### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: [www.iec.ch/webstore/custserv](http://www.iec.ch/webstore/custserv)

If you wish to give us your feedback on this publication or need further assistance, please visit the Customer Service Centre FAQ or contact us:

## CONTENTS

FOREWORD.....	13
INTRODUCTION.....	13
1 Scope.....	14
1.1 General.....	14
1.2 Specifications.....	14
1.3 Procedures.....	14
1.4 Applicability.....	14
1.5 Conformance.....	14
2 Normative references.....	15
3 Terms, definitions, abbreviated terms, acronyms, and conventions.....	15
3.1 Terms and definitions.....	15
3.2 Abbreviated terms and acronyms.....	20
4 Physical Layer.....	23
5 TDMA Data Link layer.....	24
5.1 Purpose.....	24
5.2 Overview.....	25
5.2.1 TDMA Basics.....	25
5.2.2 Mesh Networking.....	27
5.2.3 Network Maintenance.....	28
5.2.4 Time Keeping.....	28
5.3 Data-Link Layer Services.....	29
5.3.1 General.....	29
5.3.2 Message SPs.....	29
5.3.3 Management SPs.....	33
5.4 Logical Link Control.....	35
5.4.1 The DLPDU.....	35
5.4.2 DLPDU Types.....	39
5.4.3 DLPDU Priority and Flow Control.....	41
5.4.4 Error Detection Coding and Security.....	42
5.5 Medium Access Control.....	43
5.5.1 General.....	43
5.5.2 Slot Timing.....	44
5.5.3 Communication Tables and Buffers.....	46
5.5.4 Link Scheduling.....	52
5.5.5 MAC Operation.....	56
5.6 Physical Layer-Specific Requirements.....	64
6 Network Management.....	65
6.1 Purpose.....	65
6.2 WirelessHART™.....	65
6.2.1 General.....	65
6.2.2 Mesh Networks.....	66
6.2.3 WirelessHART Network Components.....	67
6.2.4 Message Routing.....	71
6.2.5 Security.....	73
6.3 Network Layer Services.....	74

6.3.1	General .....	74
6.3.2	Network Layer Message SPs .....	74
6.3.3	WirelessHART Network Layer Management Services .....	78
6.4	WirelessHART Network Layer .....	81
6.4.1	General .....	81
6.4.2	Wireless Network Layer PDUs .....	81
6.4.3	Wireless Transport Layer.....	89
6.4.4	Wireless Network Layer Operation.....	96
6.4.5	WirelessHART Procedures .....	104
7	Wireless Devices .....	119
7.1	Purpose .....	119
7.2	Overview .....	119
7.2.1	General .....	119
7.2.2	WirelessHART Network Components.....	119
7.3	WirelessHART Field Devices.....	122
7.3.1	Overview .....	122
7.3.2	General Requirements.....	122
7.3.3	Maintenance Port .....	122
7.3.4	WirelessHART Interface .....	123
7.4	Wireless Adapter .....	125
7.4.1	Overview .....	125
7.4.2	General Requirements.....	126
7.4.3	WirelessHART Interface .....	126
7.5	WirelessHART Gateway .....	127
7.5.1	Overview to this subclause .....	127
7.5.2	General Requirements.....	128
7.5.3	Gateway Model.....	130
7.5.4	Gateway Management.....	136
7.5.5	WirelessHART Gateway Superframe .....	138
7.5.6	Gateway Change Notification Services .....	138
7.5.7	HART Commands Interface .....	140
7.6	WirelessHART Network Manager.....	144
7.6.1	General .....	144
7.6.2	Core Network Functions .....	146
7.6.3	Network Manager Requirements.....	149
7.6.4	Network Manager Model.....	150
7.6.5	Routing.....	161
7.6.6	Scheduling .....	162
7.6.7	Network Manager Interface.....	168
7.7	Handheld Devices .....	173
7.7.1	General .....	173
7.7.2	General Requirements.....	174
7.7.3	Maintenance Port Connection.....	174
7.7.4	Network Device Connection.....	174
7.7.5	Network Connection as a Maintenance Device .....	175
7.8	Redundancy .....	176
8	Wireless Network and Gateway Commands.....	178
8.1	Overview .....	178
8.2	Subject.....	179

8.3	WirelessHART Command Overview.....	179
8.3.1	Physical Layer Commands .....	179
8.3.2	Data Link Layer Commands.....	179
8.3.3	Network Layer Commands.....	180
8.3.4	Network Manager Commands.....	181
8.3.5	Gateway Commands.....	181
8.3.6	Wireless Application Commands.....	182
8.4	NETWORK Commands.....	183
8.4.1	General .....	183
8.4.2	Command 768 Write Join Key.....	183
8.4.3	Command 769 Read Join Status.....	184
8.4.4	Command 770 Request Active Advertising .....	184
8.4.5	Command 771 Force Join Mode .....	185
8.4.6	Command 772 Read Join Mode Configuration .....	186
8.4.7	Command 773 Write Network Id .....	187
8.4.8	Command 774 Read Network Id .....	188
8.4.9	Command 775 Write Network Tag .....	188
8.4.10	Command 776 Read Network Tag .....	189
8.4.11	Command 777 Read Wireless Device Capabilities.....	189
8.4.12	Command 778 Read Battery Life .....	190
8.4.13	Command 779 Report Device Health .....	190
8.4.14	Command 780 Report Neighbor Health List.....	191
8.4.15	Command 781 Read Device Nickname Address .....	192
8.4.16	Command 782 Read Session List.....	192
8.4.17	Command 783 Read Superframe List.....	193
8.4.18	Command 784 Read Link List.....	194
8.4.19	Command 785 Read Graph List.....	194
8.4.20	Command 786 Read Neighbor Property Flag.....	195
8.4.21	Command 787 Report Neighbor Signal Levels.....	195
8.4.22	Command 788 Alarm "Path Down".....	196
8.4.23	Command 789 Alarm "Source Route Failed".....	196
8.4.24	Command 790 Alarm "Graph Route Failed".....	197
8.4.25	Command 791 Alarm "Transport Layer Failed".....	197
8.4.26	Command 793 Write UTC Time Mapping .....	198
8.4.27	Command 794 Read UTC Time Mapping.....	198
8.4.28	Command 795 Write Timer Interval.....	199
8.4.29	Command 796 Read Timer Interval .....	200
8.4.30	Command 797 Write Radio Power Output.....	200
8.4.31	Command 798 Read Radio Output Power.....	201
8.4.32	Command 799 Request Service.....	202
8.4.33	Command 800 Read Service List.....	203
8.4.34	Command 801 Delete Service .....	204
8.4.35	Command 802 Read Route List.....	204
8.4.36	Command 803 Read Source-Route.....	205
8.4.37	Command 804 Read CCA Mode .....	205
8.4.38	Command 805 Write CCA Mode .....	206
8.4.39	Command 806 Read Handheld Superframe .....	207
8.4.40	Command 807 Request Handheld Superframe Mode.....	207
8.4.41	Command 808 Read Packet Time-to-Live .....	208

8.4.42	Command 809 Write Packet Time-to-Live .....	208
8.4.43	Command 810 Read Join Priority .....	209
8.4.44	Command 811 Write Join Priority.....	209
8.4.45	Command 812 Read Packet Receive Priority.....	210
8.4.46	Command 813 Write Packet Receive Priority.....	210
8.4.47	Command 814 Read Device List Entries .....	211
8.4.48	Command 815 Add Device List Table Entry .....	211
8.4.49	Command 816 Delete Device List Table Entry .....	212
8.4.50	Command 817 Read Channel Blacklist .....	213
8.4.51	Command 818 Write Channel Blacklist .....	214
8.4.52	Command 819 Read Back-Off Exponent.....	214
8.4.53	Command 820 Write Back-Off Exponent.....	215
8.4.54	Command 821 Write Network Access Mode.....	216
8.4.55	Command 822 Read Network Access Mode.....	216
8.4.56	Command 823 Request Session .....	217
8.5	Gateway and Network Manager Commands .....	217
8.5.1	Command 832 Read Network Device Identity using Unique ID .....	217
8.5.2	Command 833 Read Network Device's Neighbor Health .....	218
8.5.3	Command 834 Read Network Topology Information .....	219
8.5.4	Command 835 Read Publish Data Message List.....	220
8.5.5	Command 836 Flush Cached Responses for a Device .....	220
8.5.6	Command 836 Write Update Notification Bit Mask for a Device .....	221
8.5.7	Command 838 Read Update Notification Bit Mask for a Device .....	221
8.5.8	Command 839 Change Notification.....	222
8.5.9	Command 840 Read Network Device's Statistics .....	223
8.5.10	Command 841 Read Network Device Identity using Nickname.....	223
8.5.11	Command 842 Write Network Device's Scheduling Flags.....	224
8.5.12	Command 843 Read Network Device's Scheduling Flags .....	225
8.5.13	Command 844 Read Network Constraints.....	225
8.5.14	Command 845 Write Network Constraints.....	226
8.6	Network Management Configuration Commands .....	226
8.6.1	Command 960 Disconnect Device .....	226
8.6.2	Command 961 Write Network Key .....	227
8.6.3	Command 962 Write Device Nickname Address .....	228
8.6.4	Command 963 Write Session.....	228
8.6.5	Command 964 Delete Session.....	229
8.6.6	Command 965 Write Superframe .....	230
8.6.7	Command 966 Delete Superframe .....	231
8.6.8	Command 967 Write Link.....	231
8.6.9	Command 968 Delete Link.....	232
8.6.10	Command 969 Write Graph/Neighbor Pair .....	233
8.6.11	Command 970 Delete Graph Connection .....	234
8.6.12	Command 971 Write Neighbor Property Flag .....	234
8.6.13	Command 972 Write Network Suspend.....	235
8.6.14	Command 973 Write Service .....	236
8.6.15	Command 974 Write Route.....	237
8.6.16	Command 975 Delete Route.....	237
8.6.17	Command 976 Write Source-Route.....	238
8.7	Device Specific Wireless-NETWORK Commands .....	239

8.7.1	General .....	239
8.7.2	Command 64 512 Read Wireless Module Revision .....	239
9	Application Layer addendum – Device Commands.....	241
9.1	Subject.....	241

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**INDUSTRIAL COMMUNICATION NETWORKS –  
FIELDBUS SPECIFICATIONS –****WirelessHART™ communication network and communication profile**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

A PAS is a technical specification not fulfilling the requirements for a standard, but made available to the public.

IEC/PAS 62591 has been processed by subcommittee 65C: Industrial networks of IEC technical committee 65: Industrial-process measurement, control and automation.

**NOTE** Use of some of the associated protocol Types in the IEC 61158 series are restricted by their intellectual-property-right holders. In all cases, the commitment to limited release of intellectual property rights made by the holders of those rights permits a particular Data-Link layer protocol Type to be used with physical layer and application layer protocols in Type combinations as specified explicitly in the IEC 61784 series. Use of the various protocol Types in other combinations may require permission from their respective intellectual property right holders.

IEC draws attention to the fact that it is claimed that compliance with this publication may involve the use of patents. IEC takes no position concerning the evidence, validity and scope of these patent rights.

The text of this PAS is based on the following document:

This PAS was approved for publication by the P-members of the committee concerned as indicated in the following document

<b>Draft PAS</b>	<b>Report on voting</b>
65C/506A/PAS	65C/513/RVD

Following publication of this PAS, which is a pre-standard publication, the technical committee or subcommittee concerned may transform it into an International Standard.

This PAS shall remain valid for an initial maximum period of 3 years starting from the publication date. The validity may be extended for a single 3-year period, following which it shall be revised to become another type of normative document, or shall be withdrawn.

## INTRODUCTION

This IEC/PAS 62591 provides the specification, definitions, and profile of a future standard covering additions to IEC 61158 and additions to IEC 61784-1.

IEC 61158-5-20 Ed. 1 and IEC 61158-6-20 Ed.1 contain the application layer. This document adds the following:

- data link layer protocol specification;
- data link layer service definitions;
- fieldbus profile addendum for the data link layer specifying the wireless physical layer.

This document does not provide the required structure of the IEC 61158 series (for example separation of DL-service definitions and DL-protocol specification) and of the IEC 61784-1 series. The required structure will be provided during the process of becoming an International Standard.

The Type 20 protocol supports two-way digital communications for process measurement and control devices. Applications include remote process variable interrogation, cyclical access to process data, parameter setting and diagnostics. This document defines the specification that comprises the Type 20 field communications protocol for wireless devices. Specification of the Type 20 protocol is based largely on the OSI 7-Layer Communication Model (see Figure 1).

OSI Layer	Function	WirelessHART
<b>Application</b>	Provides the User with Network Capable Application	Command Oriented, Predefined Data Types and Application Procedures Auto-Segmented transfer of large data sets
<b>Presentation</b>	Converts Application Data Between Network and Local Machine Formats	
<b>Session</b>	Connection Management Services for Applications	Secured Session between Network Devices
<b>Transport</b>	Provides Network Independent, Transparent Message Transfer	Reliable stream transport, Negotiated Segment Sizes
<b>Network</b>	End to End Routing of Packets. Resolving Network Addresses	Power-Optimized Redundant Path, Mesh to the edge Network
<b>Data Link</b>	Establishes Data Packet Structure, Framing, Error Detection, Bus Arbitration	Secure & Reliable, Time Synced, TDMA/CSMA, Frequency Agile with ARQ
<b>Physical</b>	Mechanical / Electrical Connection. Transmits RawBit Stream	2.4GHz Wireless, 802.15.4 based radios, 10dBm Tx Power
