About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in 14 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

More than 55 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 14 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

Plus de 55 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60371-3-1 has been prepared by IEC technical committee 15: Insulating materials.

This bilingual version (2014-05) corresponds to the English version, published in 2006-06.

This third edition of IEC 60371-3-1 replaces the second edition, published in 1984, and constitutes a technical revision.

The main changes with regard to the previous edition concern the modification of clause numbers to align with clause numbering in the latest edition of IEC 60371-2:2004.

The text of this standard is based on the following documents:

FDIS	Report on voting
15/307/FDIS	15/330/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

The French version of this standard has not been voted upon.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

iTeh STANDARD PREVIEW **(standards.iteh.ai)**

[IEC 60371-3-1:2006](#)

INTRODUCTION

This part of IEC 60371 forms part of a series which deals with insulating materials built up from mica splittings or mica paper, with or without reinforcement, and with mica paper in its pure state for use in electrical equipment.

IEC 60371 consists of three parts under the main title *Specification for insulating materials based on mica*:

Part 1: Definitions and general requirements

Part 2: Methods of test

Part 3: Specifications for individual materials

This standard contains one of the sheets comprising part 3, as follows:

Sheet 1: Commutator separators and materials

iTeh STANDARD PREVIEW
(standards.iteh.ai)

<https://standards.iteh.ai/catalog/standards/sist/711b5122-0038-403d-88c8-53c38352e025/iec-60371-3-1-2006>

SPECIFICATION FOR INSULATING MATERIALS BASED ON MICA –

Part 3: Specifications for individual materials – Sheet 1: Commutator separators and materials

1 Scope

This sheet of IEC 60371-3 applies to several types of rigid materials based on mica splittings or mica paper for commutator separators. These products shall be made from muscovite or phlogopite mica, built up from mica splittings or mica paper by the use of a suitable bonding medium. They are supplied in the following forms:

- sheets in the dimensions in which they are pressed or after trimming;
- strips cut from sheets;
- commutator separators having the shapes and dimensions and in the conditions ordered by the user.

The normal manufacturing thicknesses lie between 0,3 mm and 2 mm.

Materials which conform to this specification meet established levels of performance.

However, the selection of material by a user for a specific application should be based on the actual requirements necessary for adequate performance in that application and not based on this specification alone.

Safety warning:

<https://standards.iteh.ai/catalog/standards/sist/711b5122-0038-403d-88c8-53c38352e025/iec-60371-3-1-2006>

It is the responsibility of the user of the methods contained or referred to in this document to ensure that they are used in a safe manner.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60371-2:2004, *Specification for insulating materials based on mica – Part 2: Methods of test*

3 General requirements

The material as supplied shall be of uniform hardness, free from soft patches and foreign matter.

The bonding medium used shall be agreed between supplier and purchaser.

The materials, when tested in accordance with the methods given in IEC 60371-2, shall comply with the requirements of this publication.

4 Thickness

4.1 Definition of nominal thickness

The nominal thickness is that stated when ordering, being the thickness on delivery (before assembly of the commutator).

4.2 Measurements and tolerances

The tolerances with respect to the nominal thickness, in millimetres, are given in Tables 1 and 2.

4.2.1 Sheets, strips and separators having a surface area $\leq 10 \text{ cm}^2$

Specimen: as in 4.2.1 and 4.2.4 of IEC 60371-2. The thickness shall be measured with the apparatus given in 4.1.3 of that standard (diameter of measuring faces 6 mm to 8 mm, pressure: 7 MPa).

The thickness measurements shall be in accordance with 4.3 of IEC 60371-2.

Table 1 – Thickness tolerances for sheets, strips and separators having a surface $\leq 10 \text{ cm}^2$

Property	Mica splittings	Mica paper (normal tolerance)	Mica paper (close tolerance)
Tolerance of specimen	$\pm 0,03 \text{ mm}$	$\pm 0,03 \text{ mm}$	$\pm 0,02 \text{ mm}$
Difference between maximum and minimum values of thickness on same specimen	0,06 mm	0,06 mm	0,04 mm

IEC 60371-3-1:2006

<https://standards.iteh.ai/catalog/standards/sist/711b5122-0038-403d-88c8-53c38352e025/iec-60371-3-1-2006>

4.2.2 Separators having a surface area greater than 10 cm^2

4.2.2.1 Separators supplied individually

Specimen: as in 4.2.5 a) of IEC 60371-2.

The thickness measurement shall be in accordance with 4.3 of IEC 60371-2.

Table 2 – Thickness tolerances for separators having a surface area greater than 10 cm^2

Property	Mica splittings	Mica paper
Tolerance of specimen	$\pm 0,02 \text{ mm}$	$\pm 0,015 \text{ mm}$
Difference between maximum and minimum values of thickness on same specimen	0,04 mm	0,03 mm

4.2.2.2 Stack height of separators supplied in packeted stacks

The nominal height of the stack and the number of separators per stack should be stated when material is ordered. The stack height shall be measured in accordance with 4.1.4 of IEC 60371-2. With a pressure of 30 MPa the variation in height from the nominal shall be agreed upon between purchaser and supplier.

5 Dimensions, other than thickness

5.1 Sheets

The tolerance on the nominal length and on the nominal width on sheets trimmed to size is $\pm 5\%$.

NOTE Where sheets are not trimmed to size, tolerance on mass shall be agreed upon.

5.2 Strips

The tolerance on length is $\pm 5\%$ and the tolerance on the nominal width is $\pm 0,5$ mm.

5.3 Separators

The tolerances on overall dimensions are

- $\pm 0,3$ mm for separators with surface areas not exceeding 10 cm^2 ,
- $\pm 0,5$ mm for separators with a surface area over 10 cm^2 .

6 Detection of defects and conducting particles in sheets

As stated in Clause 19 of IEC 60371-2, until a method of detection of defects has been agreed, the type and number of defects shall be subject to contract.

7 Characteristics

Tables 3 and 4 give the specified values for the characteristics of products based on mica material for commutator separators, in whatever form they are delivered.

8 Form

Products based on mica or mica splittings for commutator separators are generally supplied:

- in sheets approximately 1 000 mm long and 500 mm to 1 000 mm wide;
- in strips approximately 1 000 mm long and not more than 200 mm wide;
- shaped commutator separators having a surface area up to 10 cm^2 are generally supplied in bulk (unless otherwise agreed between manufacturer and user);
- shaped commutator separators having surface area over 10 cm^2 are delivered either in bulk, in non-calibrated packets or in packeted stacks. The number of separators per packet, generally between 20 and 50, is subject to special agreement. Also, according to the type of material, intermediate layers may be used.

9 Marking

Packages shall be marked with the IEC publication reference and type of product (e.g. IEC 60371-3-1 Type P7), the manufacturer's identification, the nominal thickness and dimensions, and the number of pieces and/or weight in each package.

For products supplied in packets, the following additional indications shall be given on each packet:

- non-calibrated packets: the number of separators per packet;

- calibrated packets: the number of separators per packet and the total height of the stack (after subtracting the thicknesses of the intermediate layers).
