About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD	10
1 Scope	14
2 Normative references	15
3 Terms and definitions	19
3.1 Definitions relating to ratings, voltages, currents, frequencies, and wattages	19
3.2 Definitions of types of control according to purpose	21
3.3 Definitions relating to the function of controls	24
3.4 Definitions relating to disconnection and interruption	27
3.5 Definitions of types of control according to construction	28
3.6 Definitions of type of automatic action of a control	29
3.7 Definitions relating to protection against electric shock and type of insulation	30
3.8 Definitions relating to component parts of controls	34
3.9 Definitions of types of terminals and terminations of controls	35
3.10 Definitions relating to the connections to controls	37
3.11 Definitions relating to the performance of type 2 actions	38
3.12 Definitions relating to the requirements for creepage distances and clearances	38
3.13 Miscellaneous definitions	39
3.14 Definitions relating to manufacturer and user	41
3.15 Definitions pertaining to thermistors	41
3.16 Definitions relating to the structure of controls using software	41
3.17 Definitions relating to error avoidance in controls using software	41
3.18 Definitions relating to fault/error control techniques for controls using software	41
3.19 Definitions relating to memory tests for controls using software	41
3.20 Definitions of software terminology – General	41
3.21 Definitions relating to classes of control functions	41
3.22 Definitions relating to functional safety	41
3.23 Definitions related to access to data exchange	42
3.24 Definitions related to EMC performance	42
4 General	44
4.1 General structure of the document	44
4.2 General requirements	45
4.3 General notes on tests	45
5 Required technical information	49
5.1 General requirements	49
5.2 Methods of providing technical information	49
5.3 Class II symbol	57
5.4 Additional requirements for marking	57
5.5 Warning or cautionary markings	59
6 Protection against electric shock	59
6.1 General requirements	59
6.2 Actuating members and actuating means	61
6.3 Capacitors	62
6.4 Covers and uninsulated live or hazardous parts	62

6.5	Battery operated controls provided with a user accessible mains supply input connector	62
7	Provision for protective earthing	63
7.1	Class 0I and Class I controls	63
7.2	Class II and class III controls	63
7.3	Adequacy of earth connections	63
7.4	Corrosion resistance	64
7.5	Other requirements	65
7.6	Protective equipotential bonding	65
8	Terminals and terminations	65
8.1	Terminals and terminations for external copper conductors	65
8.2	Terminals and terminations for internal conductors	70
8.3	Terminals and terminations for integrated conductors	72
9	Constructional requirements	72
9.1	Materials	72
9.2	Protection against electric shock	72
9.3	Actuation and operation	75
9.4	Actions	78
9.5	Openings in enclosures	80
9.6	Mounting of controls	80
9.7	Attachment of cords	82
9.8	Size of cords – non-detachable	83
9.9	Inlet openings	83
9.10	Equipment inlets and socket-outlets	84
9.11	Requirements during mounting, use, maintenance and servicing	85
9.12	Controls using software	87
9.13	Protective controls and components of protective control systems	90
10	Threaded parts and connections	92
10.1	Threaded parts moved during mounting or servicing	92
10.2	Current-carrying connections and connections providing protective earthing continuity	94
11	Creepage distances, clearances and distances through solid insulation	95
11.1	General	95
11.2	Clearances	96
11.3	Creepage distances	100
11.4	Solid insulation	104
12	Components	105
12.1	Transformers	105
12.2	Switch mode power supplies and converters	105
12.3	Capacitors	106
12.4	Fuses	106
12.5	Varistors	106
12.6	Thermistors	106
12.7	Relays	107
12.8	Other components	107
13	Fault assessment on electronic circuits	107
13.1	Fault assessment for inherent safety	107
13.2	Fault assessment to ensure functional safety	113

14	Moisture and dust resistance	113
14.1	Protection against ingress of water and dust	113
14.2	Protection against humid conditions	114
14.3	Touch current test for in-line cord controls and free-standing controls	115
15	Electric strength and insulation resistance	116
15.1	Insulation resistance	116
15.2	Electric strength	116
15.3	Additional tests for in-line cord and free-standing controls	118
16	Heating	119
17	Manufacturing deviation and drift	123
18	Environmental stress	123
18.1	Transportation and storage	123
18.2	Environmental stress of temperature	123
19	Endurance	124
19.1	General requirements	124
19.2	Electrical conditions for the tests	125
19.3	Thermal conditions for the tests	131
19.4	Manual and mechanical conditions for the tests	131
19.5	Dielectric strength requirements	132
19.6	Ageing test	132
19.7	Overvoltage test or overload test in all countries using an overload test of automatic action at accelerated rate	132
19.8	Test of automatic action at accelerated rate	133
19.9	Test of automatic action at slow rate	133
19.10	Overvoltage test or overload test in all countries that use the overload test of manual action at accelerated speed	134
19.11	Test of manual action at slow speed	134
19.12	Test of manual action at high speed which has multiple poles, and where polarity reversal occurs during the action	134
19.13	Test of manual action at accelerated speed	134
19.14	Evaluation of compliance	135
19.15	Test for particular purpose controls	135
20	Mechanical strength	135
20.1	General requirements	135
20.2	Impact resistance	136
20.3	Free-standing controls	137
20.4	In-line cord controls	137
20.5	Pull-cord actuated controls	137
20.6	Foot actuated controls	138
20.7	Actuating member and actuating means	138
20.8	Flexing – test	139
20.9	Cord anchorages – test	139
21	Resistance to heat, fire and tracking	140
21.1	General requirements	140
21.2	Integrated, incorporated and in-line cord controls	140
21.3	Independently mounted, free-standing controls	141
22	Resistance to corrosion	142
22.1	Resistance to rusting	142

23	Electromagnetic compatibility (EMC) requirements – Emission	142
23.1	General requirement	142
23.2	High frequency emission	143
23.3	Low frequency emission	146
24	Normal operation	146
25	Electromagnetic compatibility (EMC) requirements – Immunity	146
25.1	General	146
25.2	EMC test plan and report	147
25.3	Immunity requirements	149
25.4	Performance criteria	152
25.5	Surge immunity test	153
25.6	Electrical fast transient immunity test	153
25.7	Radio-frequency electromagnetic field immunity	154
25.8	Electrostatic discharge	154
25.9	Immunity to power-frequency magnetic fields	154
25.10	Test of the influence of voltage dips and voltage interruption in the power supply network	154
26	Abnormal operation tests	155
26.1	Abnormal temperature test	155
26.2	Overload tests	156
26.3	Battery short-circuit test	157
	Annex A (normative) Indelibility of markings	174
	Annex B (normative) Measurement of creepage distances and clearances in air	176
	Annex C (informative) Nominal voltages of supply systems for different modes of overvoltage control	180
	Annex D (normative) Overvoltage categories	182
	Annex E (informative) Typical usage of controls and related overvoltage categories	183
	Annex F (normative) Pollution degrees	184
F.1	Pollution	184
F.2	Degrees of pollution in the micro-environment	184
	Annex G (normative) Resistance to heat, fire and tracking tests	185
G.1	Glow-wire test	185
G.2	Proof tracking test	185
G.3	Ball pressure test	185
	Annex H (normative) Requirements related to functional safety	187
H.3	Terms and definitions	187
H.5	Information	198
H.9	Constructional requirements	199
H.13	Fault assessment on electronic circuits	216
H.17	Manufacturing deviation and drift	220
H.19	Endurance	221
H.25	Electromagnetic compatibility (EMC) requirements – Immunity	222
	Annex I (normative) Requirements for certain types of DC supplied controls	235
I.1	Scope	235
	Annex J (normative) Requirements for thermistor elements and controls using thermistors	237
J.1	Scope	237
	Annex K (normative) Circuit for measuring touch current	254

Annex L (normative) Printed circuit board coating performance test.....	255
Annex M (normative) Printed circuit board protection	257
Annex N (informative) Explanatory notes for surge immunity test.....	260
N.1 Different source impedances.....	260
N.2 Application of the tests.....	260
N.3 Installation classification	261
Annex O (informative) Guidance for applying Clause 11	264
Annex P (normative) Requirements for SELV and PELV	267
P.1 Overview of the requirements for SELV and PELV	267
P.2 Protection against electric shock by SELV system or PELV system.....	267
P.3 Protective measures for SELV system and PELV system	268
Annex Q (informative) Regional differences relevant for the member countries of Cenelec	270
Annex R (informative) National differences relevant in the United States of America.....	274
R.2 Normative references.....	274
Annex S (informative) National differences relevant in Japan	275
S.2 Normative references.....	275
Annex T (informative) National differences relevant in Canada	276
T.2 Normative references.....	276
Bibliography.....	277

INTERNATIONAL ELECTROTECHNICAL COMMISSION

AUTOMATIC ELECTRICAL CONTROLS –**Part 1: General requirements**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60730-1 has been prepared by IEC technical committee 72: Automatic electrical controls. It is an International Standard.

This sixth edition cancels and replaces the fifth edition published in 2013, Amendment 1:2015 and Amendment 2:2020. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- | | | |
|----|---|--|
| a) | Structure of the main clauses | The clauses of the standard are grouped into two sections of requirements, where <ul style="list-style-type: none"> • the first section consists of the Clauses 5 to 13 that, in general, addresses the construction of the product. It is noted that certain construction requirements may have verification requirements integrated within the clause to facilitate usage of the standard, and • the second section consists of Clauses 14 to 26 that addresses the verification requirements; |
| b) | Scope | Relocated and deleted clauses to better reflect the products covered under the part 1 and for easier reading; |
| c) | Normative references | Updated references; |
| d) | Terms and definitions | Revised text in certain clauses and relocated relevant Clause H.3 subclauses into Clause 3; |
| e) | General requirements | General structure of the standard explained along with a figure to depict the intent; |
| f) | General notes on tests | Reduced sample size from 3 to 1, yet requiring analysis; order of tests more flexible; relocation of battery requirements from Annex V; |
| g) | Rating | Deleted – covered under the scope; |
| h) | Classification | Deleted – covered under information; |
| i) | Information | Updated Table 1 to reflect entries from the classification clause, and all cross-references; |
| j) | Protection against electric shock | Revised Clause 8 to include Clause H.8 and Clause V.8 subclauses, revised clauses as appropriate to distinguish between a live part and a hazardous live part; |
| k) | Provision for protective earthing | |
| l) | Construction requirements | One Y1 capacitor allowed; relocated relevant requirements of Clause H.11 and Clause V.11 into Subclause 9.2.5 and Subclause 9.13.4.4 respectively; |
| m) | Moisture and dust | Relocated IP table from classification to Clause 14; updated references; |
| n) | Manufacturing deviation and drift | All clauses moved to Annex H since the requirements pertain to functional safety of controls; |
| o) | EMC-Emissions | Moved Clause H.23 into Clause 23; |
| p) | EMC-Immunity | New EMC requirements (performance) for all controls except incorporated/integrated controls with Class A control functions. Products intended for HBES/BACS are also subjected to these requirements; |
| q) | Fault assessment on electronic circuits | Fault assessment moved from Annex H to Clause 13; deleted test abnormal voltage for electronic disconnection; |

- r) Annex H Relocated all relevant requirements for electronics to the respective clauses within the body of the standard and retained requirements related to functional safety in this annex;
- s) Annex T Revised clauses for clarity in Annex P;
- t) Annex U Removed, the necessity of the annex was not seen anymore;
- u) Annex V Included in the main part of the standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
72/1307/FDIS	72/1320/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at <https://www.iec.ch/publications>.

A list of all parts of the IEC 60730 series, under the general title: *Automatic electrical controls*, can be found on the IEC website.

In the development of a fully international standard to cover automatic electrical controls, it has been necessary to take into consideration the differing requirements resulting from practical experience in various parts of the world and to recognize the variation in national electrical systems and wiring rules.

The "in some countries" clauses have been moved to the regional respectively national differences in Annex Q to Annex T.

It is envisaged that in the next edition of this document, it will be found possible to remove those differences that are covered by new IEC standards now being prepared by other technical committees.

This part 1 is to be used in conjunction with the appropriate part 2 for a particular type of control, or for controls for particular applications. This part 1 may also be applied, so far as reasonable, to controls not mentioned in a part 2, and to controls designed on new principles, in which cases additional requirements may be considered to be necessary.

Where, for a particular clause or subclause, the text of part 2 indicates:

- Addition:** the part 1 text applies with the additional requirement indicated in a part 2;
- Modification:** the part 1 text applies with a minor change as indicated in a part 2;
- Replacement:** the part 2 text contains a change which replaces the part 1 text in its entirety.

Where no change is necessary, the part 2 indicates that the relevant clause or subclause applies.

NOTE In this document the following print types are used:

- Requirements proper: in roman type;
- *Test specifications: in italic type;*
- Explanatory matter: in smaller roman type;
- Defined terms: **bold type**.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.
