AMENDEMENT 1

Reference number
ISO 8470:1990/Amd.1:1993 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 1 to International Standard ISO 8470:1990 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Sub-Committee SC 1, *Ignition equipment*.

AMENDMENT 1

iTeh STANDARD PREVIEW
(standards.iteh.ai)

Page 1, subclause 3.1

<https://standards.iteh.ai/catalog/standards/si/601591574462513619811701199011993>

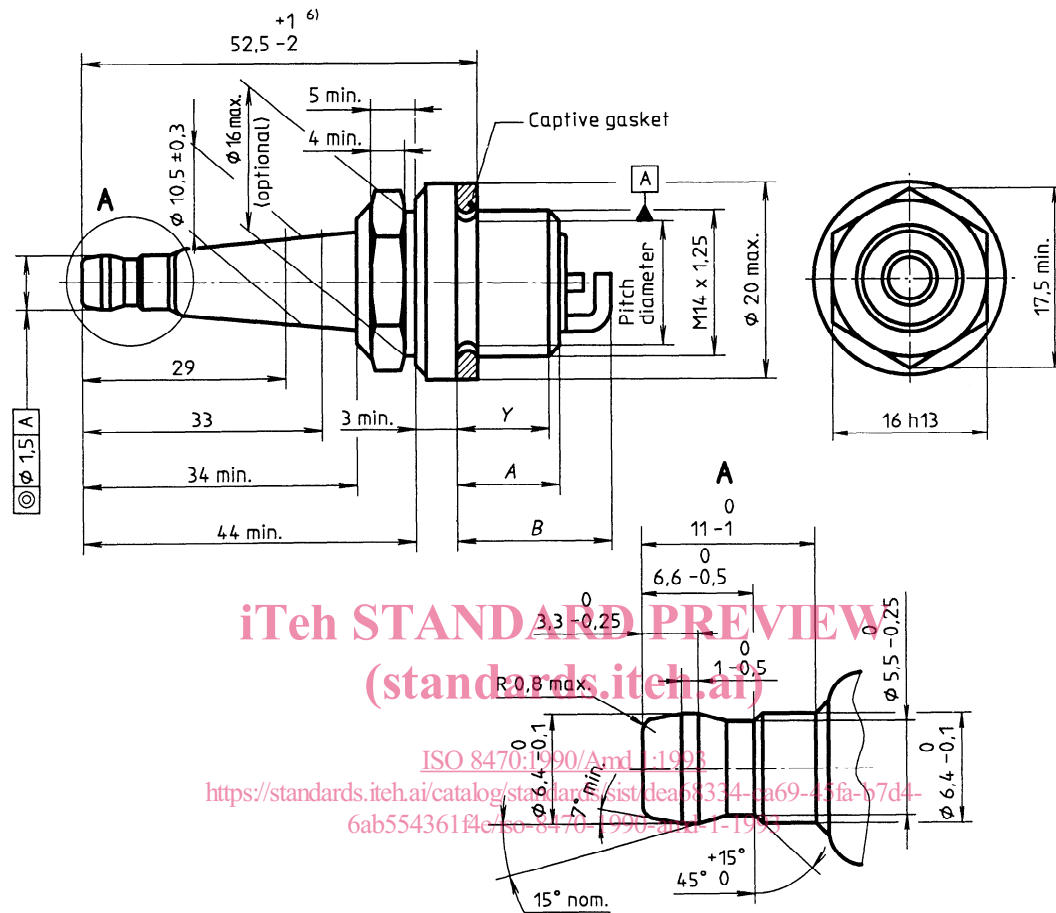

The second sentence of this subclause is changed to indicate clearly that not only the nut but the whole spark-plug shall respect the dimensions specified for spark-plugs with solid post terminal.

3.1 Terminals

The spark-plug terminal may be either the solid post or the threaded type. A spark-plug with threaded terminal on which a nut is applied shall respect the dimensions specified for spark-plugs with solid post terminal (see figure 1).

Page 3, figure 1

Replace the existing figure 1 with the following figure which has an additional length dimension, the minimum insulator length, which is 34 mm for spark-plugs with solid post terminal and 31 mm for spark-plugs with threaded terminal.

a) With solid post terminal

b) With threaded terminal⁵⁾

- 1) 0,7 mm pitch complying with ISO 68 and ISO 261.
- 2) Length of usable thread.
- 3) Cylindrical part.
- 4) Depending upon manufacturing processes, class 7e is acceptable on the finished product.
- 5) Other dimensions: see figure 1 a).
- 6) See 3.3.

Figure 1 – M14 × 1,25 spark-plugs with flat seating and 16 mm hexagon
