## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 1 to International Standard ISO 6940:1984 was prepared by Technical Committee ISO/TC 38, *Textiles*, Sub-Committee SC 19, *Burning behaviour of textiles and textile products*.

# Textile fabrics – Burning behaviour – Determination of ease of ignition of vertically oriented specimens

## AMENDMENT 1

Page 2, 8.3

Replace 8.3 by the following (English only):

If testing is not being performed immediately, place the specimens in sealed containers until testing begins. Begin testing each specimen within 2 min of removing it from the conditioning atmosphere or sealed container.

Page 3, clause 10

Replace item p) by the following:

"minimum ignition time of the textile material, which is the lowest time reported in 10 n)."

Page 2, 8.5

Replace 8.5 by the following:

For all fabrics, position the burner as described in 8.5.1. Where fabrics intended for curtains and drapes fail to ignite with the burner in this position, the burner position described in 8.5.2 is used if required by the relevant fabric specification.

Replace the first paragraph by the following:

"The orifice diameter of the gas jet [see figure 3 b)] shall be  $0,19 \pm 0,02$  mm."

Page 7, figure 3

Replace the figure with the amended figure 3.

Dimensions in millimeters

Figure 3 – Gas burner
