This amendment A1 modifies the European Standard EN 50136-1-1:1998; it was approved by CENELEC on 2001-01-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this amendment the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This amendment to the European Standard EN 50136-1-1 was prepared by the CENELEC Technical Committee 79 : Alarm systems.

The text of the draft was submitted to the Unique Acceptance Procedure and was approved by CENELEC as amendment A1 to EN 50136-1-1:1998 on 2001-01-01.

The following dates were fixed:

- latest date by which the amendment has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2001-12-01
- latest date by which the national standards conflicting with the amendment have to be withdrawn (dow) 2001-12-01

Introduction

This amendment describes a missing requirement which has been identified in EN 50136-1-1 resulting, if not implemented, in the risk to loose messages at the receiving centre transceiver level.

It is this recommended to implement the requirements covered in this amendment even for products which have been already developed on the sole basis of the main standard.

The following clauses replace or amend those of EN 50136-1-1:1998.

4 Definitions

Add :

4.29

secured message

a message which cannot be lost (e.g. in the case of power failure) and which can be retrieved

6 System requirements

Add the following subclause:

6.6 Secured message in the alarm transmission system

To prevent the loss of messages, messages received by the alarm receiving centre transceiver shall be secured (e.g. by the receiving centre transceiver, or by the annunciation equipment).

[SIST EN 50136-1-1:1999/A1:2001](https://standards.iteh.ai/SIST/EN-50136-1-1:1999/A1:2001)

The manufacturer shall state in its documentation whether or not the receiving centre transceiver is to be used in conjunction with an annunciation equipment to comply with this requirement.
