### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

#### Useful links:

IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications. <https://standards.iteh.ai/catalog/standards/sist/b5abf857-58fb-4e71-adb7-01338-4-1-003>

IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

### A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Liens utiles:

Recherche de publications CEI - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

La recherche avancée vous permet de trouver des publications CEI en utilisant différents critères (numéro de référence, texte, comité d'études,...).

Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Just Published CEI - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications de la CEI. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne au monde de termes électriques et électroniques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (VEI) en ligne.

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**WAVEGUIDE TYPE DIELECTRIC RESONATORS –****Part 4-1: Blank detail specification****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.  
IEC 61338-4-1:2005  
http://www.iec.ch/61338-4-1.htm  
5ab1857-58fb-4e71-abb7-932761492ea8/iec-61338-4-1-2005
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61338-4-1 has been prepared by IEC technical committee 49: Piezoelectric and dielectric devices for frequency control and selection.

This bilingual version (2013-05) corresponds to the monolingual English version, published in 2005-03.

The text of this standard is based on the following documents:

FDIS	Report on voting
49/703/FDIS	49/717/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

The French version of this standard has not been voted upon.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2

IEC 61338 consists of the following parts, under the general title *Waveguide type dielectric resonators*:

- Part 1: Generic specification
- Part 1-3: General information and test conditions – Measurement method of complex relative permittivity for dielectric resonator materials at microwave frequency
- Part 2: Guidelines for oscillator and filter applications
- Part 4: Sectional specification
- Part 4-1: Blank detail specification (this publication)

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

[IEC 61338-4-1:2005](#)

<https://standards.iteh.ai/catalog/standards/sist/b5abf857-58fb-4e71-adb7-932761492ea8/iec-61338-4-1-2005>

## INTRODUCTION

### Blank detail specification

A blank detail specification is a supplementary document to the sectional specification and contains requirements for the minimum content of detail specifications.

The front page layout shown on the next page is applicable to detail specifications for standard catalogue items only.

For custom-built waveguide type dielectric resonators where the detail specification is not intended for publication, a suggested layout for the front page is given in Annex A. This is not mandatory, but it is recommended that the layout should be followed whenever possible.

### Identification of the detail specification and of the component

The numbers between square brackets on the front page of the detail specification correspond to the following information which should be given in the appropriate boxes.

- (1) The name of the National Standards Organization under whose authority the detail specification is published and, if applicable, the organization from whom the detail specification is available.
- (2) The IEC and National Standards number allotted to the detail specification, date of issue and any further information required by the national system.
- (3) The number and issue number of the IEC generic or sectional specification as relevant; also national reference if different.
- (4) If different from the IEC number, the national number of the detail specification, date of issue and any further information required by the national system, together with any amendment numbers. <https://standards.iec.ch/catalog/standards/sr/bstdi837-581b-4e77-aub/> 932761492ea8/iec-61338-4-1-2005
- (5) A brief description of the waveguide type dielectric resonator or range of resonators (For example, nominal frequency and type of resonator).

For (5) the text to be given in the detail specification should be suitable for any entry in IEC QC 001005 and IEC QC 001004.

- (6) An outline drawing with main dimensions which are of importance for interchangeability and/or reference to the appropriate national or international document for outlines. Alternatively, this drawing may be given in an annex to the detail specification.

## 1 Ratings (see 2.3 of IEC 61338-1 for preferred ratings)

- Rating temperature range
- Climatic category
- Mechanical test severities

Information about manufacturers who have components qualified to this detail specification is available in the current QC 001005.

## 2 Characteristics (see 2.3 of IEC 61338-1)

- Nominal frequency
- Reference temperature
- Frequency tolerance (s) (if applicable)
- Insertion attenuation

In addition other characteristics may be stated.

## 3 Related documents

## 4 Marking

[IEC 61338-4-1:2005](#)

<https://standards.iteh.ai/catalog/standards/sist/b5abf857-58fb-4e71-adb7-932761492ea8/iec-61338-4-1-2005>

The marking of the resonator and the primary package shall be in accordance with the requirements of 2.4 of IEC 61338-1. Full details shall be given in the detail specification.

## 5 Ordering information

The following ordering information shall be specified:

- 1) quantity;
- 2) IECQ or customer detail specification number, issue number and date;
- 3) nominal frequency expressed in MHz or GHz;
- 4) product code;
- 5) full description of any additional requirements.

## 6 Certified test records

The detail specification shall state whether certified test records are required/not required in accordance with 3.12 of IEC 61338-1.

## 7 Additional information (not for inspection purposes)

The detail specification may include information (which is not normally required to be verified by the inspection procedure) such as circuit diagrams, curves, drawings and notes for the clarification of the detail specification.

## 8 Inspection requirements

Clause numbers of tests and performance refer to IEC 61338-1 and are given in Table 1.

In this table

D = destructive

ND = non-destructive

The manufacturer and their customers shall ensure that any quality aspects of the resonators to be supplied that are not covered by the maintenance of the capability approval programme are included in the detail specification.

The blank detail specification does not include any periodic tests as these are controlled by the CQC testing under the maintenance of the capability approval as defined in 3.6.2 and 3.6.2.1 of IEC 61338-1.
