This European Standard was approved by CENELEC on 2007-11-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

CENELEC

European Committee for Electrotechnical Standardization
Comité Européen de Normalisation Electrotechnique
Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: rue de Stassart 35, B - 1050 Brussels

Foreword

This European Standard was prepared by the Technical Committee CENELEC TC 40XB, Resistors.

The text of the draft was submitted to the formal vote and was approved by CENELEC as EN 140101-806 on 2007-11-01.

This European Standard supersedes CECC 40 101-806:1997.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2008-11-01
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2010-11-01

Preceding documents on the subject covered by this specification have been:

- only on resistors without established reliability, now Version A:
 - CECC 40 101-012: 1978-09; 1981-10; 1983-09; 1992-11
 - CECC 40 101-013: 1978-09; 1981-10; 1983-09; 1992-11
 - CECC 40 101-014: 1978-09; 1981-10
 - CECC 40 101-015: 1981-10; 1983-09; 1992-11
 - CECC 40 101-016: 1978-09; 1981-10; 1983-09; 1992-11
 - CECC 40 101-017: 1978-09; 1981-10; 1983-09; 1992-11
 - CECC 40 101-018: 1981-01; 1983-09; 1992-11
 - CECC 40 101-022: 1977-07
 - CECC 40 101-023: 1977-07 [SIST EN 140101-806:2008](#)
 - CECC 40 101-025: 1977-06 <https://sist-en-140101-806.sist-standards.iteh.ai/catalog/sist/3cf5d6c8-3cb7-4a6b-910d-10-025-de6/sist-en-140101-806-2008>
 - CECC 40 101-033: 1981-10; 1983-09
 - CECC 40 101-039: 1982-04; 1986-05
 - CECC 40 101-040: 1982-04; 1984-06
 - CECC 40 101-041: 1984-00
 - CECC 40 101-042: 1984-00
 - CECC 40 101-045: 1985-07; 1987-01; 1992-11; 1995-05
 - CECC 40 101-048: 1992-02; 1992-10
- only on resistors with established reliability, now Version E:
 - CECC 40 101-046: 1987-11
 - CECC 40 101-047: 1988-07; 1989-08; 1990-12; 1993-02; 1995-06

Compared to the superseded standard, the following changes have been implemented:

- modification of the title;
- elimination of style E;
- revised tables for resistance range and tolerance on rated resistance in 1.3;
- introduction of temperature coefficients $\pm 10 \cdot 10^{-6}/K$ and $\pm 5 \cdot 10^{-6}/K$ in 1.4;
- introduction of stability classes 0,25, 0,1 and 0,05 in 1.3 and 1.6;
- introduction of a test on the resistance to electrostatic discharge (ESD) in 1.6 and Annex A;
- introduction of description and test methods for lead-free soldering in 1.9.3 and Annex A;
- introduction of code letters for temperature coefficient (TCR) as in EN 60062;
- revision of ordering information in 1.8.4;

- revised information on pulse load capability in 1.9.5;
- revised information on resistance drift in 1.9.6;
- adoption of the IECQ rules of procedure, IEC QC 001002-3;
- revision of the sample quantities and the sequence of tests in Annex A;
- editorial revision.

This specification is part of a series of documents describing fixed low power film resistors as follows.

- EN 60115-1 Fixed resistors for use in electronic equipment – Part 1: Generic specification (IEC 60115-1, mod.)
- EN 140100 Sectional specification: Fixed low power film resistors
- this detail specification.

Any detail specification within this series is written on the basis of

- EN 140101 Blank detail specification: Fixed low power film resistors.
-

1.1 Dimensions and ratings

Table 1 – Style and dimensions

Style		Length L mm		Diameter D mm		d^a mm	e^b mm	c^c mm	Mass^d mg
Code	Size^d	min.	max.	min.	max.			max.	
A	0204	3,0	4,0	1,3	1,9	0,4 / 0,5	7,5	0,5	130
B	0207	5,0	6,5	2,0	2,5	0,6	10,0	0,5	280
C	0411	7,5	10,7	3,0	4,0	0,6 / 0,7	15,0	0,5	600
D	0414	10,0	12,0	3,6	4,1	0,8	17,5	1,0	790

^a Permissible tolerance according to HD 349 S1.

^b Standard distance for the axis to bent leads. Smaller modules may be agreed between manufacturer and customer.

^c Length of excess protective coating.

^d For information only.

The minimum lead length of 21 mm is valid for tape packaging according to EN 60286-1 only (free lead length).

Taping according to EN 60286-1 or preformed leads are permitted. Details to be agreed between manufacturer and customer. For preformed leads the length of excess protective coating may be larger than given in Table 1.

Information about manufacturers who have components qualified to this detail specification is available in the **approvals section of the website** <http://www.iecq.org>

1.2 Derating curve

Resistors covered by this specification are derated according to the following diagram:

<https://standards.iteh.ai/catalog/standards/sist/3cf5d6c8-3cb7-4a6b-910d-cf9c650cade6/sist-en-140101-806-2008>

Refer to Table 6 for the category temperatures of the stability classes.

1.3 Resistance range and tolerance on rated resistance

1.3.1 Version A

The following combinations of temperature coefficient and tolerance on rated resistance may be approved only. Products from this extent shall be used for the Qualification approval according to 2.2.1 and for the Quality conformance inspection according to 2.3. Resistance values of an E-series according to IEC 60063 shall be used.

The qualification of resistance values below or beyond the specified resistance values is permitted, if they fulfil the requirements of the closest stability class (e.g. Style B 1 % > 10 M Ω shall fulfil the requirements of stability class 2).
