About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and definitions clause of IEC publications issued between 2002 and 2015. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et définitions des publications IEC parues entre 2002 et 2015. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

17.4.4	Requirements	43
17.4.5	Details to be specified	43
17.4.6	Calculation of drop weight and height	43
18	Method E14: Compound flow (drip)	44
19	Method E15: Bleeding and evaporation	45
20	Method E16: [Title unknown] (deleted)	50
21	Method E17: Bending stiffness	50
21.1	Object	50
21.2	General	50
21.3	Method E17A: Three-point bend	51
21.3.1	Sample	51
21.3.2	Apparatus	51
21.3.3	Procedure	51
21.3.4	Requirements	52
21.3.5	Details to be specified	52
21.4	Method E17B: cantilever bend	52
21.4.1	Sample	52
21.4.2	Apparatus	52
21.4.3	Procedure	52
21.4.4	Requirements	52
21.4.5	Details to be specified	53
21.5	Method E17C: Buckling bend	53
21.5.1	Sample	53
21.5.2	Apparatus	53
21.5.3	Procedure	53
21.5.4	Requirements	53
21.5.5	Details to be specified	53
22	Method E18A: Bending under tension	55
22.1	Object	55
22.2	Sample	55
22.3	Apparatus	55

22.4	Procedure	56
22.5	Requirements	56
22.6	Details to be specified.....	56
23	Method E18B: Sheave test (primarily for OPGW and OPAC)	58
23.1	Object.....	58
23.2	Sample	58
23.3	Apparatus	59
23.4	Procedure	59
23.5	Requirements	60
23.6	Details to be specified.....	60
24	Method E19: Aeolian vibration	61
24.1	Object.....	61
24.2	Sample	61
24.3	Apparatus	61
24.4	Procedure	62
24.5	Requirements	63
24.6	Details to be specified.....	63
25	Method E20: Cable coiling performance	64
25.1	Object.....	64
25.2	Sample	64
25.3	Apparatus	64
25.4	Procedure	64
25.5	Requirements	65
25.6	Details to be specified.....	65
26	Method E21: Sheath pull-off force for optical fibre cable for use in patch cords.....	65
26.1	Object.....	65
26.2	General.....	65
26.3	Sample	65
26.4	Apparatus	65
26.4.1	General	65
26.4.2	Tensile test rig.....	65
26.4.3	Recording equipment.....	66
26.4.4	Stripping tools	66
26.4.5	Pulling	66
26.4.6	Cable anchor	66
26.5	Procedure	66
26.6	Requirements	66
26.7	Details to be specified.....	66
27	Method E22: Buffered fibre movement under compression in optical fibre cables for use in patch cords	68
27.1	Object.....	68
27.2	Sample	68
27.3	Apparatus	68
27.4	Procedure	69
27.5	Requirements	69
27.6	Details to be specified.....	69
28	Method E23: Microduct route verification test	70
28.1	Object.....	70

28.2	General.....	70
28.3	Sample	70
28.4	Apparatus	70
28.5	Procedure.....	71
28.6	Requirements	71
28.7	Details to be reported	71
29	Method E24: Installation test for microduct cabling	71
29.1	Object.....	71
29.2	General.....	71
29.3	Sample	71

INTERNATIONAL ELECTROTECHNICAL COMMISSION

OPTICAL FIBRE CABLES –

Part 1-21: Generic specification – Basic optical cable test procedures – Mechanical test methods

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights. International Standard IEC 60794-1-21 has been prepared by subcommittee 86A: Fibres and cables, of IEC technical committee 86: Fibre optics.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC 60794-1-21 edition 1.1 contains the first edition (2015-03) [documents 86A/1638/FDIS and 86A/1655/RVD] and its amendment 1 (2020-03) [documents 86A/1975/FDIS and 86A/1990/RVD].

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendment 1. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.
