This European Standard was approved by CEN on 1995-12-06. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of the International Standard from ISO/TC 188 "Small craft" of the International Organization for Standardization (ISO) has been taken over as a European Standard by the CEN Technical Board.

This European Standard has been prepared under a mandate given to the CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EC Directive(s).

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 1996, and conflicting national standards shall be withdrawn at the latest by July 1996.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of the International Standard ISO 10087:1990 has been approved by CEN as a European Standard without any modification.

ISO 10087:1995(E)**Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10087 was prepared by Technical Committee ISO/TC 188, *Small craft*.

This second edition cancels and replaces the first edition (ISO 10087:1990), mainly modifying the presentation of the HIN.

Small craft — Hull identification — Coding system

1 Scope

This International Standard establishes a coding system to achieve identification of any small craft hull, concerning

- identification code of the country;
- identification code of the manufacturer;
- serial number;
- month and year of production;
- model year.

It applies to small craft of all types and materials, of length of hull of up to 24 m. It does not apply to beach or bathing toys.

2 Normative reference

The following standard contains provisions which, through reference in this text, constitute provisions of this International Standard. At the time of publication, the edition indicated was valid. All standards are subject to revision, and parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent edition of the standard indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 3166:1993, *Codes for the representation of names of countries*.

3 Definition

For the purposes of this International Standard, the following definition applies.

3.1 Hull Identification Number (HIN): Unique series of numerals, letters and hyphen, permanently affixed to a craft hull.

4 Composition of Hull Identification Number (HIN)

A HIN shall consist of 14 consecutive characters plus a hyphen as given in 4.1 to 4.4 without intervening spaces, solidi (slashes) or dashes.

4.1 The first two characters, followed by a hyphen, designate the code of the country in which the craft was manufactured, as specified in the ISO alpha-2 code in ISO 3166.

The manufacturer may be any company involved in the production of the small craft. Where more than one company is involved, the “manufacturer” is the company that registers the manufacturer's identifying code.

4.2 The next three characters are the unique identification code of the manufacturer, assigned by a national authority or recognized organization. These characters shall be letters.

4.3 The following five characters indicate the serial number of the craft as assigned by the manufacturer. The serial number may consist of numerals and/or letters, except for letters I, O and Q.

4.4 The last four characters designate the month and year of production, and the model year.

The month of production shall be coded according to table 1.
