This amendment A1 modifies the European Standard EN 50290-2-22:2001; it was approved by CENELEC on 2007-03-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this amendment the status of a national standard without any alteration.

<https://standards.iteh.ai/catalog/standards/sist/19a2f007-de91-4756-9ef4>

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This amendment exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: rue de Stassart 35, B - 1050 Brussels

Foreword

This amendment to the European Standard EN 50290-2-22:2001 was prepared by the Technical Committee CENELEC TC 46X, Communication cables.

The text of the draft was submitted to the Unique Acceptance Procedure and was approved by CENELEC as amendment A1 to EN 50290-2-22:2001 on 2007-03-01.

The following dates were fixed:

- latest date by which the amendment has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2008-03-01
- latest date by which the national standards conflicting with the amendment have to be withdrawn (dow) 2010-03-01

This amendment introduces respectively new PVC sheathing compound Grade for high temperature and oil resistance.

iTeh STANDARD PREVIEW (standards.iteh.ai)

[SIST EN 50290-2-22:2002/A1:2007](#)

<https://standards.iteh.ai/catalog/standards/sist/9a2f007-de91-4756-9efa-47c8d818a7c7/sist-en-50290-2-22-2002-a1-2007>

1 Scope

Add after the first paragraph:

For cables with a maximum rated temperature of 90 °C, compound of Grade TM53 shall be used and it shall comply with the requirements described in Table 1.

For oil resistant PVC cables, sheathing compound Grade TM54 or TM55 chosen according to the environmental conditions shall be used and it shall comply with the requirements described in Table 1.

3 Requirement

Add after the first paragraph:

If lead free PVC is required, the lead content shall be less than 400 ppm, measured according to EN 50414.

Replace Table 1 by the following to introduce Grades TM53, TM54 and TM55:

Table 1 - PVC sheathing compounds

Characteristics		Test method	Unit	Grades				
				TM51	TM52	TM53	TM54 ^a	TM55 ^b
1	Maximum rated temperature at cable for which the compound can be used		°C	70	70	90	70	70
