

INTERNATIONAL STANDARD

IEC 60371-3-4

1992

AMENDMENT 1
2006-09

Amendment 1

**Specification for insulating materials
based on mica –**

**Part 3:
Specifications for individual materials –
Sheet 4: Polyester film-backed mica paper
with a B-stage epoxy resin binder**

FOREWORD

This amendment has been prepared by IEC technical committee 15: Standards on specifications for electrical insulating materials.

The text of this amendment is based on the following documents:

FDIS	Report on voting
15/332/FDIS	15/347/RVD

Full information on the voting for the approval of this amendment can be found in the report on voting indicated in the above table.

The committee has decided that the contents of this amendment and the base publication will remain unchanged until the maintenance result date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

INTRODUCTION

[IEC 60371-3-4:1992/AMD1:2006](https://standards.iteh.ai/catalog/standards/iec/1e69bc1e-dbd0-44a7-ba65-e31c8978471c/iec-60371-3-4-1992-amd1-2006)

Replace the existing text by the following new text:

This International Standard is one of a series which deals with insulating materials for use in electrical equipment built up from mica splittings or mica paper, with or without reinforcement, and with mica paper in its pure state.

The series consists of the following three parts:

- Part 1: Definitions and general requirements (IEC 60371-1)
- Part 2: Methods of test (IEC 60371-2)
- Part 3: Specifications for individual materials (IEC 60371-3)

This standard contains one of the sheets comprising part 3, as follows:

- Sheet 4: Polyester film-backed mica paper with a B-stage epoxy resin binder.

Page 9

1 Scope

Insert the following two paragraphs after the existing paragraphs:

Materials which conform to this specification meet established levels of performance. However, the selection of materials by a user for a specific application should be based on the actual requirements necessary for adequate performance in that application and not based on this specification alone.

Safety warning:

It is the responsibility of the user of the methods contained or referred to in this document to ensure that they are used in a safe manner.

2 Normative references

Replace the existing references by the following:

IEC 60243-1:1998, *Electric strength of insulating materials – Test methods - Part 1: Tests at power frequencies*

IEC 60371-2:2004, *Specification for insulating materials based on mica – Part 2: Methods of test*

IEC 60371-3-2:2005, *Insulating materials based on mica – Part 3: Specifications for individual materials – Sheet 2: Mica paper*

IEC 60674-3-2:1992, *Specification for plastic films for electrical purposes – Part 3: Specifications for individual materials – Sheet 2: Requirements for balanced biaxially oriented polyethylene terephthalate (PET) films used for electrical insulation*

3 Designation

Replace the existing first two paragraphs by the following new paragraphs:

When ordering materials to this specification, only the specification and type numbers need be quoted (see Table 1).

Example: IEC 60371-3-4: type 4.1.01

The type number is derived from:

- the specification sheet number 4
- followed by the sheet table number 1
- followed by the number of the product in the sheet table 01

Thus giving type number 4.1.01.

The final paragraph and table remain unchanged.
