EUROPEAN STANDARD NORME EUROPÉENNE EUROPÄISCHE NORM

EN 12243

October 1999

ICS 61.040

English version

Touch and close fasteners - Determination of dimensional change in washing and drying and dry cleaning

Fermetures auto-agrippantes - Détermination du changement dimensionnel lors du lavage et du séchage ou lors du nettoyage à sec

Haftverschlüsse - Bestimmung der Maßhänderung beim Waschen und Trocknen und Chemischreinigen

This European Standard was approved by CEN on 5 September 1999.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

(standards.iteh.ai)

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EUROPEAN COMMITTEE FOR STANDARDIZATION COMITÉ EUROPÉEN DE NORMALISATION EUROPÄISCHES KOMITEE FÜR NORMUNG

Central Secretariat: rue de Stassart, 36 B-1050 Brussels

Page 2 EN 12243:1999

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 248 "Textiles and textile products", the secretariat of which is held by BSL

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2000, and conflicting national standards shall be withdrawn at the latest by April 2000.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

It is one of a series of standards for touch and close fasteners. Other standards in the series are as follows:

EN 1414 Touch and close fasteners - Cycling procedures for subsequent testing.

EN 1415 Touch and close fasteners - Behaviour of slit selvedges.

iTeh STANDARD PREVIEW

EN 1416 Touch and close fasteners - Determination of curvature. (standards.iteh.ai)

EN 12240 Touch and close fasteners - Determination of the overall effective width of tapes and the effective width of a closure. 12243:2000

EN 12241:1999 Touch and close fasteners - Method for closure prior to washing or dry cleaning.

EN 12242:1999 Touch and close fasteners - Determination of peel strength.

EN XXXX ¹⁾ Touch and close fasteners - Determination of longitudinal shear strength.

EN XXXX ¹⁾ Touch and close fasteners - Determination of vertical tension strength.

EN XXXX 1) Touch and close fasteners - Resistance to fraying of tapes after cutting.

EN XXXX ¹⁾ Touch and close fasteners - Specifications.

¹⁾ In preparation

1 Scope

This European Standard specifies a method for determining the dimensional change in washing and drying or dry cleaning of touch and close fastener tapes.

2 Normative References

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

EN 20139 Textiles - Standard atmospheres for conditioning and

testing (ISO 139:1973).

EN 12241:1999 Touch and close fasteners - Method of closure prior to

washing and drying or dry-cleaning.

EN ISO 3175 Ch S Textiles - Evaluation of stability to machine drycleaning (ISO 3175:1995)

3 Principle

The percentage change is determined in the length of touch and close fastener tapes after washing and drying or dry cleaning.

4 Apparatus

- **4.1 Rule** marked in millimetres and longer than the greatest dimension being measured.
- **4.2 Equipment for marking precise reference points** (e.g. indelible ink, threads, staples).

5 Test specimens

Take three male and three female tapes each of a minimum length 500 mm.

Page 4 EN 12243:1999

6 Conditioning

Condition the test specimens for a minimum of 24h in accordance with the standard temperate atmosphere for testing as specified in EN 20139.

7 Procedure

7.1 Marking

Place each test specimen flat on the measuring surface and make a pair of marks on it at least 250mm apart in the length direction. Do not mark within 25mm of each end.

7.2 Measuring original length

After the test specimens have been conditioned in accordance with clause 6, determine the original length as follows.

Place the test specimens with the pile facing down on a flat surface and remove any wrinkles without stretching the test specimen. Place the rule on the test specimen and record the distance between the pair of marks to an accuracy of at least 1mm.

iTeh STANDARD PREVIEW

7.3 Washing and drying

(standards.iteh.ai)

Close the tapes in accordance with EN 12241:1999, wash and dry them for the specified number of times in accordance with the procedure specified in EN 26330. https://standards.iteh.ai/catalog/standards/sist/a0fee87c-9830-4f70-8579-

435a14a309a7/sist-en-12243-2000

7.4 Dry cleaning

Close the tapes in accordance with EN 12241 and dry clean the closed specimens for the specified number of times in accordance with the procedure specified in EN ISO 3175.

7.5 Measuring final length

Open the test specimens, re-condition and measure the final length as follows:

Place the test specimens with the pile facing down on a flat surface and remove any wrinkles without stretching the test specimen. Place the rule on the test specimen and record the distance between the pair of marks to an accuracy of at least 1mm.

8 Calculation and expression of results

Calculate, for each test specimen, the change in dimension for the length direction (in percent) as follows:

Calculate the mean dimensional change for the length direction and express it to the nearest 0,5%. Indicate if the dimension has decreased (shrinkage) by means of a minus sign (-) or increased (extension) by means of a plus sign (+).

9 Test report

Report the following information:

- a) number and date of this European Standard;
- b) date of the test;
- c) identification of the touch and close fastener tape;
- d) the result obtained and expressed as in clause 8; FVFW
- e) whether the fastener stayed closed or opened during the washing procedure;
- f) any deviation from this standard and any incident likely to have affected the results.
