iTeh STANDARD PREVIEW
(standards.iteh.ai)

This European Standard was approved by CENELEC on 2006-10-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Foreword

The text of document 110/88/FDIS, future edition 2 of IEC 61747-3-1, prepared by IEC TC 110, Flat panel display devices was submitted to the IEC-CENELEC parallel vote and was approved by CENELEC as EN 61747-3-1 on 2006-10-01.

This European Standard supersedes EN 61747-3-1:1999.

The main changes with regard to EN 61747-3-1:1999 concern editorial updating in accordance with current ISO/IEC directives.

This part of EN 61747 is a blank detail specification for liquid crystal display cells. It should be read together with the generic specification and sectional specification to which it refers.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2007-07-01
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2009-10-01

Annex ZA has been added by CENELEC.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

LIQUID CRYSTAL DISPLAY DEVICES –

Part 3-1: Liquid crystal display (LCD) cells –
Blank detail specification

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
<https://standards.iteh.ai/catalog/standards/sist/15b33a8-5e5d-4288-987f-1051c1e51c1e/iec-61747-3-1-2006>
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61747-3-1 has been prepared by IEC technical committee 110: Flat panel display devices.

This second edition cancels and replaces the first edition, published in 1998, and constitutes a technical revision.

The main change with regard to the previous edition is as follows:

- the new edition was editorially changed in accordance with current ISO/IEC directives.

The text of this standard is based on the following documents:

FDIS	Report on voting
110/88/FDIS	110/94/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The QC number that appears on the front cover of this publication is the specification number in the IECQ Quality Assessment System for Electronic Components (IECQ).

Future standards in this series will carry the new general title as cited above. Titles of existing standards in this series will be updated at the time of the next edition.

A list of all parts of the IEC 61747 series, under the general title *Liquid crystal display devices*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

LIQUID CRYSTAL DISPLAY DEVICES –

Part 3-1: Liquid crystal display (LCD) cells – Blank detail specification

INTRODUCTION

The IEC quality assessment system for electronic components is operated in accordance with the statutes of the IEC and under the authority of the IEC. The object of this system is to define assessment procedures in such a manner that electronic components released by one participating country as conforming with the requirements of an applicable specification are equally acceptable in all participating countries without the need for further testing.

This blank detail specification is one of a series of blank detail specifications for liquid crystal display devices and should be used with the following IEC publications:

IEC 61747-1:1998, *Liquid crystal and solid-state display devices – Part 1: Generic specification*

IEC 61747-3:1998, *Liquid crystal display devices – Part 3: Liquid crystal display (LCD) cells - Sectional specification*

Required information

ITeH STANDARD PREVIEW
(standards.iteh.ai)

Numbers shown in brackets on this and the following pages correspond to the following items of required information, which should be entered in spaces provided.

[SIST EN 61747-3-1:2008](#)

Identification of the detail specification [http://standards.iteh.ai/catalog/standards/sist/1f5b33a8-5e5d-4288-987f-b0d6e57c570e/sist-en-61747-3-1-2008](#)

- [1] The name of the National Standards Organization under whose authority the detail specification is issued.
- [2] The IECQ number of the detail specification.
- [3] The numbers and issue numbers of the generic and sectional specifications.
- [4] The national number of the detail specification, data of issue and any further information, if required by the national system.

Identification of the component

- [5] Type of component.
- [6] Information on typical construction and applications. If a device is designed to satisfy several applications, this shall be stated here. Characteristics, limits and inspection requirements for these applications shall be met. If a device is electrostatically sensitive, or contains hazardous materials, a caution statement shall be added in the detail specification.
- [7] Outline drawing and/or reference to the relevant document for outlines.
- [8] Category of assessment quality.
- [9] Reference data on the most important properties to permit comparison between types.

[Throughout this standard, the text given in square brackets are intended for guidance to the specification writer and shall not be included in the detail specification.]

[Throughout this standard, when a characteristic or rating applies, “x” denotes that a value shall be inserted in the detail specification.]

[Name (address of responsible NAI (and possibly of body from which specification is available).] [1]	[Number of IECQ detail specification plus issue number and/or date.] [2]
ELECTRONIC COMPONENT OF ASSESSED QUALITY IN ACCORDANCE WITH: [3] Generic specification: IEC 61747-1/QC 720000 Sectional specification: IEC 61747-3/QC 720200 [and national reference if different]	[National number of detail specification.] [4] [This box need not be used if national number repeats IECQ number.]
BLANK DETAIL SPECIFICATION FOR: SEGMENT TYPE MONOCHROME LCD CELLS [5] [Type number(s) of the relevant device(s) and if appropriate structurally similar devices.] Ordering information: see Clause 5 of this specification.	
1 Mechanical description	2 Short description
Outline references: [7] [Mandatory if available, IEC number and/or national] Construction: e.g. with/without polarizer and/or reflector Outline drawing and dimensions: e.g. overall dimensions effective display area Display format: e.g. display design, etc. Connection type: e.g. pin identification Marking: letters and figures, or colour code. [The detail specification shall prescribe the information to be marked on the device.] [See 4.4 of the generic specification and Clause 4 of this standard.] Mass:	Type of electro-optical effect: [6] e.g. TN, STN, etc. Optical mode of operation: e.g. reflective, transfective, etc. Preferred viewing direction: e.g. 987F Electrical specification: e.g. interface (data) Applications: e.g. watch, indication equipment, etc. 3 Categories of assessed quality [See 4.5 of the generic specification.] [8] Reference data [9]
Information about manufacturers who have components qualified to this detail specification is available in the current qualified products list.
