About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

FOREWORD	10
INTRODUCTION	13
1 General Scope	14
2 Normative references	15
3 Terms and definitions	15
Fuse system A: D type fuse system	17
1 General	17
1.1 Scope	17
2 Terms and definitions	17
3 Conditions for operation in service	17
4 Classification	17
5 Characteristics of fuses	17
5.2 Rated voltage	17
5.3.1 Rated current of the fuse-link	18
5.3.2 Rated current of the fuse-holder	18
5.3.3 Rated current of the gauge-piece	18
5.5 Rated power dissipation of a fuse-link and rated acceptable power dissipation of a fuse-holder	18
5.6 Limits of time-current characteristics	18
5.6.1 Time-current characteristics, time-current zones and overload curves	18
5.6.2 Conventional times and currents	19
5.6.3 Gates	19
5.7 Breaking range and breaking capacity	19
5.7.2 Rated breaking capacity	19
6 Markings	19
6.1 General	19
6.2 Marking of fuse-bases	20
6.3 Marking of the gauge-pieces	20
7 Standard conditions for construction	20
7.1 Mechanical design	20
7.1.2 Connections including terminals	20
7.1.3 Fuse-contacts	21
7.1.4 Construction of a gauge-piece	21
7.1.6 Construction of a fuse-carrier	21
7.1.7 Construction of a fuse-link	22
7.1.8 Non-interchangeability	22
7.1.9 Construction of a fuse-base	22
7.2 Insulating properties and suitability for isolation	23
7.3 Temperature rise, power dissipation of the fuse-link and acceptable power dissipation of the fuse-holder	24
7.7 I^2t characteristics	24
7.7.1 Pre-arcing I^2t values	24
7.7.2 Operating I^2t values	24
7.8 Overcurrent discrimination of "gG" fuse-links	24
7.9 Protection against electric shock	25

8	Tests	25
8.1.4	Arrangement of the fuse and dimensions	25
8.2	Verification of the insulating properties and of the suitability for isolation	26
8.2.1	Arrangement of the fuse-holder	26
8.2.6	Creepage distances, clearances and distances through sealing compound	27
8.3	Verification of temperature rise and power dissipation	27
8.3.1	Arrangement of the fuse	27
8.3.3	Measurement of the power dissipation of the fuse-link	27
8.3.5	Acceptability of test results	27
8.5.1	Arrangement of the fuse	28
8.5.2	Characteristics of the test circuit	28
8.5.5	Test method	29
8.5.8	Acceptability of test results	29
8.7.4	Verification of overcurrent discrimination	29
8.9	Verification of resistance to heat	30
8.9.1	Fuse-base	30
8.9.2	Fuse-carrier	31
8.10	Verification of non-deterioration of contacts	31
8.10.1	Arrangement of the fuse	31
8.10.2	Test method	31
8.10.3	Acceptability of test results	32
8.11	Mechanical and miscellaneous tests	33
8.11.1	Mechanical strength	33
Annex AA (informative)	Special test for cable overload protection (for fuse system A)	68
AA.1	Arrangement of the fuse	68
AA.2	Test method and acceptability of test results	68
Fuse system B – Cylindrical fuses (NF cylindrical fuse system)		
1	General	69
1.1	Scope	69
2	Terms and definitions	69
3	Conditions for operation in service	69
4	Classification	70
5	Characteristics of fuses	70
5.2	Rated voltage	70
5.3.1	Rated current of the fuse-link	70
5.3.2	Rated current of the fuse-holder	70
5.5	Rated power dissipation of a fuse-link and rated acceptable power dissipation of a fuse-holder	70
5.6.2	Conventional times and currents	70
5.6.3	Gates	71
5.7.2	Rated breaking capacity	71

INTERNATIONAL ELECTROTECHNICAL COMMISSION

LOW-VOLTAGE FUSES –

Part 3: Supplementary requirements for fuses for ~~use~~ operation **1 by unskilled persons (fuses mainly for household and similar applications) – Examples of standardized systems of fuses A to F**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This commented version (CMV) of the official standard IEC 60269-3:2024 edition 5.0 allows the user to identify the changes made to the previous IEC 60269-3:2010+AMD1:2013+AMD2:2019 CSV edition 4.2. Furthermore, comments from IEC SC 32B experts are provided to explain the reasons of the most relevant changes, or to clarify any part of the content.

A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text. Experts' comments are identified by a blue-background number. Mouse over a number to display a pop-up note with the comment.

This publication contains the CMV and the official standard. The full list of comments is available at the end of the CMV.

IEC 60269-3 has been prepared by subcommittee 32B: Low-voltage fuses, of IEC technical committee 32: Fuses. It is an International Standard.

This fifth edition cancels and replaces the fourth edition published in 2010, Amendment 1:2013 and Amendment 2:2019. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Introduction and general scope fully updated;
- b) Normative references updated and editorial changes;
- c) Terms “ordinary person”, “operation” and “non-interchangeability” defined;
- d) In System A: Parts defined for removal;
- e) In System A: Marking of fuse-bases added for direction of current flow;
- f) In System A: Clarifications added for connection;
- g) In System A: Clarification of construction of fuse-carrier and fuse-link;
- h) In System A: Clarification of voltage drop measurement.

The text of this International Standard is based on the following documents:

Draft	Report on voting
32B/745/FDIS	32B/754/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This part is to be used in conjunction with IEC 60269-1:2024, *Low-voltage fuses – Part 1: General requirements*. <https://standards.iec.org/standards/iec/2673a01b-946b-4e6f-90f1-4076ca2888e7/iec-60269-3-2024>

This Part 3 supplements or modifies the corresponding clauses or subclauses of Part 1.

Where no change is necessary, this Part 3 indicates that the relevant clause or subclause applies.

Tables and figures which are additional to those in Part 1 are numbered starting from 101. Additional annexes are numbered AA, BB, etc.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

IEC 60269 consists of the following parts, under the general title *Low-voltage fuses*:

Part 1: *General requirements*

Part 2: *Supplementary requirements for fuses for use by authorized persons (fuses mainly for industrial application) – Examples of standardized systems of fuses A to K*

Part 3: *Supplementary requirements for fuses for use by unskilled persons (fuses mainly for household or similar applications) – Examples of standardized systems of fuses A to F*

Part 4: *Supplementary requirements for fuse-links for the protection of semiconductor devices*

Part 5: *Guidance for the application of low-voltage fuses*

A list of all parts of the IEC 60269 series, under the general title, *Low-voltage fuses*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.
