This European Standard was approved by CENELEC on 2005-10-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Central Secretariat: rue de Stassart 35, B - 1050 Brussels

Foreword

The text of document 86C/672/FDIS, future edition 2 of IEC 61290-1-2, prepared by SC 86C, Fibre optic systems and active devices, of IEC TC 86, Fibre optics, was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 61290-1-2 on 2005-10-01.

This European Standard supersedes EN 61290-1-2:1998.

It includes the measurement of gain parameters previously covered in EN 61290-2-1. Also, the scope of the measurement method has been broadened to include semiconductor optical amplifiers and waveguide optical amplifiers in addition to optically-pumped fibre amplifiers.

This standard is to be read in conjunction with EN 61291-1.

The following dates were fixed:

- latest date by which the EN has to be implemented
at national level by publication of an identical
national standard or by endorsement (dop) 2006-08-01
- latest date by which the national standards conflicting
with the EN have to be withdrawn (dow) 2008-10-01

Annex ZA has been added by CENELEC.

The text of the International Standard IEC 61290-1-2:2005 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 60793-1-1	NOTE	Harmonized as EN 60793-1-1:2003 (not modified).
IEC 60825-1	NOTE	Harmonized as EN 60825-1:1994 (not modified).
IEC 60825-2	NOTE	Harmonized as EN 60825-2:2004 (not modified).
IEC 60874-1	NOTE	Harmonized as EN 60874-1:1999 (not modified).
IEC 61290-10-1	NOTE	Harmonized as EN 61290-10-1:2003 (not modified).
IEC 61290-10-2	NOTE	Harmonized as EN 61290-10-2:2003 (not modified).
IEC 61290-10-3	NOTE	Harmonized as EN 61290-10-3:2003 (not modified).

Annex ZA (normative)

Normative references to international publications with their corresponding European publications

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE Where an international publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

OPTICAL AMPLIFIERS – TEST METHODS –**Part 1-2: Power and gain parameters –
Electrical spectrum analyzer method**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
<https://standards.iteh.ai/catalog/standards/sist/26b1e93f-0395-43b4-b83c->
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61290-1-2 Ed. 2.0 has been prepared by subcommittee 86C: Fibre optic systems and active devices, of IEC technical committee 86: Fibre optics.

This second edition cancels and replaces the first edition published in 1998. It constitutes a technical revision. This second edition includes the measurement of gain parameters previously covered in IEC 61290-2-1 Ed. 1.0. Also, the scope of the measurement method has been broadened to include semiconductor optical amplifiers and waveguide optical amplifiers in addition to optically-pumped fibre amplifiers.

This standard is to be read in conjunction with IEC 61291-1.

The text of this standard is based on the following documents:

FDIS	Report on voting
86C/672/FDIS	86C/677/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

IEC 61290 consists of the following parts under the general title *Optical amplifiers – Test methods*:¹⁾

- Part 1-1: Test methods for gain parameters – Optical spectrum analyzer
- Part 1-2: Power and gain parameters – Electrical spectrum analyzer method
- Part 1-3: Power and gain parameters – Optical power meter method
- Part 2-1: Test methods for optical power parameters – Optical spectrum analyzer
- Part 2-2: Test methods for optical power parameters – Electrical spectrum analyzer
- Part 2-3: Test methods for optical power parameters – Optical power meter
- Part 3: Test methods for noise figure parameters
- Part 3-1: Noise figure parameters – Optical spectrum analyzer method
- Part 3-2: Test methods for noise figure parameters – Electrical spectrum analyzer method
- Part 5-1: Test methods for reflectance parameters – Optical spectrum analyser
- Part 5-2: Reflectance parameters – Electrical spectrum analyser method
- Part 5-3: Test methods for reflectance parameters – Reflectance tolerance using electrical spectrum analyser
- Part 6-1: Test methods for pump leakage parameters – Optical demultiplexer
- Part 7-1: Test methods for out-of-band insertion losses – Filtered optical power meter
- Part 10-1: Multi-channel parameters – Pulse method using an optical switch and optical spectrum analyzer
- Part 10-2: Multi-channel parameters – Pulse method using a gated optical spectrum analyzer
- Part 10-3: Multi-channel parameters – Probe methods
- Part 11-1: Polarization mode dispersion – Jones matrix eigenanalysis method (JME)
- Part 11-2: Polarization mode dispersion parameter – Poincaré sphere analysis method

¹⁾ The first editions of some of these parts were published under the general title *Optical fibre amplifiers – Basic specification or Optical amplifier test methods*.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed;
- withdrawn;
- replaced by a revised edition, or
- amended.
