This European Standard was approved by CEN on 1996-07-24. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

## Foreword

The text of the International Standard from Technical Committee ISO/TC 176 "Quality management and quality assurance" of the International Organization for Standardization (ISO) has been taken over as an European Standard by Technical Board of CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by month of February 1997, and conflicting national standards shall be withdrawn at the latest by February 1997.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

## Endorsement notice

The text of the International Standard ISO 10007:1995 has been approved by CEN as a European Standard without any modification.

NOTE: Normative references to International Standards are listed in annex ZA (normative).

**CORRECTED****Foreword**

The text of the International Standard from Technical Committee ISO/TC 176 "Quality management and quality assurance" of the International Organization for Standardization (ISO) has been taken over as an European Standard by Technical Board of CEN.

This European standard is a guidance document only. It provides a set of guidelines which may be used to improve performance in the field concerned.

Whether and to what extent, the individual clauses are applicable to an organization depends on a set of characteristics which are specific to that organization. These characteristics could typically include the complexity of the organization, the nature of its products, operational methods and the skills and equipment available.

It also depends on the current performance level of, and objectives set by, the organization.

It follows, that the appropriate application of this guidance document can only be determined by the organization itself.

This guidance document is not to be used to interpret the requirements of EN ISO 9001, EN ISO 9002, EN ISO 9003 or other standards. Neither this document nor its individual clauses are intended for contractual or regulatory use.

**(standards.iteh.ai)**

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 1997, and conflicting national standards shall be withdrawn at the latest by February 1997.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

**Endorsement notice**

The text of the International Standard ISO 10007:1995 has been approved by CEN as a European Standard without any modification.

NOTE: Normative references to International Standards are listed in annex ZA (normative).

**Annex ZA (normative)**  
**Normative references to international publications**  
**with their relevant European publications**

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10007 was prepared by Technical Committee ISO/TC 176, *Quality management and quality assurance*, Subcommittee SC 2, *Quality systems*.

Annex A forms an integral part of this International Standard. Annexes B, C and D are for information only.

<https://standards.iteh.ai/catalog/standards/sist/7efdfb71-1f4f-4fa1-9dbe-414576b9553f/sist-en-iso-10007-1997>

## Introduction

This International Standard provides guidelines for configuration management. This is a management discipline that is applied over the life cycle of a product to provide visibility and control of its functional and physical characteristics. The activities described are a way of satisfying certain requirements found in other International Standards in the ISO 9000 family.

A further goal of the guidelines is to enhance common understanding of the subject, to encourage organizations applying configuration management to improve their performance, to align the approach throughout industry and to improve national and international cooperation.
