PSIST ETS 300 287:1996

Foreword

This European Telecommunication Standard (ETS) has been produced by the Signalling Protocols and Switching (SPS) Technical Committee of the European Telecommunications Standards Institute (ETSI).

This ETS details exceptions and clarifications to ITU-T Recommendations Q.771 to Q.775 (1993) defining the Transaction Capabilities (TC) of the Transaction Capabilities Application Part (TCAP) for inter-network dialogues on services such as the: European Digital Cellular Telecommunications System, Global System for Mobile communications (GSM); Integrated Services Digital Network (ISDN); and Intelligent Network (IN).

NOTE: The referenced ITU-T Recommendations were adopted in March 1993 but have not been published prior to the publication of this ETS (the publication by ITU-T is scheduled for December 1993). The relevant Study Group XI reports (COM XI-R 198 to COM XI-R 200) of the March 1992 meeting, which contain the final drafts of the referenced material, can be obtained from:
