

Standard Specification for Coded Values Used in the Electronic Health Record¹

This standard is issued under the fixed designation E 1633; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers the identification of the lexicons to be used for the data elements identified in Appendix X1 of Guide E 1384. It is intended to unify the representations for: (1) primary record of care data elements, (2) the data elements identified in other standard statistical data sets, (3) data elements used in other healthcare data message exchange format standards, or (4) in data gathering forms for this purpose, and (5) in data derived from these elements in order that data recorded in the course of patient care be exchangeable and be the source of accurate statistical and resource management data. This specification is applicable to all paper and automated systems.

2. Referenced Documents

2.1 ASTM Standards:

E 1238 Specification for Transferring Clinical Observations Between Independent Computer Systems²

E 1239 Guide for Description of Reservation/Registration—Admission, Discharge, Transfer (R-ADT) Systems for Automated Patient Care Information Systems²

E 1384 Guide for Content and Structure of the Electronic Health Record (EHR)²

E 1715 Practice for an Object-Oriented Model for Registration, Admitting, Discharge, and Transfer (RADT) Functions in Computer-Based Record Systems²

E 1744 Guide for View of Emergency Medical Care in the Computer-Based Patient Record²

2.2 ANSI Standards:³

ANSX 3.50 Representation of Date and Time

ANSX 3.51 Representation of Common Units

2.3 ISO Standards:³

ISO 639 Names of Languages

ISO 2955 Representation of SI Units

ISO 3166 Names of Countries

ISO 5218 Representation of Human Sexes

ISO 8601 Representation Dates

¹ This specification is under the jurisdiction of ASTM Committee E-31 on Healthcare Informatics and is the direct responsibility of Subcommittee E31.19 on Electronic Health Record Content and Structure.

Current edition approved April 10, 2000. Published June 2000. Originally published as E 1633–96. Last previous edition E 1633–99.

² *Annual Book of ASTM Standards*, Vol 14.01.

³ Available from American National Standards Institute, 11 W. 42nd St., 13th Floor, New York, NY 10036.

2.4 Other Standards:

HL-7 Health Industry Level 7 Interface Standards⁴

3. Terminology

3.1 Acronyms:

3.1.1 NCHS—National Center for Health Statistics

3.1.2 NCVHS—National Committee for Vital and Health Statistics

3.1.3 NOS—not otherwise specified

4. Significance and Use

4.1 *Purpose*—The approval of Guide E 1384, concerned with the structure and content of the computer-based patient record, now includes a formal indexing of data elements and a cataloging of the minimal essential value set for these elements. Indexing of these data elements with a unique identifier keyed to its position in the logical structure of Appendix X1 of Guide E 1384 now provides a means of cataloging the value sets representing each data element (see Guide E 1384). Specification E 1238, coordinated with Guide E 1239, describes conventions for representing many of the data values for data elements that are included in the more comprehensive listing in Guide E 1384. A comprehensive listing of all of the value sets associated with Guide E 1384 has not yet been assembled. This specification begins to catalog the representation conventions for a number of these elements and in particular to list the coded values. It is important that this catalog consider the traditionally assigned representations for each of these elements, and it must resolve differences in a manner that introduces systematics and consistency into the representation. The catalog must establish both a global framework consistent with international standardization and with long-term growth, while at the same time maximizing familiar or traditional representations. This standard has been developed with input from many organizations, including government agencies and other standards bodies and professional associations, and as a result of the effort to achieve consistency and comprehensiveness among the data dealt with by various standards efforts.

4.2 *General Values*—Early in the coordination of healthcare information standards an informal body, the Healthcare Information Standards Coordinating Committee (HISCC), identified

⁴ Available from Health Level 7, Mark McDougall, Executive Director, 900 Victors Way, Suite 122, Ann Arbor, MI 48108.

certain common data element types and agreed upon conventions for representing these data element types in a standard manner. This set the stage for the development of the value sets for the CODED VALUE data type. The status of the standard noncoded data types, and their representations, agreed upon by the HISCC are:

4.2.1 *Person Names*—Specification E 1238, Guide E 1239 and HL-7 use the same representation for American and European forms.

4.2.2 *Addresses*—Common format in Specification E 1238 and Guide E 1239.

4.2.3 *Telephone Numbers*—Specification E 1238 and Guide E 1239 currently use the same representation with area code enclosed in parentheses and country code preceding the parentheses.

4.2.4 *Dates*—Date and time represented as ANS X3.51-1986/ISO 8601-1988 with years in four digits; time not separated from date by “T” as permitted by ISO 8601.

4.2.5 *Numbers*—Numbers are represented either as integers or fixed point numbers; exponential notation not presently accepted in Specification E 1238, Guide E 1239, or HL-7. Units of Measure by ISO 2955-1983 or ANS X3.50-86.

4.2.6 *Strings*—7-bit ASCII characters; multilingual character sets not yet defined.⁵

5. Assignment of Coded Values

5.1 The major important data elements in Guide E 1384 having coded data types and the current status of the cataloging of their values are:

01035	Patient Multiple Birth code (5.2.23)
01040	Sex (5.2.20)
01042	Race (5.2.3)
01045	Ethnicity (5.2.4)
01047	Religion (5.2.7)
01052	Marital status (5.2.2)
01055	Nationality/Country of Origin (5.2.6)
01057	Language (5.2.5)
01060	Educational Level (5.2.8)
	Educational Certification (5.2.9)
01062	Current Work Status (5.2.24)
01065	Occupation (5.2.11), also 01070,01090.03
01067	Current Vocational Status (5.2.25)
01085	Usual Living arrangement (5.2.26)
01099	Foreign Residency Code (5.2.27)
01090.03	Family Relationship (5.2.10)
01155	Color Eyes (5.2.38)
01160	Color Hair (5.2.39)
01175	Body Build for Identification (5.2.40)
02052	Durable Power of Attorney Status (5.2.28)
04001.50	Professional Specialty (5.2.16)
09001.12	Body System/Region (5.2.22)
14001.A002	Patient (Encounter) Type/Admission Source (5.2.17)
14001.A004	Confidentiality Status (5.2.1)
14001.A013	Facility Care/Healthcare setting (5.2.18)
14001.A016	Reason for Visit (5.2.19)
14001.A021	Mode of Arrival (5.2.29)
14001.A030	Nature of Injury (5.2.30)
14001.A033	Mode of Injury (5.2.31)
14001.A034	Product of Injury (5.2.37)
14001.A044	Protective Equipment Used (5.2.32)
14001.A063	Patient Admission Type (5.2.12)
14001.A110	Professional Specialty (5.2.16)
14001.A133	Accommodation type (5.2.15)

14001.A163.01	Patient In-residence Transfer Type (5.2.13)
14001.A170	Diagnosis (5.2.33)
14001.A170.01	Diagnosis Type (5.2.34)
14001.A170.02	Diagnosis Status Code (5.2.35)
14001.A186.01	Current Clinical Status (5.2.36)
14001.A223	Source of Payment Code (5.2.21)
14001.F050	Discharge Disposition Category (5.2.14)

This standard identifies the current value list for each of these elements as of the approval date of this standard (see footnote 1) and states the evolving status of this catalog as the knowledge of the use of these elements expands as a result of ongoing investigation. Each element is identified by the index assigned to it in the revised Appendix X1 of Guide E 1384. Moreover, the definition for that element from the Data Element Catalog (5) is included with the value set.

5.2 *Value Set Tables*—These tables collect the representation of coded data values for specific data elements in computer-based patient record structures identified in Appendix X1 of Guide E 1384. The terms listed here are the minimal essential ones but may be further subclassified to include more specific terms by appropriate extensions of the included terms.

5.2.1 *Confidentiality Status*—This data element, Index: 14001.A004, contains the minimal commonly used values appearing in both manual and automated systems. See Specification E 1238.

Unwed Mother
Celebrity
Psychiatric Patient
Employee
AIDS Patient
HIV Patient
Alcohol/Drug Treatment Patient

5.2.2 *Marital Status*—This data element, Index: 01052, encompasses the values noted by Westermeyer (6), Bureau of Census, the VA DHCP system, the DoD CHCS system, the X12 835 Transaction Set (7), UB-82 (8), and used in common practice.

Never married
Married
Divorced
Divorced/annulled
Divorced/separated
Annulled
Widowed
Separated, NOS
Separated, legal
Separated, nonlegal
Marriage, separation, temporary absence
Marriage, separation, permanent absence
Consensual union
Unknown

5.2.3 *Race*—This data element, Index: 01042, indicates the region of the world from which the patient’s ancestors came. This is a biologic attribute that very generally indicates possible biologic diversity to which the patient might be subject. Due to ambiguity inherent in the diversity of the large number of inherited attributes which might characterize such ancestry, other data elements of the care record will be required to assign meaning to the value set recorded for this attribute. Therefore, utilization of these other attributes is strongly recommended. Currently, to be consistent with census data, the six values given in OMB Directive 15 are recommended.

⁵ The boldface numbers in parentheses refer to the list of references at the end of this standard.

American Indian/Alaska Native
 Asian
 Black
 Hawaiian/Pacific Islander
 White
 Other

5.2.4 *Ethnicity*—In keeping with current demographic practice, this data element, Index: 01045, reflects the ethnic cultural group with which the patient identifies. Multiple selections may be made. Each value has associated with it an ancestral cultural origin tag that is most closely associated with the ancestral geographic origin of that cultural pattern. This tag does not signify the ancestral biologic characteristics of the individual which is recorded in other data elements of the record. See Fig. 1.

5.2.5 *Language*—This data element, Index 01058, is specified by the two character lower case code in ISO 639 Table 1. The upper case three character code, now in ISO balloting may be added in a future revision of this specification. The language symbol only is shown here, but an original name and French language name are available (see Fig. 2 for list).

5.2.6 *Nationality/Country of Origin*—This data element, Index: 01055, Citizenship, is specified by ISO 3166. The two letter codes are shown here (see Fig. 3 for list). A three letter and a numeric code exists for each entry. New entries may be added in the future.

5.2.7 *Religion*—This data element, Index: 01047, includes values assembled for the United States by the Dept. of Defense, the Dept. of Veterans Affairs, the Bureau of Census, and the NCVHS. It includes terms of general category as well as more specific classifications of religious denominators (see Fig. 4 for list).

5.2.8 *Educational Level*—This data element, Index: 01060, is stated such that the general level and year within that level is expressed in a way that comparably reflects the educational practice in most national settings.

E1 to E8 Elementary
 S1 to S4 Secondary
 C1 to C5 College Baccalaureate
 P1 to P9 Professional

5.2.9 *Educational Certification*—This data element reflects the Certification of Educational Experience for credentialing of healthcare practitioners. It reflects the terminology used by the Dept. of Veterans Affairs, the Dept. of Defense, and state licensing agencies.

High School Attendance Certificate
 Less Than High School Diploma
 Certificate of High School Equivalent
 High School Diploma
 1st Yr College Level Certificate
 College Certificate of Attendance
 Associate Degree
 College Certificate of Completion
 Professional Nursing Diploma
 Baccalaureate
 First Professional Degree
 Masters
 Post Masters
 Doctorate

5.2.10 *Family Relationship*—This data element, Index: 01090.03, is used to reflect the relationship of a family member, or other person, to the patient. It includes the values

used by the Dept. of Veterans Affairs, Dept. of Defense, ANSI X12 835 Transaction Set, UB-82 (8), and the NCVHS data sets.

Adopted Son
 Adopted Daughter
 Aunt
 Brother
 Brother-In-Law
 Cousin
 Daughter
 Daughter-In-Law
 Father
 Father-In-Law
 Foster Child
 Granddaughter
 Grandfather
 Grandmother
 Grandson
 Great Grandfather
 Great Grandmother
 Halfbrother
 Halfsister
 Husband
 Mother
 Mother-In-Law
 Nephew
 Niece
 Sister
 Sister-In-Law
 Son
 Son-In-Law
 Stepbrother
 Stepdaughter
 Stepfather
 Stepmother
 Stepsister
 Stepson
 Uncle
 Unrelated, Friend
 Ward
 Wife

5.2.11 *Occupation*—This data element, Indices: 01065.—Current Occupation, 01070.—Previous Occupations and 0.1090.23—Family Member Occupation, reflects the terms used in the Standard Occupational Classification 1996 (2), those used in the U.S. 1990 Census (1) and those in the ILO list of International Standard Classification of Occupations 1968 (ISCO-68) incorporated into SNOMED (3). ISCO – 88 includes a four digit code that is the basis for several national systems for classifying occupations. SNOMED-III, released in 1993, continues to use ISCO-68. This scheme also includes terms from the Occupation Employment Survey (2) which is being incorporated into the new classification by the US Dept. of Labor, Bureau of Labor Statistics beginning in 1997 replacing older schemes. The terms listed here from that new scheme have been cross referenced to these older schemes in coordination with the US Dept. of Labor. The new vocabulary is intended to be able to also relate health care resource management issues to the labor market. See Fig. 5.

5.2.12 *Patient Admission Type*—This data element, Index: 14001.A063, is used to categorize the type of inpatient encounter but is not used for other encounter types.

Admission, pre-admit (elective)
 Admission, walk-in (urgent)
 Admission, emergency room
 Admission, referred
 Newborn

5.2.13 *Patient Transfer Type*—This data element: Index:

14001.A163.01, is used to characterize the movement of inpatients either physically or administratively between nursing units.

Inter Clinical Care Unit
Inter Clinical Service

5.2.14 *Discharge Disposition*—This data element, Index: 14001.F050, is the general nature of the activity to which the patient is consigned following the encounter, either inpatient or ambulatory. A separate data element contains the specific name of the destination.

Acute Care Facility
Expired
Follow-up: Admit to Residential Care Facility
Follow-up: Other
Follow-up: Refer to Adjunct Provider Agency
Follow-up: Refer to Consulting Provider
Follow-up: Refer to Other Provider
Follow-up: Returned to Referring Provider
Follow-up: Scheduled
Follow-up: Telephone
Follow-up: Transferred to Another Provider
Follow-up: Not Scheduled
Left Against Medical Advice (AMA)
Medevac
No Follow-up
Routine Discharge to Home

5.2.15 *Accommodation Type*—This data element, Index: 14001.A133, denotes the clinical service, or organizational unit dedicated to a particular professional specialty or orientation, to which the patient is assigned and is responsible for that patient’s care.

5.2.16 *Professional Specialty*—This data element, Index: 04001.50, is the nature of the professional specialties held by a practitioner and include the terms used by the ANSI X12835 Transaction Set (7), UB-82 (8), the American Medical Association, American Dental Association, the American Nurses Association, and other professional bodies providing licensed or certified practitioners. This list (see Fig. 7 for list) may not be complete and may also be included with the Standard Occupational Classification system noted above as extensions to the scheme. At this time, however, it is presented separately until agreement on such an approach is reached.

5.2.17 *Patient Type*—This data element, Index: 14001.A002, reflects the type of the patient presenting for an encounter in terms of the nature of services to be provided. It includes the categorizations used in the NCVHS Standard data sets.

Emergency: NOS
Emergency Trauma Level 1
Emergency Trauma Level 2
Emergency Trauma Level 3
Emergency Trauma Level 4
Inpatient: Acute Care Hospital
Inpatient: Long Term Care Hospital
Inpatient: NOS
Inpatient: Skilled Nursing Facility
Inpatient: Pre-admit
Outpatient: Clinic
Outpatient: Hospital
Outpatient: NOS
Outpatient: Private Practice
Home Health: NOS

5.2.18 *Facility Type/Healthcare Setting*—This data element, Index: 14001.A013, categorizes the healthcare setting provided by the facility at which the encounter occurs. It reflects the

terminology used in the NCHS Standard data sets and that in Guide E 1384, which contains all of these categories (see Fig. 8 for list).

5.2.19 *Reason for Visit*—This data element, Index: 14001.A016, reflects the reason the patient sought the services of a healthcare provider.

NCHS Reason for Visit list (4)

5.2.20 *Sex*—This data element, Index: 01040, uses the ISO 5218 terminology.

Male	M
Female	F
Unknown	U
Male Pseudohermaphrodite	MP
Female Pseudohermaphrodite	FP
Hermaphrodite	H
Male changed to Female	MC
Female changed to Male	FC

5.2.21 *Source of Payment*—This data element, Index: 14001.A223, reflects the general means by which the charges for the encounter will be paid. It includes the terms used in the NCVHS standard datasets, the ANSI X12 835 Transaction set (7), (UB-92) (8), and other commonly used claim terminologies.

Unknown
Workman’s Comp

5.2.22 *Body System/Region*—This data element, Index 08095, 09001.12, 09001.13, refers to subjective or objective observations that are organized by anatomic systematic to be comprehensive, such as review of systems. The patient’s subjective observations, symptoms, and the practitioner’s objective observations from examination all should be categorized using a common basic terminology. These categories have been derived from the U.S. Government SF88 and SF93, the OSHA forms, and common anatomy texts.

Abdomen, Anus
Abdomen, Hernia

 Other mode of transport
 Unknown mode of transport

5.2.23 *Patient Number of Children in Birth* (Index: 01035.)—This value is a numeric count (see 4.2.6) of the number of children in a given gestation and indicates that the patient was one child of that gestation.

5.2.24 *Current Work Status* (Index: 01062.)—The value set should include:

Employed full-time
 Employed part-time
 Not employed
 Retired
 Self-employed
 Military — active
 Military — active overseas
 Working not for pay
 Retired and working part-time for pay
 Retired and not working

5.2.25 *Current Vocational Status* (Index: 01067.)—This value set indicates job related education and should include:

Secondary vocational training
 Post-secondary vocational training
 Post-secondary education

5.2.26 *Usual Living Arrangement* (Index: 01085.)—This value set depicts the environment in which the patient resides and should include:

Lives alone
 Lives with a family member other than spouse
 Lives with parents
 Lives in a group
 Lives with spouse
 Lives with a non-related person

5.2.27 *Foreign Residency Code* (Index: 01099.)—This value set depicts whether the patient regularly resides outside the nation of his/her permanent residence and should include:

No regular foreign residence
 Foreign residence less than 25 %
 Foreign residence 25-50 %
 Foreign residence greater than 50 %

5.2.28 *Durable Power of Attorney Status* (Index: 02052 and 02053.)—This value set indicates what level of durable power of attorney is part of the patient’s estate. The value set is:

None
 On file
 Written

5.2.29 *Mode of Arrival* (Index: 14001.A021.)—This value set serves not only emergency encounters but also any type of encounter where the mode of arrival is an important aspect of patient care. The minimal value set shall include:

5.2.30 *Nature of Injury* (Index: 14001.A030.)—This value set applies to any encounter where and injury occurs. Its values are taken from the ICD-9CM/ICD-10 coding scheme in the range 800 to 999, or the corresponding SNOMED International components which map into ICD-9CM/ICD-10.

5.2.31 *Mode of Injury* (Index: 14001.A033.)—This value set is taken from the ICD9CM “E-Code” table, the corresponding segment of ICD-10 or that of SNOMED International.

5.2.32 *Protective Equipment Used* (Index: 14001.A044.)—This value set indicates protective equipment used on the job or devices used in any environment (such as a vehicle) and should include:

Safety Equipment:
 None used
 Shoulder Belt only used
 Lap Belt only
 Shoulder and Lap Belt used
 Child safety seat used
 Helmet used
 Not reported
 Restraint use unknown

Air Bag Deployed:
 Deployed-front
 Deployed-side
 Deployed-both front/side
 Not deployed
 Not applicable
 Not reported
 Deployment unknown

Non-motorist Safety Equipment:
 None used
 Helmet used
 Protective pads used (elbows, knees, shins, etc.)
 Reflective clothing
 Lighting
 Not applicable
 Other
 Not reported
 Unknown

5.2.33 *Diagnosis* (Index: 14001.F030/A170.)—This value set is the list of conditions at encounter disposition. Codes may be drawn from the latest ICD-9-CM table or ICD-10 version, when mandated, or other diagnostic code system. It may be a code or associated rubric index into the code table. Additional codes may be applied using alternative coding schemes.

5.2.34 *Diagnosis Type* (Index: 14001.F030.01.)—This value set indicates the purpose/level of significance of the code/term of diagnosis and should include:

Principal
 Primary
 Secondary
 Complication

For 14001.A.170.01 it should also include admitting.

5.2.35 *Diagnosis Status Code* (Index: 14001.F030.02/A170.02.)—This value set indicates the finality of the assignment of the code/term and should include:

Active
Chronic
Acute

Blue
Green

5.2.36 *Current Clinical (Patient) Status* (Index: 14001.A186.01.)—The value set indicates severity of clinical status and should include:

Recovered
Deceased
Well
Chronic management required

5.2.39 *Color of Hair* (Index: 010160.)—This value set indicates the natural hair color for purposes of identification and should include:

Blond
Brown
Black
Red
Gray
White

5.2.37 *Product of Injury* (Index: 14001.A034.)—This value is drawn from the Consumer Product Safety Commission NEIS list.

5.2.38 *Color of Eyes* (Index: 01155.)—This value set indicates the natural eye color for purposes of identification and should include:

Brown
Hazel

5.2.40 *Build for Identification* (Index: 01175.)—This value set indicates the general body build for purposes of identification and should include:

Slender
Medium
Heavy
