Reference number  
IEC/PAS 62409:2005(E)

## Publication numbering

As from 1 January 1997 all IEC publications are issued with a designation in the 60000 series. For example, IEC 34-1 is now referred to as IEC 60034-1.

## Consolidated editions

The IEC is now publishing consolidated versions of its publications. For example, edition numbers 1.0, 1.1 and 1.2 refer, respectively, to the base publication, the base publication incorporating amendment 1 and the base publication incorporating amendments 1 and 2.

## Further information on IEC publications

The technical content of IEC publications is kept under constant review by the IEC, thus ensuring that the content reflects current technology. Information relating to this publication, including its validity, is available in the IEC Catalogue of publications (see below) in addition to new editions, amendments, and corrigenda. Information on the subjects under consideration and work in progress undertaken by the technical committee which has prepared this publication, as well as the list of publications issued, is also available from the following:

- **IEC Web Site ([www.iec.ch](http://www.iec.ch))**
- **Catalogue of IEC publications**

The on-line catalogue on the IEC web site ([www.iec.ch/searchpub](http://www.iec.ch/searchpub)) enables you to search by a variety of criteria including text searches, technical committees and date of publication. On-line information is also available on recently issued publications, withdrawn and replaced publications, as well as corrigenda.

- **IEC Just Published**

This summary of recently issued publications ([www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)) is also available by email. Please contact the Customer Service Centre (see below) for further information.

## CONTENTS

|  |    |
|--|----|
| INTRODUCTION.....  | 10 |
| FOREWORD.....  | 11 |
| 1 Scope.....   | 13 |
| 2 Normative references.....  | 13 |
| 3 Common terms and definitions .....                               | 14 |
| 3.1 ISO/IEC 7498-1 Terms .....                                     | 14 |
| 3.2 ISO/IEC 8824-1 Terms .....                                     | 15 |
| 3.3 ISO/IEC 10731 Terms .....                                      | 15 |
| 3.4 IEC 61158-5 Terms.....   | 16 |
| 3.5 IEC 61804-2 Terms.....   | 17 |
| 3.6 ISO/IEC 8802-3 Terms.....                                      | 17 |
| 3.7 Additional terms and definitions .....                         | 18 |
| 4 Abbreviated terms and acronyms .....                             | 20 |
| 5 Conventions .....  | 22 |
| 5.1 Convention for Object definitions.....                         | 22 |
| 5.2 Conventions for services definitions.....                      | 23 |
| 5.2.1 General .....  | 23 |
| 5.2.2 Service parameters .....                                     | 23 |
| 5.3 Conventions for state machines .....                           | 24 |
| 6 EPA system architecture.....                                     | 25 |
| 6.1 Overview .....   | 25 |
| 6.2 EPA architecture.....  | 26 |
| 6.2.1 Relationship to the ISO OSI Reference Model .....            | 26 |
| 6.2.2 EPA system architecture .....                                | 27 |
| 6.3 Network Topology .....   | 29 |
| 6.3.1 Overview .....   | 29 |
| 6.3.2 EPA devices .....  | 31 |
| 6.4 Communication process between EPA devices .....                | 31 |
| 6.4.1 Overview .....   | 31 |
| 6.4.2 EPA link object .....  | 32 |
| 6.4.3 An example .....   | 33 |
| 6.5 EPA system configuration and startup .....                     | 35 |
| 6.5.1 Configuration.....   | 35 |
| 6.5.2 Device Startup .....   | 36 |
| 7 EPA data link layer protocol .....                               | 36 |
| 7.1 Overview .....   | 36 |
| 7.2 DLL model .....  | 37 |
| 7.2.1 Medium Access Control (MAC) .....                            | 37 |
| 7.2.2 Logic Link Control (LLC).....                                | 37 |
| 7.2.3 EPA Communication Scheduling Management Entity (ECSME) ..... | 37 |
| 7.2.4 DLL services .....   | 37 |
| 7.2.5 Transaction between DLL and PhL .....                        | 37 |
| 7.3 EPA communication scheduling procedure .....                   | 38 |
| 7.3.1 General .....  | 38 |

|        |   |     |
|--------|---|-----|
| 7.3.2  | Scheduling procedure .....  | 39  |
| 7.3.3  | Priority .....  | 45  |
| 7.3.4  | Time synchronization .....  | 45  |
| 7.4    | ECSME PDU structure .....   | 45  |
| 7.4.1  | NonPeriodicDataAnnunciation PDU .....                             | 45  |
| 7.4.2  | EndofNonPeriodicDataSending PDU .....                             | 46  |
| 7.4.3  | EPA PDU .....   | 47  |
| 7.5    | Encoding of ECSME Packet .....                                    | 48  |
| 7.5.1  | Encoding of NonPeriodicDataAnnunciation message .....             | 48  |
| 7.5.2  | Encoding of EndofNonPeriodicDataSending message .....             | 48  |
| 7.5.3  | Encoding of EPA message .....                                     | 49  |
| 8      | EPA application layer service definition .....                    | 49  |
| 8.1    | Concepts .....  | 49  |
| 8.1.1  | Overview .....  | 49  |
| 8.1.2  | Architectural relationships .....                                 | 49  |
| 8.1.3  | EPA application layer structure .....                             | 51  |
| 8.1.4  | EPA application layer naming and addressing .....                 | 52  |
| 8.1.5  | Architecture summary .....  | 52  |
| 8.1.6  | EPA application layer services procedures .....                   | 52  |
| 8.2    | Data Type ASE .....   | 52  |
| 8.3    | Communication model specification .....                           | 52  |
| 8.3.1  | EPA AE .....  | 52  |
| 8.3.2  | EPA System Management ASE .....                                   | 53  |
| 8.3.3  | Domain ASE .....  | 77  |
| 8.3.4  | Event ASE .....   | 83  |
| 8.3.5  | Variable ASE .....  | 88  |
| 8.3.6  | Application relationship ASE .....                                | 95  |
| 8.3.7  | EPA Socket Mapping ASE .....                                      | 98  |
| 8.4    | Summary of Services in EPA application layer .....                | 101 |
| 9      | EPA application layer protocol specification .....                | 102 |
| 9.1    | Syntax description .....  | 102 |
| 9.1.1  | Fixed format PDU description .....                                | 102 |
| 9.1.2  | Confirmed request service .....                                   | 103 |
| 9.1.3  | Confirmed response service .....                                  | 103 |
| 9.1.4  | Confirmed error .....   | 103 |
| 9.1.5  | Error type .....  | 103 |
| 9.1.6  | Error class .....   | 104 |
| 9.1.7  | Unconfirmed request .....   | 104 |
| 9.1.8  | EPA application layer PDU .....                                   | 104 |
| 9.1.9  | APDU header format .....  | 104 |
| 9.1.10 | EPA System Manage Entity services .....                           | 105 |
| 9.1.11 | EPA Application Access Entity (AAE) services .....                | 107 |
| 9.1.12 | Abstract syntax of data type .....                                | 110 |
| 9.2    | Transfer Syntax .....   | 111 |
| 9.2.1  | Encoding of basic data types .....                                | 111 |
| 9.2.2  | Object definitions in EPA System Management ASE .....             | 118 |
| 9.2.3  | Definition of objects used in EPA application access entity ..... | 124 |
| 9.2.4  | Encoding of EPA APDU Header .....                                 | 128 |
| 9.2.5  | Encoding of EPA System Management Entity service parameters ..... | 129 |

|                    |   |     |
|--------------------|---|-----|
| 9.2.6              | Encoding of AAE Services .....                              | 136 |
| 9.3                | Protocol State Machine .....                                | 143 |
| 9.4                | EPA SME State Machines .....                                | 143 |
| 9.4.1              | Primitives .....  | 143 |
| 9.4.2              | Protocol State Machine Descriptions .....                   | 145 |
| 9.4.3              | State Transitions .....                                     | 146 |
| 9.4.4              | Function descriptions .....                                 | 148 |
| 9.5                | Application Access Entity Protocol Machine .....            | 154 |
| 9.5.1              | Primitives .....  | 154 |
| 9.5.2              | AAE state machine .....                                     | 156 |
| 9.5.3              | Event ASE Protocol Machine .....                            | 159 |
| 9.5.4              | Domain ASE Protocol Machine .....                           | 160 |
| 9.6                | ESME Protocol State Machine .....                           | 165 |
| 9.6.1              | Primitives .....  | 165 |
| 9.6.2              | State description .....                                     | 166 |
| 9.6.3              | State transitions .....                                     | 166 |
| 9.6.4              | Function description .....                                  | 167 |
| 10                 | XML based EPA Device Descriptions .....                     | 167 |
| 10.1               | Overview .....  | 167 |
| 10.2               | The summary of EPA extensible device description file ..... | 168 |
| 10.2.1             | Architecture .....  | 168 |
| 10.2.2             | Overview of basic elements .....                            | 168 |
| 10.3               | Structure of XDD files .....                                | 169 |
| 10.3.1             | Overview .....  | 169 |
| 10.3.2             | XDD file information structure .....                        | 169 |
| 10.3.3             | Device resource description structure .....                 | 170 |
| 10.3.4             | Parameter Element Description Structure .....               | 174 |
| 10.4               | Configuration interface .....                               | 182 |
| Bibliography ..... | 183   |     |

## FIGURES

|  |    |
|--|----|
| Figure 1 – state transition diagram .....                                | 24 |
| Figure 2 – EPA system architecture .....                                 | 27 |
| Figure 3 – EPA control system model .....                                | 28 |
| Figure 4 – EPA system network topology .....                             | 30 |
| Figure 5 – communication among EPA devices .....                         | 32 |
| Figure 6 – EPA link relationship .....                                   | 32 |
| Figure 7 – Model of DLL .....  | 37 |
| Figure 8 – time-sharing communication scheduling .....                   | 38 |
| Figure 9 – States transitions of ECSME .....                             | 39 |
| Figure 10 – EPA packet identifier .....                                  | 45 |
| Figure 11 – Format of NonPeriodicDataAnnunciation PDU .....              | 45 |
| Figure 12 – Format of EndofNonPeriodicDataSending PDU .....              | 46 |
| Figure 13 – Format of EPA PDU .....                                      | 47 |
| Figure 14 – Relationship to the OSI basic reference model .....          | 50 |
| Figure 15 – Architectural positioning of the EPA Application Layer ..... | 51 |

|  |     |
|--|-----|
| Figure 16 – EPA Application Layer Entity .....                   | 53  |

| Figure 22 – Event ASE state transition diagram.....              | 159 |
| Figure 23 – Domain ASE state transition diagram .....            | 161 |
| Figure 24 – ESME state transition .....                          | 166 |
| Figure 25 – DD model .....                                       | 168 |
| Figure 26 – Structure of XDD file .....                          | 168 |

## TABLES

|  |    |
|--|----|
| Table 1 – service primitive format.....                          | 23 |
| Table 2 – State machine description elements .....               | 24 |
| Table 3 – Relationship to the ISO/OSI reference model.....       | 26 |
| Table 4 – ECSME state transitions .....                          | 41 |
| Table 5 – Epnon-periodicDataSendingSuc() description.....        | 42 |
| Table 6 – EpaNonPeriodicDataAnnunciation() description.....      | 42 |
| Table 7 – Epnon-periodicDataSending() description.....           | 42 |
| Table 8 – EpaNonPeriodicDataSendingSuc() description .....       | 42 |
| Table 9 – EpaFirstNonPeriodicDataSending() description .....     | 43 |
| Table 10 – EpaNonPeriodicDataPriority() description .....        | 43 |
| Table 11 – EpaNonPeriodicDataTimeEnough() description .....      | 43 |
| Table 12 – EpaNonPeriodicDataSending() description .....         | 43 |
| Table 13 – EpaEndofNonPeriodicDataSending() description .....    | 44 |
| Table 14 – EpalsDeviceConfigured() description.....              | 44 |
| Table 15 – EpaCountOffsetTime() description.....                 | 44 |
| Table 16 – EpaDataSendingTiming() description.....               | 44 |
| Table 17 – EpaRecEndofNonPeriodicDataSending() description ..... | 44 |
| Table 18 – NonPeriodicDataAnnunciation message Encoding .....    | 48 |
| Table 19 – EndofNonPeriodicDataSending message Encoding.....     | 48 |
| Table 20 – EPA message Encoding.....                             | 49 |
| Table 21 – EPA MIB.....  | 55 |
| Table 22 – EPA System Management Entity Services .....           | 68 |
| Table 23 – EM_FindTagQuery service parameters.....               | 69 |
| Table 24 – EM_FindTagReply service parameters .....              | 70 |
| Table 25 – EM_GetDeviceAttribute service parameters.....         | 71 |
| Table 26 – EM_DeviceAnnunciation service parameters .....        | 73 |
| Table 27 – EM_SetDeviceAttribute service primitives.....         | 74 |
| Table 28 – EM_ClearDeviceAttribute service parameter.....        | 76 |
| Table 29 – Services for Domain ASE.....                          | 77 |

|  |     |
|--|-----|
| Table 30 – Access Groups for Domain.....                                     | 78  |
| Table 31 – Access Rights for Domain .....                                    | 78  |
| Table 32 – Parameters for Domain Download Service.....                       | 80  |
| Table 33 – Parameters for Domain Upload Service .....                        | 82  |

IEC PAS 62409:2005

<https://standards.iteh.ai/standard/standards/iec/c973714-dc9b-4229-9ecb-9c0d43823eac/iec-pas-62409-2005>

## INTRODUCTION

Considering the increasingly use of information technology (IT) with established standards, such as TCP/IP and XML, in modern industrial automation, this PAS provides a EPA® (Ethernet for Plant Automation) system architecture and communication services and protocols specification to meet the demand of deterministic communication based on the commonly known as Ethernet. EPA network uses provision from ISO/IEC 8802-3:2000 for the lower communication stack layers and additionally provide more predictable and reliable real-time data transfer and means for support of precise synchronization of automation equipment.

It contains the following items:

- 1) EPA system architecture
- 2) Date Link Layer protocol specification
- 3) Application Layer Service definition
- 4) Application Layer protocol specification
- 5) XML based EPA Device Description specification

In EPA systems, regular Ethernet traffic is supported in parallel. For that purpose of higher transmission priority, a registered number 0X88BC for LENGTH/TYPE segment is used.

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Real-time Ethernet for Plant Automation (EPA<sup>®</sup>)****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

The International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this document may involve the use of a patent concerning EPA<sup>®1</sup>.

The EPA has the patent applications listed below:

China Publication Number 03142040.0

China Publication Number 031200001.9.

IEC takes no position concerning the evidence, validity and scope of this patent right.

The holder of this patent right has assured the IEC that he is willing to negotiate licences under reasonable and non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statement of the holder of this patent right is registered with IEC. Information may be obtained from:

ZHEJIANG SUPCON CO. LTD.

Liuhe Road,

Binjiang District,

Hangzhou, China.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. IEC shall not be held responsible for identifying any or all such patent rights.

---

1 EPA<sup>®</sup> is the trade name of ZHEJIANG SUPCON CO. LTD., control of trade name use is given to IEC and the non profit organisation EPA Club. This information is given for the convenience of users of this PAS and does not constitute an endorsement by IEC of the trademark holder or any of its products. Use of the trade name EPA should require permission of the EPA Club.

A PAS is a technical specification not fulfilling the requirements for a standard but made available to the public.

IEC-PAS 62409 has been processed by subcommittee 65C: Digital communications, of IEC technical committee 65: Industrial-process measurement and control.

The text of this PAS is based on the following document:

This PAS was approved for publication by the P-members of the committee concerned as indicated in the following document

| Draft PAS  | Report on voting |
|------------|------------------|
| 65C/357/NP | 65C/373/RVN      |

Following publication of this PAS, the technical committee or subcommittee concerned will transform it into an International Standard.

It is intended that the content of this PAS will be incorporated in the future new editions of the various parts of IEC 61158 series and/or IEC 61784 series according to the structure of these series.

This PAS shall remain valid for an initial maximum period of three years starting from 2005-06. The validity may be extended for a single three-year period following which it shall be revised to become another type of normative document or shall be withdrawn.
