FOREWORD1. General

This document has been prepared by the Secretariat of Technical Committee 61 in accordance with the decisions taken by TC 61 during its meeting held in March 1977 in Arnhem.

During this meeting, the results of the Enquiry Procedure in the member countries with regard to documents CENELEC/TC 61 (SEC) 1 of December 1975 and CENELEC/TC 61 (SEC) 193 of February 1976 were discussed. It was decided to publish and to implement this modification in the member countries indicated on the front page in correspondence with the implementation of Harmonization Documents HD 21 and HD 22. Conflicting non-harmonized national standards should be removed before the date corresponding with the relevant date decided upon for HD 21 and HD 22.

This was confirmed by the General Assembly during its meeting held in October 1977 in Vienna.

2. National deviations

The following national deviations could not be removed:

Chapter B: National deviations still to be removed.

§ 25c Finland

Also for appliances having a mass not exceeding 3 kg, polyvinyl chloride insulated non-detachable flexible cables and cords shall be not lighter than ordinary polyvinyl chloride sheathed flexible cord (code designation H05 VV-F or H05 VVH2-F).

§ Germany

Appliances having a mass exceeding 3 kg, may be provided with a light polyvinyl chloride sheathed flexible cord (code designation H03 VV-F or H03 VVH2-F).

July 1978

ENDORSEMENT NOTICE

Introduce the following amendment on page 8 of HD 251:

CLAUSE	AMENDMENT	REASON
§ 25c	<p>Replace the first sentence by the following:</p> <p>"Non-detachable flexible cables and cords shall be not lighter than:</p> <ul style="list-style-type: none"> - if rubber insulated, ordinary tough rubber sheathed flexible cord (code designation H05 RR-F) or ordinary polychloroprene sheathed flexible cord (code designation H05 RN-F); - if polyvinyl chloride insulated: <ul style="list-style-type: none"> • for appliances having a mass not exceeding 3 kg, light polyvinyl chloride sheathed flexible cord (code designation H03 VV-F or H03 VVH2-F), • for appliances having a mass exceeding 3 kg, ordinary polyvinyl chloride sheathed flexible cord (code designation H05 VV-F or H05 VVH2-F)." <p>Add the following explanation: "The code designations referred to are those specified in HD 21 and HD 22."</p>	<p>HD 21 (polyvinyl chloride insulated cables and flexible cords) and HD 22 (rubber insulated cables and flexible cords) have been published and implemented in a number of member countries on 1976-01-01.</p>
