About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**BOXES AND ENCLOSURES FOR ELECTRICAL ACCESSORIES FOR
HOUSEHOLD AND SIMILAR FIXED ELECTRICAL INSTALLATIONS –****Part 21: Particular requirements for boxes and
enclosures with provision for suspension means**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This redline version of the official IEC Standard allows the user to identify the changes made to the previous edition IEC 60670-21:2004+AMD1:2016 CSV. A vertical bar appears in the margin wherever a change has been made. Additions are in green text, deletions are in strikethrough red text.

IEC 60670-21 has been prepared by subcommittee 23B: Plugs, socket-outlets and switches, of IEC technical committee 23: Electrical accessories. It is an International Standard.

This second edition cancels and replaces the first edition published in 2004 and Amendment 1:2016. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Complete revision of the tests and requirements of the suspension means.

The text of this International Standard is based on the following documents:

Draft	Report on voting
23B/1534/FDIS	23B/1552/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 60670 series, published under the general title *Boxes and enclosures for electrical accessories for household and similar fixed installations*, can be found on the IEC website.

This document is to be used in conjunction with IEC 60670-1:2024. It lists the changes necessary to convert that standard into a specific standard for housing protective devices and other power dissipating electrical equipment.

Where this document states "addition", "modification" or "replacement", the relevant requirement, test specifications or explanatory matter in IEC 60670-1:2024 shall be adapted accordingly.

Clauses and subclauses, notes, figures or tables which are additional to those in IEC 60670-1:2024 are numbered starting from 101.

Additional annexes to IEC 60670-1:2024 are numbered AA, BB, etc.

In this publication the following print types are used:

- requirements proper: in roman type.
- *test specifications: in italic type.*
- notes: in smaller roman type.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

BOXES AND ENCLOSURES FOR ELECTRICAL ACCESSORIES FOR HOUSEHOLD AND SIMILAR FIXED ELECTRICAL INSTALLATIONS –

Part 21: Particular requirements for boxes and enclosures with provision for suspension means

1 Scope

Clause 1 of IEC 60670-1:2024 is applicable with the following modification:

Addition after the ~~fourth~~ third paragraph:

This document applies to boxes and enclosures for ceiling and wall mounting with provision for suspension means.

2 Normative references

Clause 2 of IEC 60670-1:2024 is applicable.

3 Terms and definitions

Clause 3 of IEC 60670-1:2024 is applicable with the following modification:

Addition:

3.101

box with provision for suspension means

box intended to be used for suspending and supporting mechanical loads and which accepts the suspension means

3.102

suspension means

means comprising any necessary components (hooks, brackets, etc.) which may be delivered with the box and enclosure or supplied separately (~~see Figure 101~~)

Note 1 to entry: Examples of suspension means are shown in Figure 101.

IEC 60670-21:2024
<https://standards.iteh.ai/catalog/standards/iec/60670-21-2024> **Figure 101 – Examples of suspension means** <https://standards.iteh.ai/catalog/standards/iec/60670-21-2024>

4 General requirements

Clause 4 of IEC 60670-1:2024 is applicable.

5 General **notes** remarks on tests

Clause 5 of IEC 60670-1:2024 is applicable.

6 Ratings

Void.

7 Classification

Clause 7 of IEC 60670-1:2024 is applicable with the following modification:

Addition to Table 1:

7.101 The provision for suspension means ^{aa^b}	7.101.1 For suspension of supporting a luminaire.
	7.101.2 For suspension of supporting a ceiling fan.
^{aa^b} The suspension means may be provided with the box or not.	

8 Marking

Clause 8 of IEC 60670-1:2024 is applicable with the following modification:

8.1 General

~~Addition after item j):~~

~~k) the mass in kg, if the test force declared by the manufacturer is greater than 250 N for boxes and enclosures classified according to 7.101.1.~~

~~NOTE 1 In the following countries boxes for luminaire support are marked "For luminaire support". Where boxes are intended to support a mass greater than 15,8 kg, the mass is to be marked: US.~~

~~NOTE 2 In Denmark shall the marking in kg reflect a safety factor of 5 times.~~

Addition after item k):

l) for boxes and enclosures classified according to 7.101.1, the maximum supported mass in kilograms declared by the manufacturer.

NOTE 101 In the following countries boxes for luminaire support are marked "For luminaire support". Where boxes are intended to support a mass greater than 15,8 kg, the mass is to be marked: US.

NOTE 102 In the following country the marking in kilograms shall reflect a safety factor of 5 times: DK.

9 Dimensions

Clause 9 of IEC 60670-1:2024 is applicable.

10 Protection against electric shock

Clause 10 of IEC 60670-1:2024 is applicable with the following modification:

Addition:

Conductive parts of suspension means inside the box or enclosure shall be:

- protected by a layer of insulating material which complies with the tests for insulating linings, or
- located such that it will not come in contact with electrical conductors or live parts, or
- reliably connected to the earthing means complying with requirements of 11.1 when fitted as for normal use.

11 Provision for earthing

Clause 11 of IEC 60670-1:2024 is applicable.

12 Construction

Clause 12 of IEC 60670-1:2024 is applicable with the following modification:

Addition:

12.101 Provision for suspension means

Unless otherwise declared by the manufacturer, screws for fixing accessories and/or covers are not considered as provision for suspension means.

12.102 Minimum mass to be supported by suspension means

Boxes and enclosures with provision for suspension means shall be able to support a mass of at least 5 kg.

NOTE For fixing means of a luminaire, a minimum supported mass of 5 kg is given in IEC 60364-5-55:2011, 559.5.2.

Compliance is checked by the tests of 15.101.

13 Resistance to ageing, protection against ingress of solid objects and against harmful ingress of water

Clause 13 of IEC 60670-1:2024 is applicable.

14 Insulation resistance and electric strength

Clause 14 of IEC 60670-1:2024 is applicable.

15 Mechanical strength

Clause 15 of IEC 60670-1:2024 is applicable with the following modification:

Addition:

~~1.101~~15.101 Boxes and enclosures with provision for suspension means

15.101.1 Boxes and enclosures with provision for suspension means shall withstand the thermal and mechanical stresses occurring in normal use.

Boxes and enclosures with provision for suspension means according to:

- 7.101.1 shall comply with the requirements of 15.101.~~12~~ and 15.101.~~23~~;
- 7.101.2 shall comply with the requirements of 15.101.~~34~~.

Examples of boxes and enclosures with provision for suspension means are shown in Figure 102.

a) Boxes and enclosures which are intended for suspension of loads from a ceiling.

b) Boxes and enclosures which are intended for suspension of loads from a wall

c) Boxes and enclosures which are intended to support a ceiling fan

Key

- 1 ceiling
- 2 wall
- 3 box
- 4 suspension mean
- 5 ceiling fan

Figure 102 – Examples of boxes and enclosures with provision for suspension means

15.101.42 Boxes and enclosures which are intended for suspension of loads from a ceiling shall withstand a test force of 250 N or a higher test force ~~Y~~ X corresponding to five times the maximum supported mass in kilograms declared by the manufacturer.

The test force F in newtons is the result of the maximum supported mass in kilograms multiplied by the gravity and multiplied by a safety factor of 5; this value is rounded up to the next decimal, for example: $5 \text{ kg} \times 9,81 \text{ m/s}^2 \times 5 \approx 245$, gives a test force of 250 N.

NOTE 4 101 In the following countries there is no requirement for all boxes and enclosures for suspension means to withstand 250 N and no requirement for non-metallic boxes and enclosures to withstand 90 °C: UK.

NOTE 2 102 In the following country, the test force Y shall correspond to 5 times the marking in kilograms as required in item k) of 8.1: DK

NOTE 3 103 In Spain, there are no requirements for all boxes and enclosures for suspension means to withstand 90 °C.
