About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

CONTENTS

INTRODUCTION	
FOREWORD.....	12
1 General scope.....	16
1.2 Normative references.....	16
Fuse system A – D type fuse system	17
1 General.....	17
1.1 Scope.....	17
2 Terms and definitions.....	17
3 Conditions for operation in service.....	17
4 Classification.....	17
5 Characteristics of fuses.....	17
5.2 Rated voltage.....	17
5.3.1 Rated current of the fuse-link.....	18
5.3.2 Rated current of the fuse-holder.....	18
5.3.3 Rated current of the gauge-piece.....	18
5.5 Rated power dissipation of a fuse-link and rated acceptable power dissipation of a fuse-holder.....	18
5.6 Limits of time-current characteristics.....	18
5.6.1 Time-current characteristics, time-current zones and overload curves.....	18
5.6.2 Conventional times and currents.....	19
5.6.3 Gates.....	19
5.7 Breaking range and breaking capacity.....	19
5.7.2 Rated breaking capacity.....	19
6 Markings.....	19
6.4 Marking of the gauge-pieces.....	19
7 Standard conditions for construction.....	20
7.1 Mechanical design.....	20
7.1.2 Connections including terminals.....	20
7.1.3 Fuse-contacts.....	20
7.1.4 Construction of a gauge-piece.....	21
7.1.6 Construction of a fuse-carrier.....	21
7.1.7 Construction of a fuse-link.....	21
7.1.8 Non-interchangeability.....	22
7.1.9 Construction of a fuse-base.....	22
7.2 Insulating properties and suitability for isolation.....	22
7.3 Temperature rise, power dissipation of the fuse-link and acceptable power dissipation of the fuse-holder.....	23
7.7 I^2t characteristics.....	24
7.7.1 Pre-arcing I^2t values.....	24
7.7.2 Operating I^2t values.....	24
7.8 Overcurrent discrimination of "gG" fuse-links.....	24
7.9 Protection against electric shock.....	24
8 Tests.....	25
8.1.4 Arrangement of the fuse and dimensions.....	25

8.2	Verification of the insulating properties and of the suitability for isolation	26
8.2.1	Arrangement of the fuse-holder	26
8.2.6	Creepage distances, clearances and distances through sealing compound.....	26
8.3	Verification of temperature rise and power dissipation	27
8.3.1	Arrangement of the fuse	27
8.3.3	Measurement of the power dissipation of the fuse-link.....	27
8.3.5	Acceptability of test results.....	27
8.5.1	Arrangement of the fuse	28
8.5.2	Characteristics of the test circuit.....	28
8.5.5	Test method	28
8.5.8	Acceptability of test results.....	28
8.7.4	Verification of overcurrent discrimination	29
8.9	Verification of resistance to heat	29
8.9.1	Fuse-base	29
8.9.2	Fuse-carrier.....	30
8.10	Verification of non-deterioration of contacts.....	31
8.10.1	Arrangement of the fuse	31
8.10.2	Test method	31
8.10.3	Acceptability of test results.....	32
8.11	Mechanical and miscellaneous tests.....	32
8.11.1	Mechanical strength	32
Annex AA (informative) Special test for cable overload protection (for fuse system A).....		77
Fuse system B – Cylindrical fuses (NF cylindrical fuse system).....		78
1	General	78
1.1	Scope.....	78
2	Terms and definitions	78
3	Conditions for operation in service.....	78
4	Classification.....	79
5	Characteristics of fuses	79
5.2	Rated voltage	79
5.3.1	Rated current of the fuse-link.....	79
5.3.2	Rated current of the fuse-holder	79
5.5	Rated power dissipation of a fuse-link and rated acceptable power dissipation of a fuse-holder	79
5.6.2	Conventional times and currents.....	79
5.6.3	Gates	80
5.7.2	Rated breaking capacity	80
6	Markings	80
7	Standard conditions for construction.....	80
7.1	Mechanical design.....	80
7.1.2	Connections including terminals	80
7.1.6	Construction of a fuse-carrier	81
7.1.7	Construction of a fuse-link	81
7.1.8	Non-interchangeability.....	81
7.1.9	Construction of a fuse-base.....	81
7.2	Insulating properties and suitability for isolation	82

7.3	Temperature rise, power dissipation of the fuse-link and acceptable power dissipation of the fuse-holder.....	83
7.7	I^2t characteristics	83
7.7.1	Pre-arcing I^2t values	83
7.7.2	Operating I^2t values	83
7.8	Overcurrent discrimination of "gG" fuse-links.....	83
7.9	Protection against electric shock	83
8	Tests	84
8.1.6	Testing of fuse-holders	84
8.3.1	Arrangement of the fuse	84
8.3.3	Measurement of the power dissipation of the fuse-link.....	85
8.4	Verification of operation	86
8.4.1	Arrangement of the fuse	86
8.5	Verification of the breaking capacity.....	86
8.5.1	Arrangement of the fuse	86
8.5.5	Test method	87
8.5.8	Acceptability of test results.....	87
8.7.4	Verification of overcurrent discrimination	87
8.8	Verification of the degree of protection of enclosures	87
8.8.1	Verification of protection against electric shock	87
8.9	Verification of resistance to heat	87
8.10	Verification of non-deterioration of contacts.....	88
8.10.1	Arrangement of the fuse	88
8.10.2	Test method	88
8.10.3	Acceptability of test results.....	88
8.12	Verification of the reliability of terminals	92

Fuse system C – Cylindrical fuses (BS cylindrical fuse system) 101

1	General	101
1.1	Scope.....	101
2	Terms and definitions	101
3	Conditions for operation in service.....	101
4	Classification.....	101
5	Characteristics of fuses	102
5.2	Rated Voltage	102
5.3	Rated current	102
5.3.1	Rated current of the fuse-link.....	102
5.3.2	Rated current of the fuse-holder	102
5.5	Rated power dissipation of a fuse-link and rated acceptable power dissipation of a fuse-holder	102
5.6	Limits of time-current characteristics	102
5.6.1	Time-current characteristics, time-current curves and overload curves	102
5.6.2	Conventional times and currents.....	102
5.7	Breaking range and breaking capacity	102
5.7.2	Rated breaking capacity	102
6	Markings	103
7	Standard conditions for construction.....	103

7.1	Mechanical design.....	103
7.1.2	Connections including terminals	103
7.1.6	Construction of a fuse-carrier	103
7.1.7	Construction of a fuse-link	103
7.1.8	Non-interchangeability.....	103
7.1.9	Construction of a fuse-base.....	103
7.2	Insulating properties and suitability for isolation	103

- 8.11—Mechanical and miscellaneous tests

Fuse system E – Pin-type fuses

- 1—General
- 1.1—Scope
- 2—Terms and definitions
- 2.3—Characteristic quantities
- 3—Conditions for operation in service
- 4—Classification
- 5—Characteristics of fuses
- 5.3.3—Rated current of the gauge-piece
- 5.5—Rated power dissipation of the fuse-link
- 5.6—Limits of time-current characteristics
- 5.6.2—Conventional times and currents
- 5.6.3—Gates
- 5.7.2—Rated breaking capacity
- 6—Markings

6.1	Markings of fuse holders
6.2	Markings of fuse links
6.4	Markings of the gauge pieces
7	Standard conditions for construction
7.1.4	Construction of the gauge piece
7.1.6	Construction of a fuse carrier
7.1.7	Construction of a fuse-link
7.1.8	Non-interchangeability
7.1.9	Construction of a fuse base
7.3	Temperature rise, power dissipation of the fuse-link and acceptable power dissipation of the fuse holder
7.9	Protection against electric shock
8	Tests
8.3	Verification of temperature rise and power dissipation
8.3.1	Arrangement of the fuse
8.3.3	Measurement of the power dissipation of the fuse-link
8.3.4	Test method
8.5.5	Test method
8.10	Verification of non-deterioration of contacts
8.10.1	Arrangement of the fuse
8.10.2	Test method
8.10.3	Acceptability of test results
	Fuse system F – Cylindrical fuse-links for use in plugs (BS plugtop system) 148
1	General 148
1.1	Scope 148
2	Terms and definitions 148
3	Conditions for operation in service 148
4	Classification 148
5	Characteristics of fuses 148
5.2	Rated voltage 148
5.3.1	Rated current of the fuse-link 149
5.3.2	Rated current of the fuse-holder 149
5.5	Rated power dissipation of a fuse-link and rated acceptable power dissipation of a fuse-holder 149
5.6.1	Time-current characteristics, time-current zones and overload curves 149
5.6.2	Conventional times and currents 149
5.6.3	Gates 149
5.7.2	Rated breaking capacity 149
6	Markings 149
7	Standard conditions for construction 150
7.1.7	Construction of a fuse-link 150
7.1.8	Non-interchangeability 150
7.2	Insulating properties and suitability for isolation 150
7.3	Temperature rise, power dissipation of the fuse-link and acceptable power dissipation of the fuse-holder 150
7.7	I^2t characteristics 150
7.7.1	Pre-arcing I^2t values 150

7.9	Protection against electric shock	150
8	Tests	151
8.1.4	Arrangement of the fuse-link for tests	151
8.1.5	Testing of fuse-links	151
8.2.4	Acceptability of test results	152
8.3	Verification of temperature rise and power dissipation	153
8.3.1	Arrangement of the fuse	153
8.3.4	Test method	153
8.3.5	Acceptability of test results	153
8.4	Verification of operation	153
8.4.1	Arrangement of the fuse	153
8.5	Breaking-capacity tests	154
8.5.1	Arrangement of the fuse	154
8.5.2	Characteristics of the test circuit	154
8.5.4	Calibration of the test circuit	154
8.5.5	Test method	154
8.5.8	Acceptability of test results	154
8.7	Verification of I^2t characteristics and overcurrent discrimination	155
8.7.3	Verification of compliance for fuse-links at 0,01 s	155
8.10	Verification of non-deterioration of contacts	155
8.11.1	Mechanical strength	155

Table 205 – Nominal section of copper conductors that the terminals shall accept.....	81
Table 206 – Creepage distances and clearances.....	82
Table 207 – Temperature rise limits for terminals.....	83
Table 208 – Pre-arcing I^2t values at 0,01 s for "gG" fuse-links.....	83
Table 209 – Survey of tests on fuse-link.....	84
Table 210 – Survey of tests on fuse-holder and number of fuse-holders to be tested.....	84
Table 211 – Screw-thread diameters and applied torques.....	85
Table 212 – Values concerning the choice and the adjustment of the test base.....	86
Table 213 – Values for adjustment of the test base.....	86
Table 214 – Hammer and height of fall for test for verification of resistance to shocks.....	90
Table 215 – Torque to be applied to the fuse-carrier.....	91
Table 216 – Mechanical strength of screw-thread.....	91
Table 301 – Conventional time and current for "gG" fuse-links.....	102
Table 302 – Temperature-rise limits for terminals.....	104
Table 303 – Mechanical strength of screw-thread.....	106
Table 401 – Fuse links: rated currents, sizes and colours of indicating devices (if any).....	
Table 402 – Rated currents of fuse holders.....	
Table 403 – Maximum rated power dissipation of fuse links.....
