About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

CONTENTS

FOREWORD	8
1 Scope	10
2 Normative references	11
3 Terms and definitions	12
3.1 Devices.....	12
3.2 General terms	13
3.3 Constructional elements.....	15
3.4 Conditions of operation	18
3.5 Characteristic quantities	18
3.6 Definitions related to insulation co-ordination.....	23
4 Classification	25
4.1 General.....	25
4.2 According to the number of poles:.....	25
4.3 According to the protection against external influences:.....	25
4.4 According to the method of mounting:	25
4.5 According to the methods of connection.....	25
4.5.1 According to the fixation system:	25
4.5.2 According to the type of terminals:.....	26
4.6 According to the instantaneous tripping current (see 3.5.17).....	26
4.7 According to the I^2t characteristic.....	26
5 Characteristics of circuit-breakers.....	26
5.1 List of characteristics	26
5.2 Rated quantities.....	27
5.2.1 Rated voltages	27
5.2.2 Rated current (I_{n})	27
5.2.3 Rated frequency	27
5.2.4 Rated short-circuit capacity (I_{cn})	27
5.3 Standard and preferred values	28
5.3.1 Preferred values of rated voltage	28
5.3.2 Preferred values of rated current	28
5.3.3 Standard values of rated frequency	28
5.3.4 Values of rated short-circuit capacity	29
5.3.5 Standard ranges of instantaneous tripping	29
5.3.6 Standard values of rated impulse withstand voltage (U_{imp})	29
6 Marking and other product information.....	30
7 Standard conditions for operation in service	32
7.1 General.....	32
7.2 Ambient air temperature range.....	32
7.3 Altitude	32
7.4 Atmospheric conditions	32
7.5 Conditions of installation	32
7.6 Pollution degree.....	32
8 Requirements for construction and operation.....	32
8.1 Mechanical design	32
8.1.1 General	32

8.1.2	Mechanism	33
8.1.3	Clearances and creepage distances and solid insulation (see Annex B)	34
8.1.4	Screws, current-carrying parts and connections	40
8.1.5	Terminals for external conductors	40
8.1.6	Non-interchangeability	43
8.1.7	Mechanical mounting of plug-in type circuit-breakers	43
8.2	Protection against electric shock	43
8.3	Dielectric properties and isolating capability	44
8.3.1	General	44
8.3.2	Dielectric strength at power frequency	44
8.3.3	Isolating capability	44
8.3.4	Dielectric strength at rated impulse withstand voltage (U_{imp})	44
8.4	Temperature-rise	44
8.4.1	Temperature-rise limits	44
8.4.2	Ambient air temperature	45
8.5	Uninterrupted duty	45
8.6	Automatic operation	45
8.6.1	Standard time-current zone	45
8.6.2	Conventional quantities	46
8.6.3	Tripping characteristic	46
8.7	Mechanical and electrical endurance	47
8.8	Performance at short-circuit currents	47
8.9	Resistance to mechanical shock and impact	47
8.10	Resistance to heat	48
8.11	Resistance to abnormal heat and to fire	48
8.12	Resistance to rusting	48
8.13	Power loss	48
8.14	Electromagnetic immunity	48
8.15	Electromagnetic emission	48
9	Tests	49
9.1	Type tests and test sequences	49
9.2	Test conditions	49
9.3	Test of indelibility of marking	50
9.4	Test of reliability of screws, current-carrying parts and connections	51
9.5	Tests of reliability of screw-type terminals for external copper conductors	52
9.6	Test of protection against electric shock	54
9.7	Test of dielectric properties	54
9.7.1	Resistance to humidity	60
9.7.2	Insulation resistance of the main circuit	61
9.7.3	Dielectric strength of the main circuit	61
9.7.4	Insulation resistance and dielectric strength of auxiliary circuits	62
9.7.5	Verification of impulse withstand voltages (across clearances and across solid insulation) and of leakage current across open contacts	63
9.8	Test of temperature-rise and measurement of power loss	66
9.8.1	Ambient air temperature	66
9.8.2	Test procedure	66
9.8.3	Measurement of the temperature of parts	66
9.8.4	Temperature-rise of a part	66
9.8.5	Measurement of power loss	66

9.9	28-day test.....	67
9.10	Test of tripping characteristic	67
9.10.1	General	67
9.10.2	Test of time-current characteristic.....	67
9.10.3	Test of instantaneous tripping, of correct opening of the contacts and of the trip-free function	68
9.10.4	Test of effect of single-pole loading on the tripping characteristic of multipole circuit-breakers.....	69
9.10.5	Test of effect of ambient temperature on the tripping characteristic	69
9.11	Verification of mechanical and electrical endurance	69
9.11.1	General test conditions	69
9.11.2	Test procedure	70
9.11.3	Condition of the circuit-breaker after test	70
9.12	Short-circuit tests.....	70
9.12.1	General	70
9.12.2	Values of test quantities	71
9.12.3	Tolerances on test quantities	72
9.12.4	Test circuit for short-circuit performance.....	72
9.12.5	Power factor of the test circuit	73
9.12.6	Measurement and verification of I^2t and of the peak current (I_p)	73
9.12.7	Calibration of the test circuit	73
9.12.8	Interpretation of records	74
9.12.9	Condition of the circuit-breaker for test	74
9.12.10	Behaviour of the circuit-breaker during short-circuit tests.....	75
9.12.11	Test procedure	76
9.12.12	Verification of the circuit breaker after short circuit tests.:.....	81
9.13	Mechanical stresses	81
9.13.1	Mechanical shock	81
9.13.2	Resistance to mechanical stresses and impact	82
9.14	Test of resistance to heat.....	85
9.15	Resistance to abnormal heat and to fire	86
9.16	Test of resistance to rusting	87
Annex A	(informative) Determination of short-circuit power factor	102
Annex B	(normative) Determination of clearances and creepage distances	103
Annex C	(normative) Test sequences and number of samples	108
Annex D	(informative) Co-ordination under short-circuit conditions between a circuit-breaker and another short-circuit protective device (SCPD) associated in the same circuit.....	114
Annex E	(normative) Special requirements for auxiliary circuits for safety extra-low voltage.....	121
Annex F	(informative) Examples of terminals	122
Annex G	(informative) Correspondence between ISO and AWG copper conductors	125
Annex H	(normative) Arrangement for short-circuit test	126
Annex I	(normative) Routine tests	129
Annex J	(normative) Particular requirements for circuit-breakers with screwless-type terminals for external copper conductors.....	130
Annex K	(normative) Particular requirements for circuit-breakers with flat quick-connect terminations	147

Annex L (normative) Specific requirements for circuit-breakers with screw-type terminals for external untreated aluminium conductors and with aluminium screw-type terminals for use with copper or with aluminium conductors	154

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**ELECTRICAL ACCESSORIES –
CIRCUIT-BREAKERS FOR OVERCURRENT PROTECTION
FOR HOUSEHOLD AND SIMILAR INSTALLATIONS –****Part 1: Circuit-breakers for a.c. operation****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC 60898-1 edition 2.1 contains the second edition (2015-03) [documents 23E/881/FDIS and 23E/894/RVD] and its corrigendum (2015-11), its amendment 1 (2019-12) [documents 23E/1156/FDIS and 23E/1157/RVD] and its corrigendum (2020-03). The contents of the corrigendum of the amendment only applies to the French version.

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendment 1. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.

International Standard IEC 60898-1 has been prepared by sub-committee 23E: Circuit-breakers and similar equipment for household use, of IEC technical committee 23: Electrical accessories.

This second edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Revision of 9.5 Terminals
- b) Revision of the test of glow wire
- c) Simplification of the figures for short circuit tests.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The following differing practices of a less permanent nature exist in the countries indicated below.

- Annex J, Clause J.1: Upper limit of current for use of screwless terminals is 16 A (CZ, DK, NL and CH; upper limit of current for use of screwless terminals is 30 A (Japan).
- J.3.3: Only universal screwless-type terminals are accepted (AT, BE, CN, DK, DE, ES, FR, IT, PT, SE and CH).

In this standard, the following print types are used:

- Requirements proper: in roman type.
- *Test specifications*: in italic type.
- Explanatory matter: in smaller roman type.

A list of all parts in the IEC 60898 series, published under the general title *Electrical accessories – Circuit-breakers for overcurrent protection for household and similar installations*, can be found on the IEC website.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

**ELECTRICAL ACCESSORIES –
CIRCUIT-BREAKERS FOR OVERCURRENT PROTECTION
FOR HOUSEHOLD AND SIMILAR INSTALLATIONS –**

Part 1: Circuit-breakers for a.c. operation

1 Scope

This part of IEC 60898 applies to a.c. air-break circuit-breakers for operation at 50 Hz, 60 Hz or 50/60 Hz, having a rated voltage not exceeding 440 V (between phases), a rated current not exceeding 125 A and a rated short-circuit capacity not exceeding 25 000 A.

As far as possible, it is in line with the requirements contained in IEC 60947-2.

NOTE 1 Additional requirements are necessary for circuit-breakers used in locations having more severe overvoltage conditions.

These circuit-breakers are intended for the protection against overcurrents of wiring installations of buildings and similar applications; they are designed for use by uninstructed people and ~~for not being maintained~~ do not require maintenance.

They are intended for use in an environment with pollution degree 2 and overvoltage category III. (<https://standards.iteh.ai>)

For an environment with a higher pollution degree, enclosures giving the appropriate degree of protection are used.

They are suitable for isolation.

[IEC 60898-1:2015](#)

<https://standards.iteh.ai/catalog/standards/iec/3e342d5e-f37e-4088-98c8-8066907010b7/iec-60898-1-2015>

Circuit-breakers of this standard, with exception of those rated 120 V or 120/240 V (see Table 1), are suitable for use in IT systems.

This standard also applies to circuit-breakers having more than one rated current, provided that the means for changing from one discrete rating to another is not accessible in normal service and that the rating cannot be changed without the use of a tool.

This standard does not apply to

- circuit-breakers intended to protect motors;
- circuit-breakers, the current setting of which is adjustable by means accessible to the user.

For circuit-breakers having a degree of protection higher than IP20 according to IEC 60529, for use in locations where arduous environmental conditions prevail (e.g. excessive humidity, heat or cold or deposition of dust) and in hazardous locations (e.g. where explosions are liable to occur), special constructions may be required.

This standard does not apply to circuit-breakers for a.c. and d.c. operation, which is covered by IEC 60898-2.
