IEC 60079-11:2023 (Edition 7.0)

Explosive atmospheres – Part 11: Equipment protection by intrinsic safety “i”

Background

5.4.1 of IEC 60079-11:2023 states, in part:

All surfaces of intrinsically safe apparatus that come into contact with explosive atmospheres shall be assessed to ensure that, under the conditions specified in 5.2, the apparatus complies with the maximum surface temperature requirements of IEC 60079-0.

Question

Is "all surfaces of intrinsically safe apparatus that come into contact with explosive atmospheres", as referenced in 5.4.1 for thermal ignition compliance, intended to mean the junction temperature of a sealed semiconductor?
