EUROPEAN COMMITTEE FOR ELECTROTECHNICAL STANDARDIZATION
COMITE EUROPEEN DE NORMALISATION ELECTROTECHNIQUE
EUROPÄISCHES KOMITEE FÜR ELEKTROTECHNISCHE NORMUNG

GENERAL SECRETARIAT: 2, rue Bréderode, Boîte no. 5
1000 BRUSSELS, BELGIUM

July 1978

FOREWORD1. General

This document has been prepared by the Secretariat of Technical Committee 61 in accordance with the decisions taken by TC 61 during its meeting held in March 1977 in Arnhem.

During this meeting, the results of the Enquiry Procedure in the member countries with regard to documents CENELEC/TC 61 (SEC) 190 of December 1975 and CENELEC/TC 61 (SEC) 193 of February 1976 were discussed. It was decided to publish and to implement this modification in the member countries indicated on the front page, in correspondence with the implementation of Harmonization Documents HD 21 and HD 22. Conflicting non-harmonized national standards should be removed before the date corresponding with the relevant date decided upon for HD 21 and HD 22.

This was confirmed by the General Assembly during its meeting held in October 1977 in Vienna.

2. National deviations

The following national deviations could not be removed:

Chapter A: National departures due to the distribution system, wiring rules and other regulations outside the competence of the National Committees.

§ 25c Sweden (Wiring Rules, SIND-FS, Clause 51)

For appliances intended to be used on farms and in similar situations and for appliances having a rated input exceeding 1200 W, non-detachable flexible cables and cords shall be polychloroprene sheathed and shall be not lighter than ordinary polychloroprene sheathed flexible cable (code designation H07 RN-F).

Chapter B: National deviations still to be removed.

§ 25c Finland

For appliances intended to be used on farms and in similar situations and for appliances having a rated input exceeding 1200 W, non-detachable flexible cables and cords shall be polychloroprene sheathed and shall be not lighter than ordinary polychloroprene sheathed flexible cable (code designation H07 RN-F).

ENDORSEMENT NOTICE

Introduce the following amendment on page 3 of HD 262:

CLAUSE	AMENDMENT	REASON
§ 25c	<p>Replace this sub-clause by the following: "Modification: For appliances intended to be used on farms and in similar situations and for appliances having a rated input exceeding 1200 W, non-detachable flexible cables and cords shall be polychloroprene sheathed and shall be not lighter than ordinary polychloroprene sheathed flexible cord (code designation H05 RN-F). For other appliances, non-detachable flexible cables and cords, if polyvinyl chloride insulated, shall be not lighter than light polyvinyl chloride sheathed flexible cord (code designation H03 VVF or H03 VVH2-F)."</p> <p><small>SIST HD 262.2 S1:1992 https://standards.iteh.ai/catalog/standards/sist/081be930-8a7d-4c98-8b51-55e6eae5fd15/sist-hd-262-2-s1-1992</small></p>	<p>HD 21 (polyvinyl chloride insulated cables and flexible cords) and HD 22 (rubber insulated cables and flexible cords) have been published and implemented in a number of member countries on 1976-01-01.</p>
