SIST EN 2547:2001

This European Standard was accepted by CEN on 1986-08-12. CEN members are bound to comply with the requirements of CEN Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to CEN Central Secretariat has the same status as the official versions.

CEN members are the national standards organizations of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Central Secretariat : Rue Bréderode 2, B-1000 Bruxelles

### Brief history

This draft European Standard has been prepared by the European Association of Aerospace Constructors (AECMA). After enquiries and votes carried out in accordance with the rules of this Association it has successively received the approval of the National Associations and the Official Services of the member countries of AECMA, prior to its presentation to C.E.N.

According to the Common CEN/CENELEC Rules, following countries are bound to implement this European Standard:

Belgium, France, Germany, Italy, Netherlands, Spain, United Kingdom.

## 0 Introduction

Microfilm is used for the exchange, distribution and filing of documents.

## 1 Scope and field of application

This standard specifies the deviations from ISO 2707<sup>1)</sup> necessary for aerospace application. It shall be applied for filming documents on 105 mm microfilm (A6 microfiche) to ensure uniform presentation of the microform for the exchange of information in the aerospace industry.

## 2 Reference

ISO 2707-1980 Micrographics - Transparent A6 size microfiche of uniform division - image arrangements N° 1 and N° 2.

[SIST EN 2547:2001](https://standards.iteh.ai/catalog/standards/sist/943acc04-a0d2-441a-b4ad-ecad754b132e/sist-en-2547-2001)

<https://standards.iteh.ai/catalog/standards/sist/943acc04-a0d2-441a-b4ad-ecad754b132e/sist-en-2547-2001>

## 3 Composition

### 3.1 Reduction ratio

The reduction ratio of 1 : 24 (nominal value) shall be used for filming.

### 3.2 Frame arrangement

It corresponds to the arrangement of images N° 2 of ISO 2707 :

- Single frames : 7 rows x 14 columns = 98 frames;
- Double frames : 7 rows x 7 columns = 49 frames.

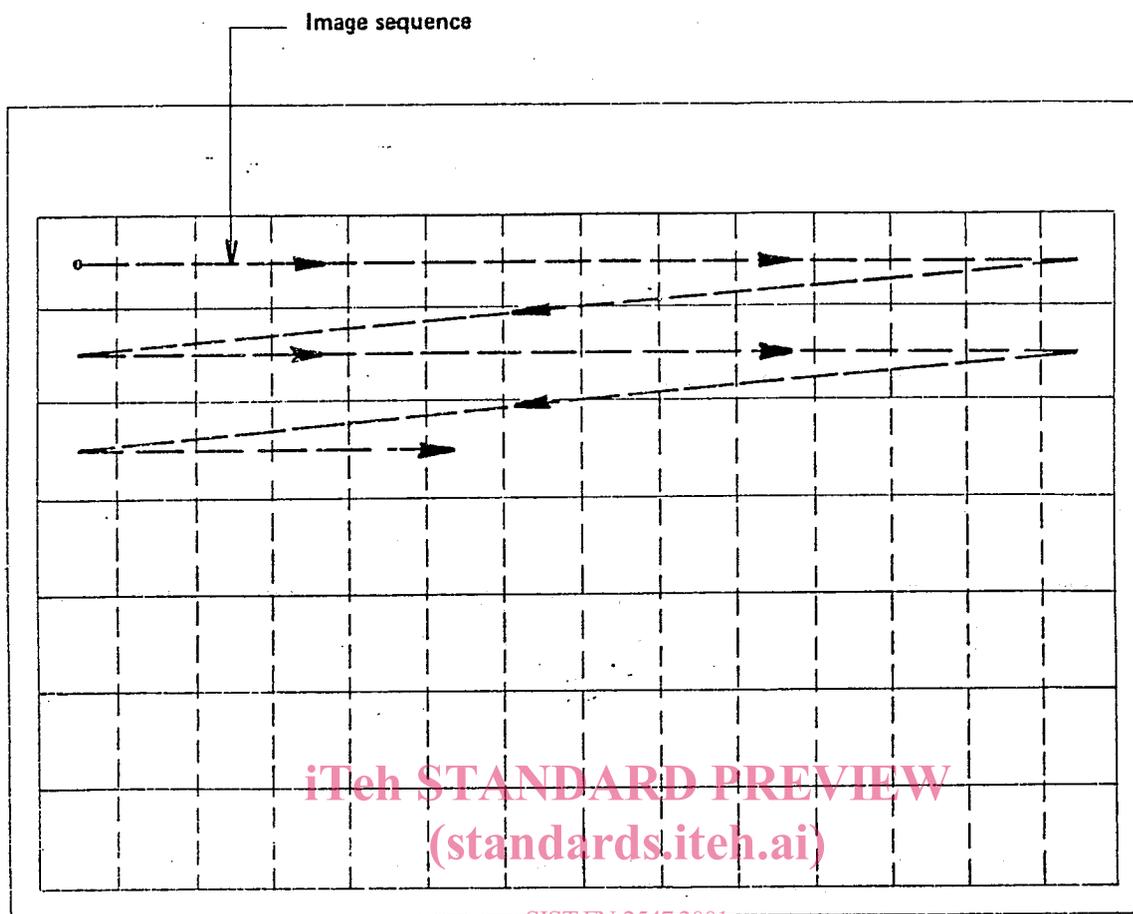

A combination of single and double frames is possible.

### 3.3 Image sequence

The images shall be arranged in horizontal image sequence. The first microimage is located at the top left hand corner of the grid. Subsequent microimages appear in sequence from left to right and from top to bottom advancing by rows (see Figure).

---

1) Consequently, the data not given in this standard is to be obtained from ISO 2707.

Figure

#### 4 Duplicates

##### 4.1 Film

Diazo film is recommended for duplicates

##### 4.2 Image polarity

Duplicates shall have light lines and characters on a dark background (negative - appearing image).

##### 4.3 Generation

For the exchange of information between organisations, only duplicates (2nd generation) made directly from the camera film should be used.

##### 4.4 Title area

Duplicates with a colour backed title area are not suitable for further duplication.
