Reference number
IEC 61158-5:2003(E)

Publication numbering

As from 1 January 1997 all IEC publications are issued with a designation in the 60000 series. For example, IEC 34-1 is now referred to as IEC 60034-1.

Consolidated editions

The IEC is now publishing consolidated versions of its publications. For example, edition numbers 1.0, 1.1 and 1.2 refer, respectively, to the base publication, the base publication incorporating amendment 1 and the base publication incorporating amendments 1 and 2.

Further information on IEC publications

The technical content of IEC publications is kept under constant review by the IEC, thus ensuring that the content reflects current technology. Information relating to this publication, including its validity, is available in the IEC Catalogue of publications (see below) in addition to new editions, amendments and corrigenda. Information on the subjects under consideration and work in progress undertaken by the technical committee which has prepared this publication, as well as the list of publications issued, is also available from the following:

- **IEC Web Site (www.iec.ch)**

- **Catalogue of IEC publications**

  The on-line catalogue on the IEC web site (http://www.iec.ch/searchpub/cur_fut.htm) enables you to search by a variety of criteria including text searches, technical committees and date of publication. On-line information is also available on recently issued publications, withdrawn and replaced publications, as well as corrigenda.

- **IEC Just Published**

  This summary of recently issued publications (http://www.iec.ch/online_news/justpub/jp_entry.htm) is also available by email. Please contact the Customer Service Centre (see below) for further information.

- **Customer Service Centre**

  If you have any questions regarding this publication or need further assistance, please contact the Customer Service Centre:

FOREWORD 24

0 Introduction 26
0.1 General 26
0.2 Nomenclature for references within this standard 26

1 Scope 27

2 Normative references 27

3 Terms and definitions 28
3.1 ISO/IEC 7498-1 terms 28
3.2 ISO/IEC 8822 terms 29
3.3 ISO/IEC 9545 terms 29
3.4 ISO/IEC 8824 terms 29
3.5 Fieldbus Data Link Layer terms 29
3.6 Fieldbus Application Layer specific definitions 30
3.7 Abbreviations and symbols 41
3.8 Conventions 42

4 Concepts 45
4.1 Overview 45
4.2 Architectural relationships 46
4.3 Fieldbus Application Layer structure 48
4.4 Fieldbus Application Layer naming and addressing 60
4.5 Architecture summary 60
4.6 FAL service procedures 61
4.7 Common FAL attributes 62
4.8 Common FAL service parameters 62
4.9 APDU size 63

5 Data type ASE 63
5.1 General 63
5.2 Formal definition of data type objects 66
5.3 FAL defined data types 67
5.4 Data type ASE service specification 102

6 Type 1 communication model specification 102
6.1 Concepts 102
6.2 ASEs 102
6.3 ARs 246
6.4 Summary of FAL classes 270
6.5 Permitted FAL services by AREP role 271

7 Type 2 communication model specification 273
7.1 Concepts 273
7.2 ASEs 281
7.3 AR 346
7.4 Summary of FAL classes 382
7.5 Permitted FAL services by AR type 383

8 Type 3 communication model specification 383

8.1 DP concepts 383
8.2 ASEs 401
8.3 Summary of AL classes 734
8.4 Permitted AL services by AREP role 735
8.5 Conformance classes 739
8.6 Application characteristics 739

9 Type 4 communication model specification 740
9.1 Concepts 740
9.2 Variable ASE 747
9.3 Application relationship ASE 766

10 Type 5 communication model specification 772
10.1 Concepts 772
10.2 ASEs 793
10.3 FDA sessions 828
10.4 Summary of FAL Type 9 and Type 5 classes 837
10.5 Permitted FAL Type 9 and Type 5 services by AREP role 838

11 Type 6 communication model specification 840
11.1 Application relationship (AR) and Application relationship endpoint (AREP) characteristics 840
11.2 Relationship of Type 6 to Type 1 842
11.3 Permitted services by AREP role 846

12 Type 7 communication model specification 848
12.1 Concepts 848
12.2 ASEs 864
12.3 ARs 1033

13 Type 8 communication model specification 1053
13.1 Concepts 1053
13.2 ASEs 1055
13.3 Application relationships 1070
13.4 Permitted FAL services by AREP role 1071

14 Type 9 communication model specification 1072
14.1 Concepts 1072
14.2 Common parameters 1072
14.3 ASEs 1073
14.4 ARs 1163
14.5 Summary of classes 1166
14.6 Permitted services by AREP role 1166

15 Type 10 communication model specification 1168
15.1 Type 10 Concepts 1168
15.2 ASE Data Types 1174
15.3 ASEs 1175
15.4 ARs 1289
15.5 Summary of FAL classes 1292
15.6 Summary of FAL services 1292
