About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalelement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Glossaire IEC - std.iec.ch/glossary

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: csc@iec.ch.

CONTENTS

FOREWORD	11
1 Scope	14
2 Normative references	14
3 Terms and definitions	15
4 General	27
4.1 Overview	27
4.2 Purpose	28
4.3 Application of these standards	28
4.4 Equipment categories	28
4.5 Establishing equipment type and status	29
4.6 Conditions of measurement and related definitions	30
4.7 Quality requirements	30
5 Tests	30
5.1 Test sites and simulation	30
5.1.1 Environmental and RF testing	30
5.1.2 Over-sea radar performance tests	30
5.1.3 Test targets and target simulation for performance tests	31
5.2 Test terminology and format	31
5.2.1 General	31
5.2.2 Test requirement terminology	31
5.2.3 Testing method terminology	32
6 Radar performance	32
6.1 General	32
6.2 Transmission and interference	32
6.2.1 Transmission frequency	32
6.2.2 Interference	33
6.3 Performance optimisation and monitoring	33
6.3.1 General	33
6.3.2 Optimum performance	33
6.4 Gain and anti-clutter functions	34
6.4.1 General	34
6.4.2 Gain function	34
6.4.3 Manual and automatic sea anti-clutter	34
6.4.4 Rain anti-clutter	35
6.5 Signal processing	35
6.5.1 General	35
6.5.2 Target enhancement	35
6.5.3 Radar signal correlation	36
6.5.4 Signal processing and radar image latency	36
6.5.5 Second-time-around echoes	36
6.5.6 Transmission format	37
6.5.7 Picture update	37
6.5.8 Additional processing	37
6.5.9 Signal processing description	37
6.6 Operation with SARTs, target enhancers (RTEs) and beacons	38
6.6.1 General	38

6.6.2	Radar beacons, SARTs and enhancers	38
6.7	Minimum range and range compensation	38
6.7.1	General	38
6.7.2	Range compensation	39
6.7.3	Minimum range	39
6.8	Range and bearing discrimination	40
6.8.1	General	40
6.8.2	Measurement conditions	40
6.8.3	Range discrimination	40
6.8.4	Bearing discrimination	40
6.8.5	Fundamental radar accuracy	41
6.9	Target detection performance assessment	41
6.9.1	General	41
6.9.2	Range of first detection in minimal clutter	42
6.9.3	Assessment of target detection with clutter	44
6.9.4	Radar performance documentation	49
6.10	Radar antenna (including pitch and roll)	50
6.10.1	General	50
6.10.2	Vertical radiation pattern/pitch and roll	50
6.10.3	Antenna horizontal pattern	51
6.10.4	Antenna side lobes	51
6.11	Radar availability – Standby and transmit	52
6.11.1	Requirements	52
6.11.2	Methods of test and required results	52
7	Display presentation	53
7.1	General	53
7.1.1	Requirements	53
7.1.2	Methods of test and required results	53
7.2	Linearity and index delay	53
7.2.1	Requirements	53
7.2.2	Methods of test and required results	53
7.3	Use and discrimination of colour	53
7.3.1	Requirements	53
7.3.2	Methods of test and required results	53
8	CCRP and own ship	54
8.1	Consistent common reference point (CCRP)	54
8.1.1	CCRP	54
8.1.2	CCRP position	54
8.1.3	Measurements	54
8.1.4	Antenna offset	55
8.2	Own ship	55
8.2.1	General	55
8.2.2	Own ship's outline and minimised symbol	55
8.2.3	Heading line	55
8.2.4	Stern line	56
9	Navigation tools	56
9.1	General	56
9.2	Units of measurement	56
9.2.1	Requirements	56

9.2.2	Methods of test and required results	57
9.3	Presentation	57
9.3.1	Requirements	57
9.3.2	Methods of test and required results	57
9.4	Display range scales	57
9.4.1	Mandatory range scales	57
9.5	Variable range marker (VRM)	58
9.5.1	General	58
9.5.2	VRM measurements	58
9.6	Electronic bearing line (EBL)	59
9.6.1	General	59
9.6.2	EBL measurements	59
9.6.3	EBL origin position	60
9.7	Cursor	60
9.7.1	General	60
9.7.2	Cursor measurement	60
9.7.3	Selection by cursor	61
9.8	Offset measurement of range and bearing	61
9.8.1	General	61
9.8.2	Electronic range and bearing line (ERBL)	61
9.9	Parallel index lines (PI)	62
9.9.1	General	62
9.9.2	PI lines and positioning	62
9.10	Bearing scale	63
9.10.1	General	63
9.10.2	Bearing scale presentation	63
9.11	Range rings	64
9.11.1	General	64
9.11.2	Range ring presentation and measurement	64
9.12	Radar maps	65
9.12.1	General	65
9.12.2	Map functions and display simple user-defined maps	65
9.12.3	Map memory and transfer	65
9.12.4	Map presentation properties	66
9.13	Navigation routes	66
9.13.1	General	66
9.13.2	Route display and monitoring	67
10	Orientation, motion and stabilisation	67
10.1	General	67
10.2	Azimuth orientation	67
10.2.1	Accuracy of alignment	67
10.2.2	Heading readout and reference	68
10.2.3	Azimuth stabilisation update	69
10.3	Motion and orientation modes	69
10.3.1	General	69
10.3.2	True and relative motion	69
10.4	Off-centring	70
10.4.1	General	70
10.4.2	Manual and automatic off-centring	70

10.4.3 Automatic reset	70
10.4.4 Display orientation.....	71
10.5 Ground and sea stabilisation	72
10.5.1 Mode and source.....	72
10.5.2 Ground stabilisation.....	72
10.5.3 Sea stabilisation	73
11 Aids for collision avoidance	73
11.1 General	73
11.2 Target trails and past positions.....	73
11.2.1 General	73
11.2.2 Time and plot requirements	74
11.2.3 Trails/past position availability	74
11.3 Target tracking (TT)	75
11.3.1 General	75
11.3.2 Presentation of targets	75
11.3.3 Tracking calculations.....	76
11.3.4 Target tracking availability.....	76
11.3.5 Classification and tracked target capacity.....	77
11.3.6 Manual acquisition	78
11.3.7 Automatic acquisition	78
11.3.8 Motion trend.....	78
11.3.9 Visibility of 50 % (http://standards.iteh.ai)	79
11.3.10 Tracking algorithm.....	79
11.3.11 Target swap	79
11.3.12 Cease tracking https://standards.iteh.ai/catalog/standards/sist/5cc8311d-29bc-49c8-a2b3	79
11.3.13 Target tracking scenarios https://standards.iteh.ai/catalog/standards/sist/47/iec-62388-2013	79
11.3.14 Target motion and tracking accuracy	80
11.3.15 Tracker range and bearing accuracy	88
11.3.16 Reference target	89
11.4 Tracking limitations	89
11.4.1 Tracking warnings	89
11.4.2 Documentation	90
11.4.3 Requirements	90
11.4.4 Methods of test and required results	90
11.5 Automatic identification system	90
11.5.1 General	90
11.5.2 AIS targets and data report capacity.....	90
11.5.3 AIS target filtering.....	92
11.5.4 Activation and deactivation of AIS targets.....	92
11.5.5 AIS functionality and presentation	93
11.6 Radar and AIS target data	95
11.6.1 Requirements	95
11.6.2 Methods of test and required results	95
11.6.3 Bow crossing range and time (BCR/BCT)	96
11.7 Operational target alerts	96
11.7.1 CPA and TCPA.....	96
11.7.2 New target warning.....	97
11.7.3 Lost tracked radar target	97
11.7.4 Lost AIS target criteria	98

11.8	Target association	99
11.8.1	General	99
11.8.2	Association and priority	99
11.9	Trial manoeuvre	103
11.9.1	General	103
11.9.2	Trial functions	103
12	Chart radar (optional classification)	104
12.1	General requirements	104
12.1.1	General	104
12.1.2	Chart operation and source	104
12.1.3	Chart elements and availability	105
12.1.4	Chart reference	106
12.1.5	Primary chart information set	106
12.1.6	Chart stabilisation and chart redraw	107
12.1.7	Chart position and latency	108
12.1.8	Matching and adjustment	108
12.1.9	Chart symbols, colours, and size	109
12.1.10	Chart display size	110
12.1.11	Chart alerts and indications	110
12.1.12	Chart malfunction	111
12.1.13	Chart radar malfunction	111
12.2	Additional requirements for standalone radar with chart facilities	111
12.2.1	General	111
12.2.2	Provision and updating of chart information	111
12.2.3	Content and structure of chart data <small>IEC 62388:2013 https://standards.iec.ch/catalog/standards/iss/5ce8311d-29bc-49c8-a2b3</small>	112
12.3	Additional requirements for ECDIS backup (optional)	112
12.3.1	General	112
12.3.2	Requirements	112
12.3.3	Test Methods and required results	112
13	Ergonomic criteria (control functions and display)	112
13.1	General	112
13.2	Operational controls	112
13.2.1	Requirements	112
13.2.2	Methods of test and required results	113
13.3	Primary controls	113
13.3.1	Requirements	113
13.3.2	Methods of test and required results	113
13.4	Control properties	114
13.4.1	Requirements	114
13.4.2	Methods of test and required results	114
13.5	Default control setting and saved user control settings	114
13.5.1	Requirements	114
13.5.2	Test methods and required results	115
14	Interfacing	116
14.1	General	116
14.2	Input interfacing	116
14.2.1	Input data	116
14.2.2	Input quality, integrity and latency	117
14.3	Output interfacing	117

14.3.1	Output format	117
14.3.2	Output target data	117
14.3.3	VDR interface	118
15	Design, servicing and installation	119
15.1	General	119
15.2	Fault diagnosis and servicing	119
15.2.1	Requirements	119
15.2.2	Methods of test and required results	120
15.3	Display design	120
15.3.1	Requirements	120
15.3.2	Methods of test and required results	120
15.4	Transceiver design	120
15.4.1	General	120
15.4.2	Sector blanking	121
15.5	Antenna design	121
15.5.1	Requirements	121
15.5.2	Methods of test and required results	121
15.6	Inter-switched and multiple radars	122
15.6.1	General	122
15.6.2	System safeguards	122
15.6.3	Combining radar	122
15.6.4	Multiple radar system status	123
15.7	Multiple operational displays	123
15.7.1	Additional information and conformity	123
15.7.2	Requirements	123
15.7.3	Methods of test and required results	124
15.8	Safety – antenna and radiation	124
15.8.1	General	124
15.8.2	Antenna radiation and rotation	124
15.8.3	Microwave radiation levels	124
16	Alerts and failures	125
16.1	General	125
16.1.1	Priority of alerts	125
16.1.2	Alerts and indications	125
16.1.3	Alarm contact outputs	125
16.1.4	Alert management interface	125
16.1.5	Unacknowledged warnings	126
16.1.6	Unacknowledged alarms	127
16.1.7	Remote acknowledgement and silencing of alerts	127
16.1.8	Picture freeze	128
16.1.9	Sensor failure alert	128
16.2	Backup and fallback arrangements	128
16.2.1	Requirements	128
16.2.2	Failure of heading information (azimuth stabilisation)	128
16.2.3	Failure of speed through the water information	129
16.2.4	Failure of course and speed over ground information	129
16.2.5	Failure of position input information	129
16.2.6	Failure of radar video input information	130
16.2.7	Failure of AIS input information	130

16.2.8 Failure of an integrated or networked system.....	130
17 Environmental testing	130
17.1 General	130
17.2 Testing to IEC 60945.....	131
17.2.1 Requirements	131
17.2.2 Methods of test and required results.....	131
17.3 Additional environmental tests.....	131
17.3.1 General	131
17.3.2 Antenna shock test.....	132
18 Equipment familiarisation and documentation	132
18.1 Familiarisation simulator.....	132
18.1.1 General	132
18.1.2 Requirements	132
18.1.3 Methods of test and required results.....	132
18.2 Instructions and documentation	133
18.2.1 General	133
18.2.2 Documentation	133
18.2.3 Operating instructions.....	133
18.3 Radar system installation	134
18.3.1 Requirements	134
18.3.2 Methods of test and required results.....	134
18.4 Maintenance information for equipment update	135
18.4.1 Requirements	135
18.4.2 Methods of test and required results.....	135
Annex A (informative) Guidelines for radar functionality on navigation displays.....	136
Annex B (normative) Unwanted emissions of radar systems.....	137
Annex C (informative) Radar target size (RCS) and detection range calculations	142
Annex D (informative) Factors that influence target detection	146
Annex E (normative) Sensor errors	155
Annex F (informative) Target scenario simulator/reported target simulator	157
Annex G (informative) Tracked and reported target states	158
Annex H (normative) IEC 61162 sentence formats	159
Annex I (normative) Radar control function/indication grouping	168
Annex J (informative) Interference to shipborne radar from emissions in adjacent frequency bands	172
Bibliography.....	175
 Figure 1 – Reduction of range to first detection due to rain at S-band	45
Figure 2 – Reduction of range to first detection due to rain at X-band	45
Figure 3 – TT scenario 1	82
Figure 4 – TT scenario 2	83
Figure 5 – TT scenario 3	84
Figure 6 – TT scenario 4	85
Figure 7 – TT scenario 5	86
Figure B.1 – B ₋₄₀ falls within the allocated band	140
Figure B.2 – B ₋₄₀ falls outside the allocated band.....	141

Figure C.1 – Enhancement by reflection (dB) over free-space (9,41 GHz).....	145
Figure C.2 – Enhancement by reflection (dB) over free-space (3,05 GHz).....	145
Figure D.1 – Effect of sea spikes on target detection	148
Figure D.2 – Multi-path plots for S-band.....	150
Figure D.3 – Multi-path plot for X-band	150
Figure G.1 – Tracked target states.....	158
Figure G.2 – AIS target state	158
 Table 1 – Performance requirements for categories of ship/craft for SOLAS V	29
Table 2 – Range of first detection in clutter-free conditions	42
Table 3 – X-band pass/fail assessment criteria	48
Table 4 – S-band pass/fail assessment criteria	48
Table 5 – Pass/fail assessment.....	49
Table 6 – Douglas sea state parameters	49
Table 7 – Main horizontal beam pattern	51
Table 8 – Effective side-lobes	52
Table 9 – Features and colours to be used for radar maps	66
Table 10 – Tracked target capacity (subset of Table 1).....	77
Table 11 – Typical tracked target accuracy (95 % probability figures)	80
Table 12 – TT scenario 1, with sensor errors applied	81
Table 13 – TT scenario 1, times of measurement task	81
Table 14 – TT scenario 1, accuracies after 1 min, and 3 min (all \pm values) <small>IEC 62388:2013 https://standards.iec.ch/catalog/standards/sist/5cc8311d-29be-49e8-a2b3</small>	82
Table 15 – TT scenario 2, own ship turning through $12\pm180^\circ$	83
Table 16 – TT scenario 3, initial target data	84
Table 17 – TT scenario 4, initial target data for fast targets (standard speed ships)	84
Table 18 – TT scenario 4, initial target data for fast targets (HSC)	85
Table 19 – TT scenario 5: initial target data for standard craft.....	86
Table 20 – TT scenario 5: initial target data for collision scenario for HSC	86
Table 21 – Measurement points and results at 3 min and 6 min for HSC	87
Table 22 – Measurement points and results at 11 min and 14 min for HSC	87
Table 23 – Measurement points and results at 3 min and 6 min for standard craft.....	87
Table 24 – Measurement points and results at 11 min and 14 min for standard craft.....	88
Table 25 – Measurement of tracked target accuracy	88
Table 26 – AIS display capacity (subset of Table 1)	91
Table 27 – AIS reporting rates	98
Table 28 – Association scenario 1, initial TT and AIS target position and data	100
Table 29 – Association scenario 1, AIS target data for diverging and converging tracks.....	101
Table 30 – Association scenario 2, initial TT and AIS target position and data	101
Table 31 – Association scenario 2, AIS target data for changing speed.....	102
Table 32 – Association scenario 3, TT and AIS target start position and data	102
Table 33 – Association scenario 4, initial TT and AIS target position and data	103
Table 34 – Association scenario 4, TT and AIS target with the same course and speed	103
Table 35 – Control settings configured in response to ‘Default’ selection	115

Table 36 – Antenna shock test severity (half sine pulse)	132
Table B.1 – Measurement frequency ranges	138
Table D.1 – Spread of RCS values for typical ships	147
Table D.2 – S-band performance predictions for ranges of 0,2, 0,4, 0,7 NM	149
Table D.3 – X-band performance predictions for ranges of 0,2, 0,7 NM.....	149
Table D.4 – Parameters for attenuation in uniform rain conditions.....	151
Table D.5 – Typical values for attenuation and backscatter in uniform rain conditions	151
Table D.6 – Additional radar system parameters (X/S-band)	151
Table D.7 – Target size, height and RCS values	152
Table D.8 – S-band radar parameters (LP)	153
Table D.9 – X-band radar parameters (LP)	154
Table H.1 – Mandatory IEC 61162-1 sentences	159
Table H.2 – Optional IEC 61162-3 messges.....	160
Table H.3 – Description of terms.....	161
Table H.4 – Header format.....	162

iTeh STANDARD PREVIEW (standards.iteh.ai)

[IEC 62388:2013](#)

<https://standards.iteh.ai/catalog/standards/sist/5cc8311d-29be-49e8-a2b3-c01068b5c347/iec-62388-2013>

INTERNATIONAL ELECTROTECHNICAL COMMISSION**MARITIME NAVIGATION AND RADIOTRANSFER
EQUIPMENT AND SYSTEMS –****Shipborne radar – Performance requirements,
methods of testing and required test results****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62388 has been prepared by IEC technical committee 80: Maritime navigation and radiotransfer equipment and systems.

This second edition cancels and replaces the first edition published in 2007. This edition constitutes a technical revision.

The main changes with respect to the previous edition are:

- in 6.2 (Transmission and interference) reference is now made to a revised Annex B (Unwanted emmisions) where the mask has been tightened from 20 dB/decade to 30 dB/decade in line with ITU requirements and a new informative Annex J has been added concerning interference from emissions in adjacent frequency bands;
- Clause 7 (Display presentation) has been simplified (and the previous Annexes J and K deleted) with reference made instead to IEC 62288 with associated changes throughout the standard;
- in 9.9.2 (PI lines and positioning) the requirements for parallel index lines have been revised;
- in 10.4.4 (Display orientation) a new mode of display orientation “head-up stabilised” has been added;
- in 11.5 (Automatic identification system) new requirements and tests have been added for types of AIS targets, AIS repeater stations and filtering of AIS targets;
- in Clause 12 (Chart radar) a new subclause 12.3 has been added for ECDIS backup requirements;
- in Clause 13 (Ergonomic criteria) a new subclause 13.5 has been added giving requirements for default control settings;
- 14.3 (Output interfacing) has been revised together with the associated Annex H to update the requirements particularly with regard to interfaces to the VDR;
- Clause 16 (Alerts and failures) has been revised to update the requirements to align with bridge alert management and new requirements added for an alert management interface with associated changes throughout the standard;
- in Clause 18 (Equipment familiarisation and documentation) a new subclause 18.3 has been added for maintenance information and equipment update.

This bilingual version (2017-06) corresponds to the monolingual English version, published in 2013-06.

The text of this standard is based on the following documents:

FDIS	Report on voting
80/696/FDIS	80/705/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

The French version of this standard has not been voted upon.

All the text in this standard with wording identical to that in IMO resolutions is printed in italics. Reference to MSC.192(79) is by the relevant requirement clause as indicated in brackets, for example (MSC.192/4.2.3). Some clauses from Resolution MSC.192(79) may be split and the requirements in this case are addressed separately.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

The contents of the corrigendum of February 2014 have been included in this copy.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.
