About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: www.iec.ch/searchpub

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: www.iec.ch/online_news/justpub

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

[IEC 61300-3-46:2011](tel:+41229190300)

- Electropedia: www.electropedia.org www.iteh.ai/catalog/standards/sist/ae976d5a-72cd-4874-b348-

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: www.iec.ch/searchpub/cur_fut-f.htm

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: www.iec.ch/online_news/justpub

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: www.iec.ch/webstore/custserv/custserv_entry-f.htm

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61300-3-46 has been prepared by subcommittee SC86B: Fibre optic interconnecting devices and passive components, of IEC technical committee TC86: Fibre optics.

The text of this standard is based on the following documents:

CDV	Report on voting
86B/3076/CDV	86B/3165/RVC

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

FIBRE OPTIC INTERCONNECTING DEVICES AND PASSIVE COMPONENTS – BASIC TEST AND MEASUREMENT PROCEDURES –

Part 3-46: Measurement – Bore diameter for guide pin in MT ferrules

1 Scope

The purpose of this part of IEC 61300 is to provide a standard for the measurement of guide pin bore diameters in thermoplastic and thermoset MT ferrules specified in IEC 61754-5.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 61300-3-1, *Fibre optic interconnecting devices and passive components – Basic test and measurement procedures – Part 3-1: Examinations and measurements, Visual examination.*

IEC 61754-5, *Fibre optic connector interfaces - Part 5: Type MT connector family*
[IEC 61300-3-46:2011](https://standards.iteh.ai/catalog/standards/sist/ae976d5a-72cd-4874-b348-23f8e9da9cd4/iec-61300-3-46-2011)

3 General description

<https://standards.iteh.ai/catalog/standards/sist/ae976d5a-72cd-4874-b348-23f8e9da9cd4/iec-61300-3-46-2011>

3.1 Pin specifications

See Table 1 for pin specifications.

Table 1 – Pin specifications

Material	Tungsten Carbide Steel
Pin Diameter ranges (mm)	0,69 895 to 0,69 905
	0,69 905 to 0,69 915
	0,69 915 to 0,69 925
	0,69 925 to 0,69 935
	0,69 935 to 0,69 945
	0,69 945 to 0,69 955
	0,69 955 to 0,69 965
	0,69 965 to 0,69 975
	0,69 975 to 0,69 985
	0,69 985 to 0,69 995
0,69 995 to 0,70 005	
Cylindricity	100,0 nm or better
Surface finish	0,2 µm

3.2 Test conditions

See Table 2 for test conditions.

Table 2 – Test conditions

Temperature (T)	Relative Humidity (RH)	Total Assembly Mass g
21,0 °C to 25,0 °C	50,0% RH \pm 10,0 %	100,0 +/- 5,0 g

3.3 Apparatus

The apparatus shall include the following elements:

Traceable, calibrated gauge pins of tungsten carbide steel, 0,698 95 mm to 0,700 05 mm in 100 nm increments;

Pin vice with rod and platform to hold calibrated mass elements, the mass of which is sufficient to make the entire assembly 100,0 g total.

Fixturing should ensure that the assembly is free to hang vertically during testing.

Both pins and test parts should be as clean as possible to ensure an accurate measurement.

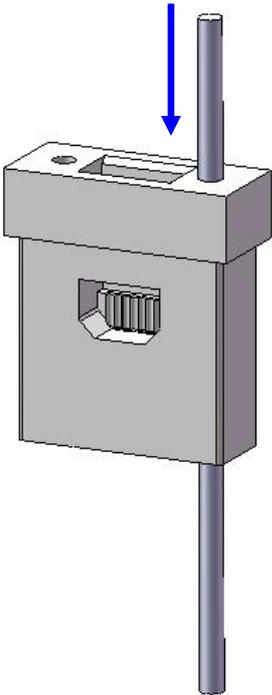

4 Procedure

Parts should be preconditioned using the conditions in 3.2 for a minimum of 24 hours.

Once conditioned, a calibrated gauge pin is pushed into the ferrule until it clears the ferrule end as shown in Figure 1. Start with a pin that should fit freely in the part under test. Rear entry is recommended where possible to reduce the risk of ferrule end face damage. (For fully assembled product, front entry may be used as an alternative to disassembly as shown in Figure 3.) After the pin engages the full bore ID length, the pin vice is secured to the calibrated gauge pin/ferrule vice assembly as shown in Figure 2. The mass is gradually released, pulling the pin through the bore.

This procedure is repeated using increasingly larger pins until the 100,0 g \pm 5,0 g mass cannot freely pull the pin out of the bore. Once this state is reached, the previous pin's diameter is recorded as the effective diameter of the guide pin bore.

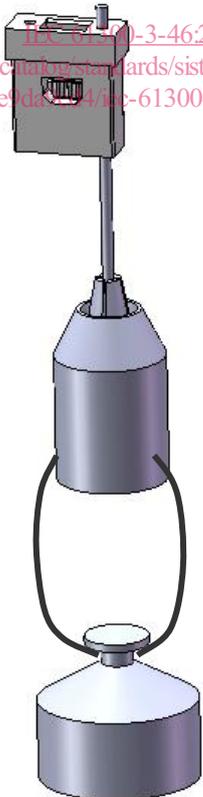

Repeat the above procedure for the opposite hole.

IEC 1208/11

Figure 1 – Gauge pin through ferrule
(standards.iteh.ai)

<https://standards.iteh.ai/catalog/standards/sist/ae976d5a-72cd-4874-b348-23f8e4d4/iec-61300-3-46-2011>

IEC 1209/11

Figure 2 – An example of a complete measurement apparatus with ferrule

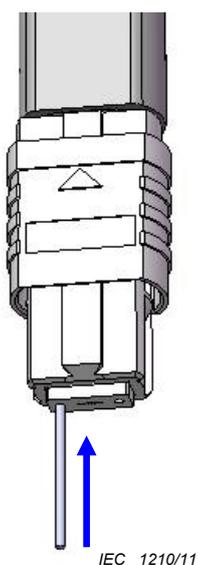

Figure 3 – An example of front loading the pin in an assembled connector

5 Post test examination

After the test is completed, visually examine the specimens in accordance with IEC 61300-3-1. Check for damage to the exit region of the guide pin bore breakage, chipping or scratching of the ferrule face

6 Details to be specified

- Test conditions
- Size range of pins used
- Final size of each bore
