This European Standard was approved by CEN on 1996-06-29. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EN 3035:1996

## Foreword

This European Standard has been prepared by the European Association of Aerospace Manufacturers (AECMA).

After inquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of AECMA, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 1997, and conflicting national standards shall be withdrawn at the latest by March 1997.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

## 1 Scope

This standard specifies the characteristics of screws, 100° countersunk normal head, offset cruciform recess, close tolerance normal shank, short thread, in alloy steel, cadmium plated.

Classification : 1 100 MPa<sup>1)</sup> / 235 °C<sup>2)</sup>

## 2 Normative references

This European Standard incorporates by dated or undated reference provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

ISO 3353	Aerospace - Rolled threads for bolts - Lead and runout requirements
ISO 5855-2	Aerospace - MJ threads - Part 2 : Limit dimensions for bolts and nuts
ISO 5856	Aerospace - Screws, 100° normal countersunk head, internal offset cruciform ribbed drive, normal shank, short or medium length MJ threads, metallic material, coated or uncoated, strength classes less than or equal to 1 100 MPa - Dimensions
ISO 7689	Aerospace - Alloy steel bolts with strength classification 1 100 MPa and MJ threads - Procurement specification
ISO 7913	Aerospace - Bolts and screws, metric - Tolerances of form and position
ISO 7994	Aerospace - Internal drive (offset cruciform recess) for rotary fastening devices - Metric series <sup>3)</sup>
EN 2000	Aerospace series - Quality assurance - EN aerospace products - Approval of the quality system of manufacturers
EN 2133	Aerospace series - Cadmium plating of steels, with maximum specified tensile strength equal to or less than 1 450 MPa, copper, copper alloys and nickel alloys <sup>3)</sup>
EN 2424	Aerospace series - Marking of aerospace products
EN 3042	Aerospace series - Quality assurance - EN aerospace products - Qualification procedure
EN 4016	Aerospace series - Oversized bolts <sup>4)</sup>
TR 3775	Aerospace series - Bolts and pins - National materials <sup>5)</sup>

1) Minimum tensile strength of the material at ambient temperature

2) Maximum temperature that the screw can withstand without continuous change in its original characteristics, after return to ambient temperature. The maximum temperature is determined by the surface treatment.

3) Published as AECMA Standard at the date of publication of this standard

4) Published as AECMA Prestandard at the date of publication of this standard

5) Published as AECMA Technical Report at the date of publication of this standard

### 3 Required characteristics

#### 3.1 Configuration - Dimensions - Masses

See figure 1 and table 1.

Dimensions and tolerances, expressed in millimetres, are in conformity with ISO 5856 and apply after surface treatment.

#### 3.2 Tolerances of form and position

ISO 7913

#### 3.3 Materials

TR 3775 (alloy steel, strength class 1 100 MPa)

#### 3.4 Surface treatment

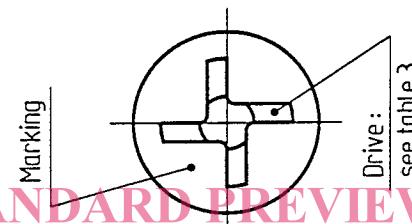

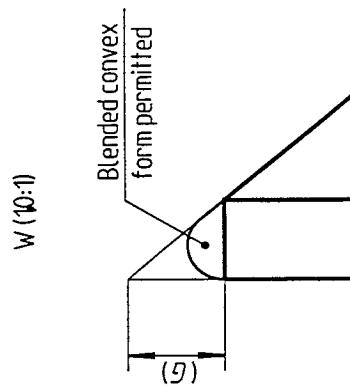

EN 2133, 6 µm to 10 µm, on all surfaces which can be contacted by a 20 mm diameter ball. On all other surfaces, a continuous deposit shall be present, but no value is specified.

Black colour option : code B

1) In accordance with ISO 5855-2, except the thread major diameter "d max." which shall be equal to  $D_1$  min. - 0,025.

2) Increments :

- 1 for  $L_1 \leq 30$
- 2 for  $30 < L_1 \leq 100$
- 4 for  $L_1 > 100$

3) If greater lengths are required, they shall be chosen using the above increments. The length code corresponds to the length  $L_1$ , completed by one or two zeros to the left, where necessary, to obtain a three digit code.

- 4) Approximate values (kg/1 000 pieces), calculated on the basis of 7,85 kg/dm<sup>3</sup>, given for information purposes only. They apply to screws without hole.
- 5) Value for first  $L_4$
- 6) Increase for each additional millimetre of  $L_4$ .

## 4 Designation

EXAMPLE :

Description block	Identity block
SCREW	<u>EN3035D050010AB</u>
Number of this standard	
Hole code (see table 2)	
Diameter code (see table 1)	
Length code (see table 1)	
Drive code (see table 3)	
Black colour code (see 3.4)	

NOTE : If necessary, the code I9005 shall be placed between the description block and the identity block.
