Descriptors : coffee, sampling equipment, characteristics.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6666 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in February 1982.

iTeh STANDARD PREVIEW
(standards.iteh.ai)

It has been approved by the member bodies of the following countries :

Australia	Iran	Romania
Brazil	Iraq	South Africa, Rep. of
Canada	Israel	Sri Lanka
Czechoslovakia	Kenya	Tanzania
Egypt, Arab Rep. of	Korea, Rep. of	Turkey
Ethiopia	Malaysia	United Kingdom
France	Mexico	USA
Germany, F. R.	Netherlands	USSR
Hungary	New Zealand	Venezuela
India	Portugal

No member body expressed disapproval of the document.

Coffee triers

iTeh STANDARD PREVIEW (standards.iteh.ai)

1 Scope and field of application

This International Standard specifies the characteristics of a coffee trier suitable for taking samples through the sides of closed bags and which is particularly suitable for the sampling of green coffee in accordance with ISO 4072.

b) does not present a risk of contamination of the sample.

ISO 6666:1983

NOTE 1 Stainless steel is suitable in most conditions.

ISO 6666-1983

2 Reference

ISO 4072, *Green coffee in bags — Sampling*.

3 Characteristics

3.1 Material

The coffee trier shall be made of a metal which

- a) is corrosion resistant in the atmosphere in which sampling will be undertaken; and

3.2 Fabrication

The coffee trier shall comply with the following requirements and shall have the dimensions shown in the figure.

The trier shall be circular in its transverse direction and shall be conical in form. The diameter D is not specified and will depend on the value of L .

In addition, so that the trier will not tear the bag during sampling, the metal parts (with the exception of the pointed end) shall be smooth and any burrs shall have been removed, and the slotted part shall be less than a half circle (of the transverse section).

Dimensions in millimetres
