This document is not an ASTM standard and is intended only to provide the user of an ASTM standard an indication of what changes have been made to the previous version. Because it may not be technically possible to adequately depict all changes accurately, ASTM recommends that users consult prior editions as appropriate. In all cases only the current version of the standard as published by ASTM is to be considered the official document.

Designation: F2974 - 19 F2974 - 20

Standard Practice for Auditing Amusement Rides and Devices¹

This standard is issued under the fixed designation F2974; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This practice establishes minimum requirements for auditing conformance to ASTM Committee F24 Standards during an audit of an amusement ride or device within a defined scope.

1.2 Defined scope of audit shall include but not be limited to the following:

1.2.1 Auditors sufficient relevant education, training, technical knowledge, certifications as appropriate, and experience to properly audit an amusement ride or device in accordance with subsection 5.1 of this standard.

1.2.2 Visual acuity requirements (if applicable) in accordance with subsection 5.1.3 of this standard.

1.2.3 Reference standards including published year.

1.3 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.

1.4 This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.

2.1 ASTM Standards:²

F747 Terminology Relating to Amusement Rides and Devices

F770 Practice for Ownership, Operation, Maintenance, and Inspection of Amusement Rides and Devices

F1159 Practice for Design of Amusement Rides and Devices that are Outside the Purview of Other F24 Design Standards

F1193 Practice for Quality, Manufacture, and Construction of Amusement Rides and Devices

F2291 Practice for Design of Amusement Rides and Devices 2074-20

2.2 ASNT Document:³

ASNT-SNT-TC-1A Recommended Practice Personnel Qualification and Certification in Nondestructive Testing 2.3 AWS Standard:⁴

AWS B5.1 Specification for the Qualification of Welding Inspectors

2.4 ISO Standard:⁵

ISO 9712 Non-destructive testing – Qualification and certification of personnel

3. Terminology

3.1 Reference Terminology F747.

4. Significance and Use

4.1 The purpose of this practice is to provide the minimum auditing requirements for audits of amusement rides and devices.

¹ This practice is under the jurisdiction of ASTM Committee F24 on Amusement Rides and Devices and is the direct responsibility of Subcommittee F24.30 on Maintenance and Inspection.

Current edition approved Jan. 1, 2019 Feb. 1, 2020. Published January 2019 February 2020. Originally approved in 2013. Last previous edition approved in $\frac{20182019}{10.1520/F2974-19.10.1520/F2974-20.}$

€ F2974 – 20

4.2 An audit can include inspections, evaluations, or examinations during the design, manufacturing, installation, commissioning, operation, or major modification of an amusement ride or device.

4.3 When audits are performed, they shall occur during the relevant stages of an amusement ride or device's design, manufacture, installation, commissioning or major modification. This practice does not require recurring design, manufacturing, installation, commissioning, or major modification audits.

5. General

5.1 Auditor(s) shall have sufficient relevant education, experience, and trainingtraining, technical knowledge, certifications as appropriate, and experience to properly audit an amusement ride or device as defined in this standard within the scope of the audit.

5.1.1 Evidence of auditor(s) relevant education, experience, and trainingtraining, technical knowledge, certifications as appropriate, and experience shall be made available upon request by to the party(ies) requesting the audit upon request.

5.1.2 Auditor(s) shall read and become familiar with contents of the applicable referenced documents.

5.1.3 When visual inspections are required by the defined scope of work, the auditor(s) shall have:

5.1.3.1 Visual acuity in conformance with one of the following; AWS B5.1 (Section 6), ASNT SNT-TC-1A (Section 8), ISO 9712 (Section 7), or other equivalent standard(s).

5.1.3.2 Sufficient lighting available (natural or artificial) to perform the visual inspection.

5.1.3.3 The necessary eye correction, lenses, tools or visual enhancements (if any) to comply with 5.1.3.1.

5.2 The auditor must prepare for and comply with all personal health and safety requirements as they pertain to the scope of the audit.

5.3 Inspection tools, test equipment, gauges, or other devices shall be in proper working order and, where applicable, calibrated. Calibration shall be established by a record of calibration showing calibration traceable to accepted standards specific to the equipment used (for example, AISC, ASME, ANSI, etc.).

5.4 Audit recording formats shall be mutually agreed upon by auditor and auditee before the audit is initiated.

5.4.1 Actual findings or statements, or other information that is related to the audit(s) shall be included in the audit record(s). Audit record(s) may include but not limited to, written documentation, photo(s), video(s), spreadsheet(s), and list(s).

5.4.2 The auditor's name(s) and date(s) of the audit(s) performed shall be included in the auditing record(s).

6. Design Audit Program

6.1 When performing an audit of a new design of an amusement ride or device, the auditor shall review conformance to Practice F2291 or the applicable F24 standard in effect at the time of the design.

7. Manufacturing Audit Program

7.1 When performing an audit of the manufacturing of an amusement ride or device, the auditor(s) shall review conformance to Practice F1193.

8. Installation and Commissioning Audit Program

8.1 When performing an audit of the installation and commissioning of an amusement ride or device, the auditor(s) shall: 8.1.1 Perform an inspection of equipment condition per Section 9 through Section 13 the Certification, Installation and

Commissioning, Operation and Maintenance Documentation, and Information Plate sections of Practice F1193.

8.1.2 Review conformance to Practice F770.

9. Major Modification Audit Program

9.1 When performing an audit of the design of an amusement ride or device, the auditor shall review conformance that the design specific to the major modification meets Practice F2291 or the applicable F24 standard.

9.2 When performing an audit of a major modification to an amusement ride or device as defined in Terminology F747, the auditor(s) shall perform the following where applicable:

9.2.1 Review conformance to Owner/Operator's Operations and Maintenance Training Program per Practice F770.

9.2.2 Owner/operator's conformance to manufacturer's maintenance and inspection requirements.

9.2.3 Review conformance to manufacturer's requirements and documentation per Practice F1193.

9.2.4 Evaluate all documentation that is available for the modification and that this information reflects the in-field installation.

9.2.5 Confirm that all documentation pertaining to the modifications was included in the supporting documentation needed to properly train, inspect, maintain, and operate the ride or device per the design requirements.

9.2.6 Review conformance of the operational functionality as it complies with the operational specifications provided by the engineer, designer, or manufacture as per Practice F1193.

10. Operation Audit Program

10.1 When performing an operation audit, the auditor(s) shall:
