About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Liens utiles:

Recherche de publications CEI - www.iec.ch/searchpub

La recherche avancée vous permet de trouver des publications CEI en utilisant différents critères (numéro de référence, texte, comité d'études,...).

Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Just Published CEI - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications de la CEI. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (VEI) en ligne.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: csc@iec.ch.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**MULTIMEDIA HOME SERVER SYSTEMS –
DIGITAL RIGHTS PERMISSION CODE**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical Content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this document may involve the use of patent.

IEC takes no position concerning the evidence, validity and scope of these patent rights.

The holder of this patent right has assured IEC that it is willing to negotiate licences under reasonable and non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statement of the holders of these patent rights are registered with IEC. Information may be obtained from:

DENTSU INC.
Media Marketing Division
1-8-1, Higashi-shimbashi, Minato-ku, Tokyo 105-7001
JAPAN

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights other than those identified above. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC 62227 edition 1.1 contains the first edition (2008) [documents 100/1287/CDV and 100/1374/RVC] and its amendment 1 (2012) [documents 100/1953/CDV and 100/2011/RVC].

A vertical line in the margin shows where the base publication has been modified by amendment 1. Additions and deletions are displayed in red, with deletions being struck through.

International Standard IEC 62227 has been prepared by technical area 8: Multimedia home server systems, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

The French version of this standard has not been voted upon.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of the base publication and its amendments will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION to Amendment 1

The revision of IEC 62227:2008 has become necessary to specify the new additional definition of the descriptor. This Amendment 1 contains the following significant technical changes with respect to the base publication IEC 62227:

- new definition of content type is added;
- new element definition of permission purpose classification is added.

In addition, this amendment will provide editorial changes that will improve the clarity and the understanding of the text.

INTRODUCTION

The common ID system is used to systematically identify every entity, device and content that would be involved in the course of digitally distributing content. The permission code can express various sets of permission information and permission conditions necessary for content transmission in a remarkably short code form. The permission code is not defined from a technical perspective, but rather on the basis of permission information that rights holders actually employ in the field, even if the permission code is recognized for its technical effectiveness with respect to digital distribution of content.

MULTIMEDIA HOME SERVER SYSTEMS – DIGITAL RIGHTS PERMISSION CODE

1 Scope

This International Standard defines the permission code, a set of permission related information in short code form, primarily intended for home server systems. The permission code is comprised of a common ID system (content ID, issuer ID, receiver ID, device ID, etc.) and a narrowly-defined permission code.

The common ID system is used to systematically identify every entity, device and content that would be involved in the course of digitally distributing content. The permission code can express various sets of permission information and permission conditions necessary for content transmission in a remarkably short code form. The permission code is not defined from a technical perspective, but rather on the basis of permission information that rights holders actually employ in the field. Even after, the permission code is recognized for its technical effectiveness with respect to digital distribution of content.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3166-1:2006, *Codes for the representation of names of countries and their subdivisions – Part 1: Country codes*

3 Terms, definitions and abbreviations

3.1 Terms and definitions

For the purposes of this document the following terms and definitions apply.

3.1.1

permission

act by a certain issuing entity to authorize use for content to a certain receiving entity under a certain set of permission classifications and usage conditions

NOTE The issuing entity and/or the receiving entity may not only be human, but also a device, storage medium, organization, domain or another entity.

3.1.2

permission management server

a server that issues a permission code based on a permission agreement

NOTE The server is equipped with a

- license server,
- a function that forwards the permission code to a distribution server, and
- a function that receives a content usage report from the license server and the distribution server.

3.1.3

compliant license server

a server that issues a license based on a permission code

NOTE The server is equipped with

- a) a server system (including home server),
- b) a function that generates necessary keys for content access based on a permission code, and
- c) a function that forwards the license to a client device. A license contains information about the content's permitted scope of use based on a permission code.

3.1.4

license server

a compliant license server (unless otherwise specified, a compliant license server is simply referred to as a license server)

3.1.5

compliant license

license issued by a compliant license server

3.1.6

license

a compliant license (unless otherwise specified, a compliant license is simply referred to as a license)

3.1.7

home server

client device that serves as a gateway for a home domain

3.1.8

client device

device that becomes the actor of content access and is compliant with permission code terms

3.1.9

compliant device

device that possesses the function to control content access based upon a compliant license

3.1.10

domain

set of actors to which a common set of rules apply in the context of content management

3.1.11

home domain

home-based content usage environment, permitted by rights holders

3.1.12

legacy device

non-compliant device that does not control content access based upon compliant licenses

3.1.13

disclosure type

permission classification that specifies the disclosure class for the permission, including open permission and closed permission

3.1.14

open permission

permission under disclosure type that is received according to previously arranged default conditions

3.1.15

closed permission

permission under disclosure type that is received through a separate, individually negotiated contract

3.1.16

application type

permission classification that specifies the application class for the permission, including ad hoc permission and blanket permission

3.1.17

ad hoc permission

an application type that grants permissions on a per usage unit basis

3.1.18

blanket permission

an application type that grants permissions in aggregate for use within a given time period

NOTE Time periods may include monthly, annual or other time increments.

3.1.19

billing type

permission classification that specifies the billing class for the permission, including ad hoc billing and blanket billing

3.1.20

ad hoc billing

billing type that bills on a per content basis

3.1.21

blanket billing

billing type that bills on monthly, annual or other time-based increments

3.1.22

usage purpose type

permission classification that specifies the usage purpose class for the permission, including commercial, public, not-for-profit, promotion

3.1.23

commercial permission

usage purpose type that permits use for commercial purposes

3.1.24

public permission

usage purpose type that permits use for public purposes

3.1.25

not-for-profit permission

usage purpose type that permits use for non-profit purposes

3.1.26

promotion permission

usage purpose type that permits use for promotional purposes

3.1.27

charge model type

permission classification that specifies the charge model class for the permission, including pay and free, etc.

3.1.28

pay permission

charge model type that permits use for charge
