### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

#### IEC Catalogue - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in 14 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Glossary - [std.iec.ch/glossary](http://std.iec.ch/glossary)

More than 55 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [csc@iec.ch](mailto:csc@iec.ch).

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Catalogue IEC - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 14 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

#### Recherche de publications IEC - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### Glossaire IEC - [std.iec.ch/glossary](http://std.iec.ch/glossary)

Plus de 55 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [csc@iec.ch](mailto:csc@iec.ch).

## CONTENTS

FOREWORD.....	8
INTRODUCTION.....	10
1 Scope.....	11
2 Normative references .....	12
3 Terms and definitions .....	13
4 Parcel use cases and scenarios.....	18
4.1 Typical use cases .....	18
4.2 Spreadsheet representation of dictionary or library .....	18
4.3 Use scenario of dictionary parcel format .....	19
4.4 Use scenario of library parcel format .....	20
4.5 Use scenario of parcel format of higher layers .....	21
5 The Parcellized Ontology Model (POM).....	21
5.1 Overview of the parcel structure .....	21
5.2 Meta dictionary approach .....	24
5.3 Identification structure .....	25
5.4 Typical modelling constructs of POM .....	27
5.4.1 Specialization tree versus composition tree .....	27
5.4.2 Property specialization .....	27
5.4.3 Divide between specialization and generalization.....	28
5.4.4 Property specialization and cardinality .....	29
5.4.5 Property specialization and alternate ID .....	30
5.4.6 Mapping classes and properties by alternate ID .....	30
5.4.7 Unit with variable prefix..... <a href="http://standards.iec.ch/catalog/standards/sist/4127b9cb-a5b0-4a2c-8224-8e6276558589/iec-62656-1-2014">http://standards.iec.ch/catalog/standards/sist/4127b9cb-a5b0-4a2c-8224-8e6276558589/iec-62656-1-2014</a>	31
5.4.8 Dependent condition .....	31
5.4.9 Use of dependent condition for time dependent property .....	32
5.4.10 Class valued property .....	32
5.4.11 Class selector with class valued property and class reference.....	33
5.4.12 Metamorphic or polymorphic classes .....	33
5.5 Type system extension for data parcels .....	34
5.5.1 Extended data types and updates from IEC 61360-2:2002 .....	34
5.5.2 ICID_STRING .....	34
5.5.3 IRDI_STRING .....	34
5.5.4 STRING_TYPE and its extensions.....	34
5.5.5 STRING_TYPE and its enumerated simple subtypes.....	35
5.5.6 STRING_TYPE and its enumerated reference subtypes .....	35
5.6 Structure of a parcelling sheet.....	36
5.7 File name extension .....	37
5.8 CSV representation of parcel format .....	37
5.9 Basic use of parcels .....	38
5.10 Header section.....	38
5.10.1 Categories of instructions.....	38
5.10.2 Mandatory .....	38
5.10.3 Optional - functional.....	39
5.10.4 Optional - informative .....	39
5.10.5 Comment.....	39
5.10.6 Reserved words .....	39

5.11 Instruction Column .....	39
5.11.1 General rule.....	39
5.11.2 Class ID.....	39
5.11.3 Preferred name of the class .....	40
5.11.4 Definition of the class.....	40
5.11.5 Note for the class .....	41
5.11.6 Alternate class ID.....	41
5.11.7 Super alternate class ID .....	42
5.11.8 Sub-alternate class ID .....	42
5.11.9 Source language.....	42
5.11.10 Parcel mode .....	43
5.11.11 Parcel identifier.....	43
5.11.12 Parcel conformance class identifier .....	44
5.11.13 Default supplier.....	44
5.11.14 Default version.....	45
5.11.15 Default data supplier.....	45
5.11.16 Default data version .....	46
5.11.17 Data object identifier name.....	47
5.11.18 Property ID .....	47
5.11.19 Preferred name of the property .....	48
5.11.20 Definition .....	49
5.11.21 Note .....	50
5.11.22 Data type.....	50
5.11.23 Unit of measurement.....	51
5.11.24 Requirement .....	52
<a href="https://standards.iteh.ai/catalog/standards/sist/4127b9cb-a5b0-4a2c-8224-888270358397/iec-62656-1-2014">https://standards.iteh.ai/catalog/standards/sist/4127b9cb-a5b0-4a2c-8224-888270358397/iec-62656-1-2014</a>	
5.11.25 Alternative units of measurement .....	52
5.11.26 Variable prefix for the unit .....	53
5.11.27 Super property .....	54
5.11.28 Alternate property ID .....	54
5.11.29 Super alternate ID.....	55
5.11.30 Sub-alternate ID of property .....	56
5.11.31 Equivalent property ID.....	57
5.11.32 ID for the unit of measurement .....	57
5.11.33 Property value format.....	58
5.11.34 Identifier encoding .....	58
5.11.35 Cell delimiter.....	59
5.11.36 Decimal mark.....	59
5.11.37 Pattern constraint.....	60
5.11.38 Relational constraint .....	60
5.12 Data section for instances .....	61
5.12.1 General .....	61
5.12.2 Enumeration types or non quantitative types.....	62
5.12.3 Level type .....	62
5.12.4 String type .....	63
5.12.5 Translatable string type.....	63
5.12.6 Boolean type.....	63
5.12.7 Class reference type (Class instance type) .....	63
5.12.8 Aggregate type .....	64
5.12.9 Named type .....	66

5.12.10	Placement types .....	67
5.12.11	Entity instance type.....	67
6	Use of parcel for Domain Ontology description .....	67
6.1	Dictionary as an instance of meta-dictionary .....	67
6.2	Identification of conjunctive parcels .....	70
6.3	Roles and definition of dictionary parcels .....	70
6.4	Properties of meta-dictionary (meta-ontology).....	71
6.4.1	Overview of meta-classes .....	71
6.4.2	Meta-properties for dictionary meta-class .....	72
6.4.3	Meta-properties for class meta-class .....	73
6.4.4	Meta-properties for property meta-class.....	74
6.4.5	Meta-properties for supplier meta-class .....	75
6.4.6	Meta-properties for enumeration meta-class .....	76
6.4.7	Meta-properties for data-type meta-class.....	77
6.4.8	Meta-properties for document meta-class .....	77
6.4.9	Meta-properties for object meta-class .....	78
6.4.10	Meta-properties for UoM meta-class .....	78
6.4.11	Meta-properties for term meta-class .....	79
6.4.12	Meta-properties for relation meta-class.....	80
7	Use of parcel for meta-ontology (MO) description .....	84
7.1	Overview of meta-meta-classes .....	84
7.2	Meta-properties for class meta-meta-class .....	85
7.3	Meta-properties for property meta-meta-class .....	85
7.4	Meta-properties for term meta-meta-class .....	86
7.5	Meta-properties for relation meta-meta-class .....	87
8	Mechanism for structural extension .....	87
8.1	General.....	87
8.2	Example .....	88
9	Conformance classes for parcelling spreadsheet .....	88
Annex A (normative)	Information object registration .....	90
Annex B (normative)	Meta-dictionary file and updates.....	91
Annex C (normative)	Reserved words.....	92
Annex D (normative)	Description examples of data types .....	95
Annex E (normative)	Meta-properties used by normative meta-classes .....	98
Annex F (normative)	Properties for optional meta-classes.....	119
Annex G (normative)	Predefined classes and properties in Meta-Ontology .....	130
G.1	General.....	130
G.2	Predefined meta-classes in Meta-Ontology .....	130
G.3	Predefined meta-properties in meta-ontology .....	133
Annex H (normative)	Predefined meta-relations in meta-ontology.....	153
Annex I (normative)	Axiomatic properties used by each Meta-meta-class .....	156
Annex J (normative)	Predefined classes and properties in Axiomatic Ontology .....	164
J.1	General.....	164
J.2	Predefined meta-classes in Axiomatic Ontology .....	164
J.3	Predefined meta-properties in Axiomatic ontology .....	166
Annex K (informative)	Mapping of meta-properties to EXPRESS .....	173
K.1	EXPRESS mapping for mandatory meta-classes .....	173

K.2	EXPRESS mapping for optional meta-classes .....	182
Annex L (informative)	Meta-class properties mapped with DIN 4002.....	186
Annex M (informative)	Use case of relation for units and quantities .....	199
Annex N (informative)	Guide for the use of placement data types.....	202
N.1	Primitive coordinates .....	202
N.2	EXPRESS language codes .....	203
Annex O (informative)	Foundation in mathematical-logic .....	205
O.1	Class and property as sets .....	205
O.2	Property specialization explained by set theory .....	207
O.3	Mathematical basis of POM .....	209
Bibliography .....	212

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

### STANDARDIZED PRODUCT ONTOLOGY REGISTER AND TRANSFER BY SPREADSHEETS –

#### Part 1: Logical structure for data parcels

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.  
*8e6276558589/iec-62656-1-2014*
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62656-1 has been prepared by subcommittee 3D, Product properties and classes and their identification, of IEC technical committee 3: Information structures, documentation and graphical symbols.

The text of this standard is based on the following documents:

FDIS	Report on voting
3D/226/FDIS	3D/229/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62656 series, published under the general title *Standardized product ontology register and transfer by spreadsheets*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

## iTeh STANDARD PREVIEW

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

IEC 62656 consists of the following parts, under the general title *Standardized product ontology register and transfer by spreadsheets*:

- Part 1: Logical structure for data parcels;
- Part 2: Application guide for use with IEC CDD;
- Part 31: Interface for common information model.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

## STANDARDIZED PRODUCT ONTOLOGY REGISTER AND TRANSFER BY SPREADSHEETS –

### Part 1: Logical structure for data parcels

#### 1 Scope

This part of IEC 62656 specifies the logical structure for a set of spreadsheets, used as “data parcels”, to define, transfer and register product ontologies. Such ontology descriptions in other literatures or disciplines are sometimes called “reference dictionaries”. Thus the logical data structure described in this standard is named “Parcellized Ontology Model” or “POM” for short, and each vehicle of transport of the model is called a “parcel”, and may be used for definition, transfer, and registering of a reference dictionary as a collection of metadata, or for similar purposes for instances belonging to a certain class of the reference dictionary. Moreover, this ontology model allows for modelling or modifying an ontology model per se as a set of instance data, thus it enables an ontology model to evolve over time.

This part of IEC 62656 also includes a standard mapping between the meta-data of dictionary parcels in the spreadsheet format conforming to this standard and the meta-data represented in IEC 61360-2 compliant EXPRESS model for dictionary exchange.

#### iTeh STANDARD PREVIEW

It is assumed that a tool supporting this part of IEC 62656 may read and write a set of spreadsheet data whose semantics and syntax are defined in this part of standard, where the physical file structure of the spreadsheets may be based on the CSV (Comma Separated Values) format, typically used in a commercial spreadsheet application, or any other tabular formats including XML schema compatible or convertible to the CSV format.

<https://standards.iec.ch/catalog/standards/sis/4127/b9cb-a5b0-4a2c-8224-8e6276558589/iec-62656-1-2014>

The spreadsheet interface structure defined in this part of IEC 62656 contains the following:

- Definition and specification of the logical structure and layout of the spreadsheet interface for definition, transfer, and registering of a reference dictionary;
- Definition and specification of library instance data belonging to a class of a reference dictionary described by a set of spreadsheets conformant to this part of IEC 62656;
- Definition and specification of the meta dictionary that enables the definition and transfer of a reference dictionary as a set of instance data conforming to the meta dictionary;
- Definition and specification of the meta-model as data that enables the definition and transfer of a reference dictionary as a set of instance data conforming to the meta-meta-dictionary
- Specification of the mapping between the dictionary data expressed in the spreadsheet format and the EXPRESS model specified by IEC 61360-2/ISO 13584-42 (with some elements of ISO 13584-25);
- Description of the basic semantic mapping between the dictionary data expressed in the spreadsheet formats defined in this part of IEC 62656 and that of DIN 4002.

The following items are outside the scope of this part of IEC 62656:

- Explanation of the CSV format per se, used in spreadsheet applications;
- Presentation of the data parcels conformant to this part of IEC 62656, such as colouring and sizing of the spreadsheets;
- Specification of the dictionary EXPRESS model conformant to IEC 61360 or ISO 13584 series of standards;
- Normative definition of the mappings between an IEC 61360-ISO 13584 compliant dictionary and another that is based upon a standard other than IEC 61360-ISO 13584;

- Specification of the maintenance procedure of this part of IEC 62656.

This standard is closely related with ISO 13584-35, and developed as a superset or generalisation of the latter. A major difference with the ISO 13584-35 is that this IEC standard enables updates and evolutions in a meta dictionary consisting of meta classes, by which the changes and evolution of an ontology model is realised as an update and modification of the meta dictionary, just by updates and modifications of the instances of the meta-meta dictionary. With this capability, mapping and interfacing with other ontology standards are also facilitated.

## 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

### **3 Terms and definitions**

For the purposes of this document, the following terms and definitions apply.

#### **3.1**

##### **applicable data element type**

data element type defined for an item class and which applies to all items belonging to that class

[IEC 62656-1:2014](#)

#### **3.2**

##### **application**

<https://standards.iteh.ai/catalog/standards/sist/4127b9cb-a5b0-4a2c-8224-8e6276558589/iec-62656-1-2014>

use of software or a standard in an industrial domain

#### **3.3**

##### **Common Data Dictionary**

##### **CDD**

##### **IEC 61360 CDD**

data dictionary (available as IEC 61360-4 database) to be shared among all electrotechnical domains, based on the data model specified by IEC 61360-2 and conforming to the semantic requirements specified by IEC 61360-1

Note 1 to entry: This note applies to the French language only.

#### **3.4**

##### **common dictionary schema**

information model for reference dictionary based on the EXPRESS data model defined in IEC 61360-2 and ISO 13584-42

#### **3.5**

##### **composite property**

collection of properties that can be referenced from a class or classes as a single entity

[SOURCE: ISO 13584-501:2007, 3.8]

#### **3.6**

##### **conjunctive parcels**

parcel sheets that are used together to define a library, reference dictionary, or meta-dictionary
