## **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

## **iTeh STANDARD PREVIEW**

International Standard ISO 7435 was developed by Technical Committee ISO/TC 2,  
*Fasteners*, and was circulated to the member bodies in December 1981.

### iTeh STANDARD PREVIEW (standards.iteh.ai)

#### 1 Scope and field of application

[ISO 7435:1983](#)

This International Standard specifies the characteristics of slotted set screws with long dog point and thread sizes from M 1,6 to M 12 inclusive and product grade A.

If other specifications are required, it is recommended that they should be selected from existing International Standards, for example ISO 261, ISO 888, ISO 898, ISO 965, ISO 3506, ISO 4759/1.

## 3 Dimensions

\* The  $120^\circ$  angle is mandatory for short length screws above the dotted stepped line.

\*\* The  $45^\circ$  angle applies only to the portion of the point below the root diameter of the thread.
