Aircraft — Terminal junction systems —

Part 3:
Detail specification for type 1 system

Aéronefs — Systèmes de raccordement à modules amovibles —

Partie 3: Spécification détaillée pour le système du type 1

INTERNATIONAL ISO

Reference number
ISO 8668-3:1994(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8668-3 was prepared by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, Subcommittee SC 1, *Aerospace electrical requirements*.

ISO 8668 consists of the following parts, under the general title *Aircraft — Terminal junction systems*:

— *Part 1: Characteristics*

— *Part 2: Tests*

— *Part 3: Detail specification for type 1 system*

— *Part 4: Detail specification for type 2 system*

— *Part 5: Detail specification for type 3 system*

— *Part 6: Detail specification for type 4 system*

Aircraft — Terminal junction systems —

Part 3:
Detail specification for type 1 system

1 Scope

1.1 This part of ISO 8668 specifies the particular characteristics of a terminal junction system (TJS), designated as type 1 and intended for use at temperatures between – 55 °C and + 155 °C.

1.2 The junction systems covered by this part of ISO 8668 comprise:

a) feedback modules in four sizes;
b) feedthrough modules in four sizes;
c) frames adapted to these modules: standard frame P1, perforated frame P2 or frame P3 for feedback modules; solid frame P4 for feedthrough modules;
d) module clamps and inserts;
e) removable identification tags;
f) removable male crimp contacts of sizes 22, 20, 16 and 12;
g) sealing plugs.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this part of ISO 8668. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this part of ISO 8668 are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 8668-1:1986, *Aircraft — Terminal junction systems — Part 1: Characteristics.*

ISO 8668-2:1986, *Aircraft — Terminal junction systems — Part 2: Tests.*

MIL-I-81969:1982, *Connector and electrical contact — General specification for installing and removal tools.*

3 Definitions

For the purposes of this part of ISO 8668, the definitions given in ISO 8668-1 apply. See also IEC 50(581):1978, *International Electrotechnical Vocabulary — Chapter 581: Electromechanical components for electronic equipment.*

4 Designation

4.1 Modules

The modules shall be designated as follows:

a) reference to this part of ISO 8668;
b) separated by a space, a figure indicating the type of module:
   1 = feedback module,
   2 = feedthrough module;
c) a letter indicating the size of module: A, B, C or D (see figures 1 and 2);
d) three figures indicating the interconnection diagram (see 5.2);
e) a letter defining resistance to fluids (see table 1).

Table 1 — Code for resistance to fluids

Fluids	Code
Synthetic oil for turbine aero engines Mineral oil for turbine aero engines Kerosene for turbine aero engines	A

EXAMPLE

The designation of a size A feedback module with 21 contacts of size 22, arranged according to interconnection diagram 101 and resistant to fluids defined by code A is as follows:

Feedback module ISO 8668-3 1 A 101 A

4.2 Frames

The frames shall be designated as follows:

a) reference to this part of ISO 8668;
b) separated by a space, a figure indicating the type of module for which the frame is designated:
   1 = feedback modules,
   2 = feedthrough modules;
c) a letter indicating the type of frame:
   P1 = standard solid frame for feedback modules;
   P2 = perforated frame for feedback modules;
   P3 = reinforced frame for feedback modules;
   P4 = full frame for feedthrough modules.
d) three-figure code indicating the length of the frame, in millimetres;
e) separated by a hyphen, a figure indicating the nature of the protection of the frame (see table 2).

Table 2 — Coding of the protection of frames

Protection	Code
White cadmium plating	1
Colourless anodic oxidation	2
Black anodic oxidation	3
Yellow anodic oxidation	4
Stainless steel	5

EXAMPLE

The designation of a perforated frame for 100 mm long feedback modules, protected by black anodic oxidation, is as follows:

Perforated frame ISO 8668-3 1 P2 100 - 3

4.3 Module clamps and inserts

Module clamps and inserts shall be designated as follows:

a) reference to this part of ISO 8668;
b) separated by a space, two letters and one figure indicating the type of module clamp or insert:
SR1 and SR2 for feedback modules;
ST1 and ST2 for feedthrough modules.

EXAMPLE

The designation of a module clamp for a feedback module is as follows:

Module clamp ISO 8668-3 SR1

4.4 Contacts

The contacts shall be designated as follows:

a) reference to this part of ISO 8668;
b) separated by a space, the two-figure code: 22, 20, 16 or 12 indicating the size of contact.

EXAMPLE

The designation of a contact of size 22 is as follows:

Contact ISO 8668-3 22

4.5 Sealing plugs

Sealing plugs shall be designated as follows:

a) reference to this part of ISO 8668;
b) separated by a space, a two-figure code: 01, 02, 03 or 04 (see table 9).

EXAMPLE

The designation of a sealing plug for size 22 contact cavities is as follows:

Sealing plug ISO 8668-3 01

5 Characteristics

5.1 Dimensional characteristics

The dimensions are given in millimetres. In the figures and in certain tables, values in inches are given in parentheses. Drawings are shown in the first angle.

5.1.1 Feedback modules (code 1)

See figure 1 and table 3.

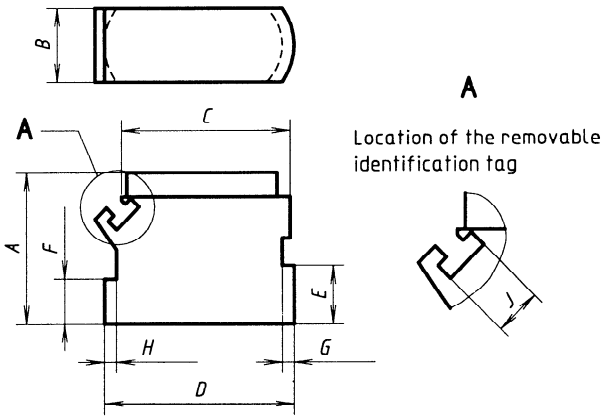

Figure 1 — Feedback module

Table 3 — Feedback modules

Dimensions in millimetres

Size of module	A max.	B ± 0,1	C 0 −0,3	D +0,1 −0,2	E 0 −0,2	F 0 −0,2	G	H	J +0,2 0
A	21,6	10	21,8	24,8	8	6	1,5	1,5	3
B	20	10	21,8	24,8	8	6	1,5	1,5	3

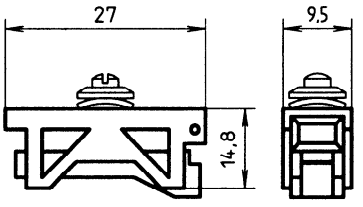
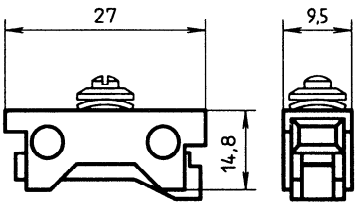
5.1.4 Module clamps and insert

See figures 7 and 8 for the dimensions of module clamps and inserts.

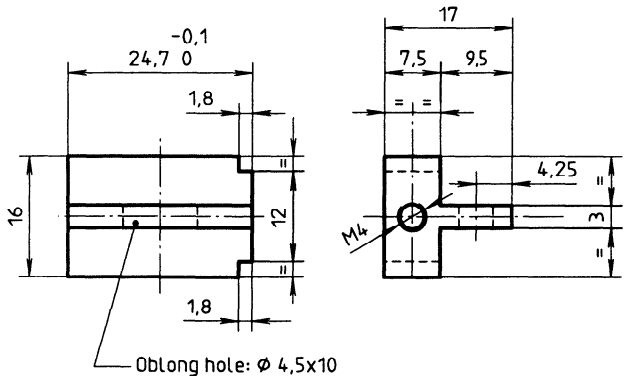


a) Module clamp, type SR1

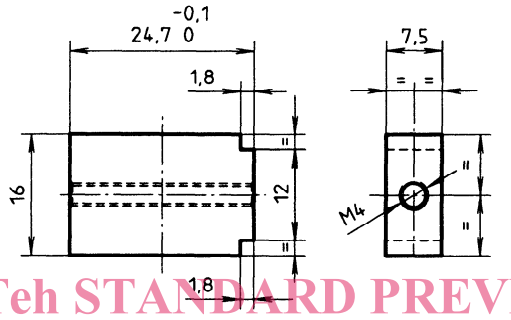


b) Module clamp, type SR2

Figure 7 — Module clamps for feedback modules (code 1)



a) Module clamp, type ST1



b) Inserts, type ST2

Figure 8 — Module clamps and inserts for feedthrough modules (code 2)

5.1.5 Removable identification tags

Removable identification tags shall be 5 mm × 2,8 mm × 0,5 mm. They shall have a white background and all numbers shall be printed in red.
