This European Standard was approved by CEN on 1994-08-17. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EN 3063:1994

## Foreword

This European Standard has been prepared by the European Association of Aerospace Manufacturers (AECMA).

After inquiries and votes carried out in accordance with the rules of this Association, this Standard has successively received the approval of the National Associations and the Official Services of the member countries of AECMA, prior to its presentation to CEN.

This standard was submitted for Formal Vote, and the result was positive.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 1995, and conflicting national standards shall be withdrawn at the latest by February 1995.

According to the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom.

SIST EN 3063:2001  
SIST EN 3063:2001

## 1 Scope

This standard specifies the characteristics of double hexagon headed bolts with close tolerance shank and medium length thread, in NI-P101HT, for aerospace applications.

Classification : 1 210 MPa<sup>1)</sup> / 730 °C<sup>2)</sup>

## 2 Normative references

This European Standard incorporates by dated or undated reference provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

- ISO 3353 Aerospace - Rolled threads for bolts - Lead and runout requirements
- ISO 4095 Fasteners for aerospace construction - Bi-hexagonal wrenching configuration
- ISO 5855-2 Aerospace construction - MJ threads - Part 2 : Limit dimensions for bolts and nuts
- EN 2424 Aerospace series - Marking of aerospace products<sup>3)</sup>
- EN 2582 Aerospace series - Bolts in heat resisting nickel base alloy NI-P101HT (Waspaloy) - Classification : 1 210 MPa / 730 °C - Technical specification<sup>4)</sup>  
*iTeh STANDARD PREVIEW  
(standards.iteh.ai)*
- EN 2959 Aerospace series - Heat resisting nickel base alloy (NI-P101HT) - Solution treated and cold worked - Bar for hot upset forging for fasteners -  $3 \leq D \leq 30$  mm<sup>4)</sup>  
<https://standards.iteh.ai/catalog/standards/sist/4181c1d0-3a21-4fd2-a138-88536226a69c/sist-en-3063-2001>
- EN 3220 Aerospace series - Heat resisting nickel base alloy (NI-P101HT) - Cold worked and softened - Bar and wire for continuous forging or extrusion for fasteners -  $3 \leq D \leq 30$  mm<sup>4)</sup>

## 3 Required characteristics

### 3.1 Configuration - Dimensions - Tolerances - Masses

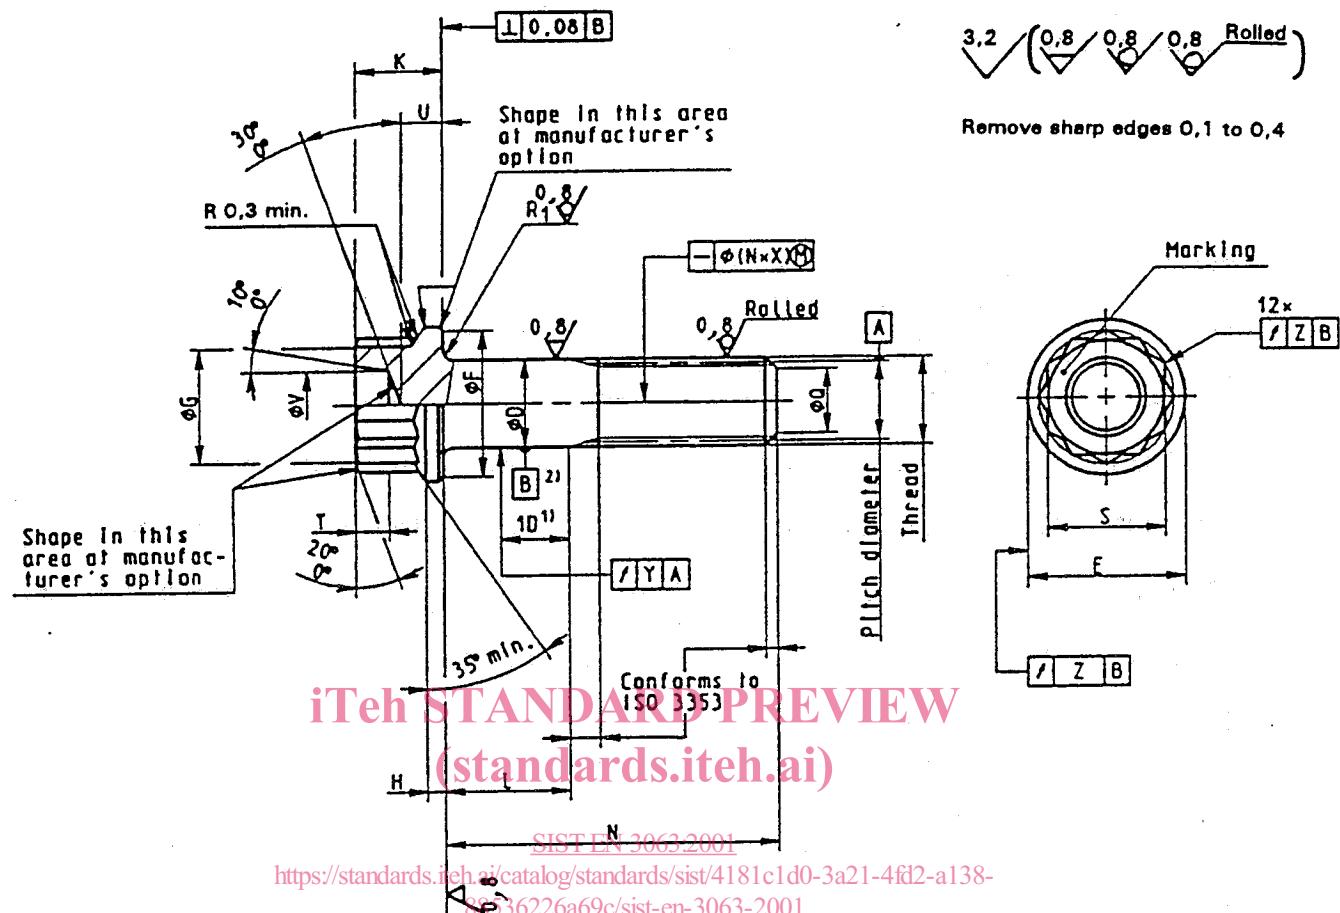

See figure 1 and tables 1 and 2. Dimensions and tolerances are in millimetres.

### 3.2 Materials

EN 2959 or EN 3220

---

1) Minimum tensile strength of the material at ambient temperature  
 2) Maximum test temperature of the parts  
 3) Published as AECMA Standard at the date of publication of this standard  
 4) Published as AECMA Prestandard at the date of publication of this standard

- 1) When the length of the shank is less than one times the nominal value of the shank diameter  $D$ , the run-out is measured at a distance equal to half the actual shank length.
- 2) For bolts having a shank length less than one times the nominal value of the shank diameter  $D$ , the pitch diameter axis shall be used as the datum.
