### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

[IEC 62148-11:2009](http://www.iec.ch/online_news/justpub)

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

### A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: [www.iec.ch/searchpub/cur\\_fut-f.htm](http://www.iec.ch/searchpub/cur_fut-f.htm)

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

PACKAGE AND INTERFACE STANDARDS –****Part 11: 14-pin active device modules**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62148-11 has been prepared by subcommittee 86C: Fibre optic systems and active devices, of IEC technical committee 86: Fibre optics.

This standard is to be read in conjunction with IEC 62148-1.

This second edition cancels and replaces the first edition, published in 2003, and constitutes a technical revision.

The first edition was limited to 14-pin modulator-integrated laser diode transmitters. The second edition has been expanded to include 14-pin pump lasers and the title changed to reflect the new scope.

The text of this standard is based on the following documents:

FDIS	Report on voting
86C/882/FDIS	86C/898/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 62148 series, published under the general title *Fibre optic active components and devices – Package and interface standards*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## INTRODUCTION

Modulator integrated laser diode transmitters are used to convert electrical signals into optical signals. Pump diode lasers are used to supply optical pump power in the rare earth doped optical fibre amplifiers. This standard covers the physical interface for modulator integrated laser diode transmitters and pump diode lasers. These transmitters and lasers are designed as a pigtailed 14-pin butterfly package with thermo-electric cooler.

# FIBRE OPTIC ACTIVE COMPONENTS AND DEVICES – PACKAGE AND INTERFACE STANDARDS –

## Part 11: 14-pin active device modules

### 1 Scope and object

This part of IEC 62148 covers physical interface specification for modulator integrated laser diode transmitters.

The object of this standard is to adequately specify the physical requirements of an optical transmitter that will enable mechanical interchangeability of transmitters complying with this standard both at the printed circuit board and for any panel mounting requirement.

### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60793-2-50: *Optical fibres – Part 2-50: Product specifications – Sectional specification for class B single-mode fibres*

IEC 60874 (all parts), *Connectors for optical fibres and cables*

[https://standards.iteh.ai/catalog/standards/sist/5704935d-4d9c-4f8c-999b-](https://standards.iteh.ai/catalog/standards/sist/5704935d-4d9c-4f8c-999b-91476a9a280/iec-62148-11-2009)

IEC 62148-1: *Fibre optic active components and devices – Package and interface standards – Part 1: General and guidance*

### 3 Abbreviations

For the purposes of this document, the following abbreviations apply.

PD      Monitor PD

TEC     Thermo-electric cooler

### 4 Classification

The modulator integrated laser diode transmitter described in this part of IEC 62148 is classified as Type 3 according to the definitions of IEC 62148-1.

### 5 Specification of fibre optic transmitter module

#### 5.1 Pigtail interface

All optical fibres which are defined in IEC 60793-2-50 are applicable.

All optical connectors which are defined in IEC 60874 series are applicable if a pigtail is to be terminated with an optical connector.

## 5.2 Electrical interface

### 5.2.1 General

The electrical interface in this standard defines only the basic functionality of each pin.

### 5.2.2 Numbering of electrical terminals

Pin numbering assignments are shown in Figure 1 (electrical terminals viewed from the top of the module).

**Figure 1 – Electrical terminal numbering assignments**  
(viewed from the top of the module)

### 5.2.3 Pin function definition [\(standards.iteh.ai\)](https://standards.iteh.ai/)

The basic functionalities of each pin for modulator integrated laser diode transmitters and pump lasers are defined in Tables 1 and 2, respectively.

**Table 1 – Pin-function definitions for modulator integrated laser diode device**

Pin number	Symbol	Functional description
1 <sup>a</sup>		Thermistor-1
2 <sup>a</sup>		Thermistor-2
3	LD <sub>A</sub>	Laser diode anode
4	PD <sub>A</sub>	Monitor PD anode
5	PD <sub>K</sub>	Monitor PD cathode
6	TEC <sub>A</sub>	Thermo-electric cooler anode
7	TEC <sub>K</sub>	Thermo-electric cooler cathode
8		Case ground
9		Case ground
10		NC or case ground
11		Laser/modulator ground
12		Modulator anode RF data input
13		Laser/modulator ground
14		NC or case ground

<sup>a</sup> Resistance between these two terminals indicates the case temperature.

**Table 2 – Pin-function definitions for pump laser diode device**

Pin number	Symbol	Functional description
1	TEC <sub>A</sub>	Thermo-electric cooler anode
2 <sup>a</sup>		Thermistor-1
3	MPD <sub>A</sub>	Monitor PD anode
4	MPD <sub>K</sub>	Monitor PD cathode
5 <sup>a</sup>		Thermistor-2
6		NC or case ground
7		NC or case ground
8		NC or case ground
9		NC or case ground
10	LD <sub>A</sub>	Laser diode anode
11	LD <sub>K</sub>	Laser diode cathode
12		NC or case ground
13		Case ground
14	TEC <sub>K</sub>	Thermo-electric cooler cathode
<sup>a</sup> Resistance between these two terminals indicates the case temperature.
