This European Standard was approved by CEN on 15 August 2002.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 1503-4:2002) has been prepared by Technical Committee CEN /TC 69, "Industrial valves", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2003, and conflicting national standards shall be withdrawn at the latest by June 2003.

EN 1503 "Valves – Materials for bodies, bonnets and covers" consists of four parts:

- *Part 1: Steels specified in European Standards.*
- *Part 2: Steels other than those specified in European Standards.*
- *Part 3: Cast Irons specified in European Standards.*
- *Part 4: Copper alloys specified in European Standards.*

iTeh STANDARD PREVIEW (standarditeh.a)

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom. [SIST EN 1503-4:2003](#)

EN 1503-4:2002 (E)

1 Scope

This European Standard lists copper alloys for pressure containing valve bodies, bonnets and covers which are specified in European Standards.

2 Normative references

This European Standard incorporates, by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references, the latest edition of the publication referred to applies (including amendments).

EN 1982, *Copper and copper alloys — Ingots and castings*.

EN 12163, *Copper and copper alloys — Rod for general purposes*.

EN 12164, *Copper and copper alloys — Rod for free machining purposes*.

EN 12167, *Copper and copper alloys — Profiles and rectangular bar for general purposes*.

EN 12168, *Copper and copper alloys — Hollow rod for free machining purposes*.

iTeh STANDARD PREVIEW
EN 12420, *Copper and copper alloys — Forgings*.

EN 12449, *Copper and copper alloys — Seamless, round tubes for general purposes*.

3 Materials

<https://standards.iteh.ai/catalog/standards/sist/63ff9663-e5dd-492a-a8ad-c262a2f14503/sist-en-1503-4-2003>

3.1 General

The materials shall be as given in Tables 1 and 2.

The selection of materials should take account of the intended use and all reasonably foreseeable operation conditions. Selecting materials from Group 1 will provide some assurance of their suitability for valve bodies, bonnets and covers, whereas selecting from Group 2 will not provide the same assurance.

Due consideration should be given to all reasonably foreseeable degradation mechanism (e.g. corrosion, creep, fatigue) that may occur in some applications.

3.2 Group 1 materials

Table 1 lists copper alloys specified in European material standards which have been in regular use for valve bodies, bonnets and covers.

Table 1 - Group 1 materials

Type of alloy	Material designation		Material standard number	Allowable temperature range ^b °C	
	Symbol	Number			
Copper-aluminium alloys	CuAl10Fe2-C	CC331G	EN 1982	– 10 to 260	
	CuAl10Fe5Ni5-C	CC333G		– 10 to 350	
Copper-tin alloys	CuSn6	CW452K	EN 12449	– 10 to 200	
	CuSn5Zn5Pb5-C	CC491K	EN 1982	– 10 to 260	
	CuSn7Zn2Pb3-C	CC492K			
	CuSn7Zn4Pb7-C	CC493K			
	CuSn6Zn4Pb2-C	CC498K			
Copper-zinc-lead alloys	CuZn36Pb2As	CW602N	EN 12420 ^a	– 10 to 200	
	CuZn39Pb3	CW614N			
	CuZn40Pb2	CW617N			
Complex copper-zinc alloys	CuZn32Pb2AsFeSi	CW709R	EN 12163	– 10 to 200	
	CuZn33Pb2Si-C	CC751S	EN 1982		
	CuZn39Pb1Al-C	CC754S			

NOTE In this table, only alloy numbers CC331G, CC333G, CC491K, CC492K and CC498K are specified in prEN 1092-3 and prEN 1759-3 as being suitable for use with valve bodies having integral flanges.

^a Forging material is indicated but other material forms selected from EN 12164, EN 12167 or EN 12449 are permitted.

^b When used at temperatures below – 10 °C, the user should refer to the material manufacturer.

3.3 Group 2 materials

Table 2 lists copper alloys specified in European material standards which may be used for valve bodies, bonnets and covers.

Table 2 - Group 2 materials

Type of alloy	Material designation		Material/form to be selected from:						
	Symbol	Number	EN 1982	EN 12163	EN 12164	EN 12167	EN 12168	EN 12420	EN 12449
