iTeh STANDARD PREVIEW

This European Standard was approved by CENELEC on 2006-02-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC/member: -5093-4845-b3db-59280f8d87aa/sist-en-61754-13-2006

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Foreword

The text of document 86B/2239/FDIS, future edition 2 of IEC 61754-13, prepared by SC 86B, Fibre optic interconnecting devices and passive components, of IEC TC 86, Fibre optics, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 61754-13 on 2006-02-01.

This European Standard supersedes EN 61754-13:1999.

Specific technical changes with respect to EN 61754-13:1999 involve simplification of the system of connector structure and reduction of the number of grades of plug connector interface and pin gauge.

The following dates were fixed:

-	latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement	(dop)	2006-11-01
_	latest date by which the national standards conflicting with the EN have to be withdrawn	(dow)	2009-02-01

Endorsement notice

The text of the International Standard IEC 61754-13:2006 was approved by CENELEC as a European Standard without any modifications TANDARD PREVIEW

INTERNATIONAL ELECTROTECHNICAL COMMISSION

FIBRE OPTIC CONNECTOR INTERFACES –

Part 13: Type FC-PC connector

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any enduser.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter. <u>SIST EN 61754-13:2006</u>
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61754-13 has been prepared by subcommittee 86B: Fibre optic interconnecting devices and passive components, of IEC technical committee 86: Fibre optics.

This second edition cancels and replaces the first edition published in 1999, of which it constitutes a technical revision. Specific technical changes involve simplification of the system of connector structure and reduction of the number of grades of plug connector interface and pin gauge.

The text of this standard is based on the following documents:

FDIS	Report on voting	
86B/2239/FDIS	86B/2273/RVD	

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This standard constitutes Part 13 of the IEC 61754 series, published under the general title Fibre optic connector inferfaces. This series consists of Part 1, devoted to general requirements, and various additional parts, specific to individual connector families, as follows:

- Part 1: General and guidance
- Part 2: Type BFOC/2,5 connector family
- Part 3: Type LSA connector family
- Part 4: Type SC connector family
- Part 4-1: Type SC connector family Simplified receptacle SC-PC connector interfaces
- Part 5: Type MT connector family
- Part 6: Type MU connector family
- Part 6-1: Type MU connector family Simplified receptacle MU-PC connector interfaces
- Part 7: Type MPO connector family
- Part 8: Type CF08 connector family
- Part 9: Type DS connector family
- Part 10: Type Mini-MPO connector family
- Part 12: Type FS connector family
- Part 13: Type FC-PC connector family
- Type LSH connector family NDARD PREVIEW Part 15: Part 16: Type PN connector family
- Part 18: Type MT-RJ connector samin dards.iteh.ai)
- Part 19: Type SG connector family
- SIST EN 61754-13:2006
- Part 21: Type SMI connector family for plastic optical fibre006
- Part 22: Type F-SMA connector family

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed:
- withdrawn;
- replaced by a revised edition, or
- amended.

FIBRE OPTIC CONNECTOR INTERFACES -

Part 13: Type FC-PC connector

1 Scope

3

This part of IEC 61754 defines the standard interface dimensions for the type FC-PC family of connectors.

2 Description

The parent connector for type FC connector family is a single position plug connector set of plug/adaptor configuration which is characterized by a 2,5 mm nominal ferrule diameter. It includes a thread coupling mechanism, which is spring loaded relative to the ferrule in the direction of the optical axis. The plug has a single male key which may be used to orient and limit the relative position between the connector and the component to which it is mated. The optical alignment mechanism of the connectors is of a rigid bore sleeve or a resilient sleeve style.

iTeh STANDARD PREVIEW Interfaces

The following pages define the standard interfaces for the type FC connector family. This standard contains the following standard interfaces.

Interface 13-1: Plug/conhector/interface(see Figures 72and 2)-4845-b3db-

Interface 13-2: Adaptor connector interface (see Figures 3 and 4)

Interface 13-3: Active device receptacle interface (see Figures 5 and 6)

The plug of interface 13-1 has a ferrule with a spherically polished ferrule endface, and realizes physical contact (PC).

The following connectors are intermateable

Interface 13-1 mates with IEC interface 13-2 and interface 13-3.
