement", the relevant requirements, test specifications or explanatory matter in IEC 60704-1:2021 are to be adapted accordingly.

Subclauses, tables and figures that are numbered starting from 101 are additional to those in IEC 60704-1:2021. Additional annexes are lettered AA, BB, etc.

<https://standards.ieh.ai/catalog/standards/sist/c285c460-9d3c-4580-83eb-46e7f13048e/iec-60704-2-13-2023>

Unless notes are in a new subclause or involve notes in IEC 60704-1:2021, they are numbered starting from 101, including those in a replaced clause or subclause.

A list of all parts in the IEC 60704 series, published under the general title *Household and similar electrical appliances – Test code for the determination of airborne acoustical noise*, can be found on the IEC website.

In this standard, the following print types are used:

- terms defined in Clause 3: **bold type**.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

INTRODUCTION

The measuring conditions specified in this document provide for sufficient accuracy in determining the noise emitted and comparing the results of measurements taken by different laboratories, whilst simulating as far as possible the practical use of cooking fume extractors mounted in household kitchens.

It is recommended to consider the determination of noise levels as part of a comprehensive testing procedure covering many aspects of the properties and performance of cooking fume extractors.

NOTE As stated in the introduction to IEC 60704-1:2021, this test code is concerned with airborne noise only.

HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES – TEST CODE FOR THE DETERMINATION OF AIRBORNE ACOUSTICAL NOISE –

Part 2-13: Particular requirements for cooking fume extractors

1 Scope

Addition:

These particular requirements apply to **cooking fume extractors** for household and similar use intended for filtering the air of a room or for exhausting the air out of a room, including their accessories and their component parts. It also applies to **cooking fume extractors** where the fan is mounted separately from the appliance inside or outside of the room where the appliance is located, but controlled by the appliance when the fan is defined in the technical documentation. This document deals also with **down-draft systems** that are arranged beside, behind or under the cooking appliance.

Measurements carried out in accordance with this document determine the noise emission into the room, from which cooking fumes are extracted. Noise emission to the outside (e.g. through air ducts) are not considered.

2 Normative references

Addition:

IEC 60704-1:2021, *Household and similar electrical appliances – Test code for the determination of airborne acoustical noise – Part 1: General requirements*

IEC 61591:2023, *Cooking fume extractors – Methods for measuring performance*

ISO 7235:2003, *Acoustics – Laboratory measurement procedures for ducted silencers and air-terminal units – Insertion loss, flow noise and total pressure loss*

3 Terms and definitions

Addition:

3.101

cooking fume extractor

CFE

appliance with fan and filter intended to collect and treat cooking fumes, which can be operated in **recirculation mode** or **extraction mode**

[SOURCE: IEC 61591:2023, 3.2]

3.102

range hood

CFE installed over a cooking appliance

[SOURCE: IEC 61591:2023, 3.3]

3.103**wall range hood****range hood** mounted to the wall

[SOURCE: IEC 61591:2023, 3.3.1]

3.104**island range hood****range hood** mounted to the ceiling

[SOURCE: IEC 61591:2023, 3.3.2]

3.105**ceiling range hood****range hood** integrated onto or into the ceiling

[SOURCE: IEC 61591:2023, 3.3.3]

3.106**built-in range hood****range hood** mounted into or onto a cabinet

[SOURCE: IEC 61591:2023, 3.3.4]

3.107**microwave hood combination****CFE** integrated in a microwave oven

[SOURCE: IEC 61591:2023, 3.4]

3.108**multiple combination hood****CFE** where the fan is mounted separately of the appliance, but controlled by the appliance

[SOURCE: IEC 61591:2023, 3.5]

3.109**down-draft system****CFE** intended for installation adjacent to a cooking appliance or integrated in a cooking appliance that draws vapour down into a duct

Note 1 to entry: A **down-draft system** can also be a system where the fan is mounted separately from the appliance but controlled by the appliance.

[SOURCE: IEC 61591:2023, 3.6]

3.110**recirculation mode**mode of a **CFE** that discharges air back into the room, which includes an **odour-reduction filter**

[SOURCE: IEC 61591:2023, 3.7]

3.111**extraction mode**

mode of a **CFE** that discharges the air to the outside of the building by means of ducting

Note 1 to entry: **Extraction mode** is also known as "vented mode" or "ducted mode".

[SOURCE: IEC 61591:2023, 3.8]

3.112**rated voltage**

voltage assigned to the **CFE** by the manufacturer

[SOURCE: IEC 61591:2023, 3.9]

3.113**grease filter**

components for absorbing grease, which are intended to be replaced or removed for cleaning without tools

[SOURCE: IEC 61591:2023, 3.11]

3.114**odour-reduction filter**

components for reducing odour

[SOURCE: IEC 61591:2023, 3.12]

3.115**highest continuous setting for normal use**

control setting of **CFE** at highest speed, excluding the **boost position setting**

Note 1 to entry: Marked setting on the appliance, which is described in the instructions for use.

[SOURCE: IEC 61591:2023, 3.15]

3.116**boost position setting**

marked control setting at maximum fan speed, which is automatically limited in duration

Note 1 to entry: Marked setting on the appliance, which is described in the instructions for use.

[SOURCE: IEC 61591:2023, 3.16]

4 Measurement methods and acoustical environments**4.2 Direct method***Addition:*

If pure tone components are present in the noise emitted by the source, the estimated standard deviation of the measured sound pressure levels in the special reverberation room can increase. In such cases, additional microphone positions or source positions can be necessary, as specified in ISO 3743-2:2018.

4.3 Comparison method

Addition:

If pure tone components are present in the noise emitted by the source, the estimated standard deviation of the measured sound pressure levels in the hard-walled test room or in the special reverberation room can increase. In such cases, additional microphone positions or source positions can be necessary, as specified in ISO 3743-1:2010 or ISO 3743-2:2018.

4.5 Measurement uncertainties

4.5.2 Standard deviations on repeatability and reproducibility and standard deviations related to declaration and verification

Replacement:

The estimated values of standard deviations of sound power levels determined in accordance with this document are given in Table 1:

Table 1 – Standard deviations of sound power levels

Standard deviation (dB)	
σ_r (repeatability)	σ_R (reproducibility)
0,4	1,0

For the purpose of determining and verifying noise emission values in accordance with IEC 60704-3, the values in Table 2 apply:

Table 2 – Standard deviations for declaration and verification

Standard deviation (dB)		
σ_P (production)	σ_t (total)	σ_M (reference)
1,5 to 1,7	1,8 to 2,0	2,0

5 Instrumentation

5.1 Instrumentation for measuring acoustical data

Addition:

The use of a windscreen is recommended. If necessary, the observed sound pressure level shall be corrected for changes in the microphone's sensitivity, in accordance with the instructions accompanying the instrumentation.

6 Operation and location of appliances under test

6.1 Equipping and pre-conditioning of appliances

6.1.1

Addition:

CFEs shall be fitted with (a) clean filter(s).

NOTE The filter(s) have to be replaced after a grease absorption test, while an odour-reduction test does not soil the filter(s).

CFEs in **extraction mode** shall be fitted with the pipe coupling ring, if any, having the largest diameter among those provided by the manufacturer.

Any pull-out or swing-out mechanism that can be opened to a position for normal use in accordance with the manufacturer's instructions shall be opened during the test. Positions that are for cleaning and maintenance purposes only shall be not considered. If the manufacturer's instruction does not state any information, the pull-out or swing-out mechanism shall be completely closed.

If the **down-draft system** can be elevated, the manufacturer's instructions are followed; otherwise, it shall be measured in its maximum elevated position for use.

6.1.3

Replacement:

Prior to noise measurements, the **CFE** shall be operated for at least 4 h at the **highest continuous setting for normal use** (see 3.115).

6.1.4

Replacement:

Immediately before each series of noise measurements, the **CFE** equipped for its intended use is operated to stabilize at the **highest continuous setting for normal use** (see 3.115) for at least 10 min.

6.2 Supply of electrical energy and of water or gas

6.2.3 and **6.2.4** Not applicable.

6.4 Loading and operating of appliances during tests

6.4.1

Replacement:

This document describes the determination of the noise emission of household **CFEs** and can be applied for the measurement at all fan speed settings, including on a boost position, if any. The noise shall be reported at least for the **highest continuous setting for normal use**.

6.4.2

Replacement:

The **CFE** shall be equipped in accordance with 6.1.1.
