## Foreword

This European Telecommunication Standard (ETS) has been produced by the Signalling Protocols and Switching (SPS) Technical Committee of the European Telecommunications Standards Institute (ETSI).

This ETS is part 2 of a multi-part standard covering the Signalling System No.7 Transaction Capabilities (TC) version 2 as described below:

- Part 1: "Protocol specification [ITU-T Recommendations Q.771 to Q.775 (1993), modified]";
- Part 2: "Protocol Implementation Conformance Statement (PICS) proforma specification";**
- Part 3: "Abstract Test Suite (ATS) and partial Protocol Implementation eXtra Information for Testing (PIXIT) proforma specification".

<b>Transposition dates</b>	
Date of adoption	22 November 1996
Date of latest announcement of this ETS (doa):	28 February 1997
Date of latest publication of new National Standard or endorsement of this ETS (dop/e):	31 August 1997
Date of withdrawal of any conflicting National Standard (dow):	31 August 1997

## iTeh STANDARD PREVIEW

### Introduction

### (standards.iteh.ai)

To evaluate conformance of a particular implementation it is necessary to have a statement of which capabilities and options have been implemented for a given OSI protocol. Such a statement is called a Protocol Implementation Conformance Statement (PICS).  
<https://standards.iteh.ai/catalog/standards/sist/ets-300-287-2-1998-419c5d9b40cc8/sist-ets-300-287-2-1998>

<https://standards.iteh.ai/catalog/standards/sist/8fc348a2-4f99-4567-adc3-419c3d9b46e8/sist-ets-300-287-2-1998>

## 1 Scope

This second part of ETS 300 287 provides the Protocol Implementation Conformance Statement (PICS) proforma for the Transaction Capabilities (TC) signalling protocol to be used in and between networks, for non-circuit related services which use Signalling System No.7 as specified in ETS 300 287-1 [1] in compliance with the relevant requirements and in accordance with the relevant guidance given in ISO/IEC 9646-7 [3].

The supplier of a protocol implementation that is claimed to conform to ETS 300 287-1 [1] is required to complete a copy of the PICS proforma provided in annex A of this ETS and is required to provide the information necessary to identify both the supplier and the implementation.

## 2 Normative references

This ETS incorporates by dated and undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

- [1] ETS 300 287-1 (1996): "Integrated Services Digital Network (ISDN); Signalling System No.7; Transaction Capabilities (TC) version 2; Part 1: Protocol specification [ITU-T Recommendations Q.771 to Q.775 (1993), modified]".
- [2] ISO/IEC 9646-1: "Information technology - Open systems interconnection - Conformance testing methodology and framework - Part 1: General concepts".

## 3 Definitions

[SIST ETS 300 287-2:1998](#)

For the purposes of this ETS, the definitions in ETS 300 287-1 [1], ISO/IEC 9646-1 [2] and ISO/IEC 9646-7 [3] apply. In particular, the following terms defined in ISO/IEC 9646-1 [2] apply:

**Implementation Conformance Statement (ICS):** A statement made by the supplier of an implementation or system claimed to conform to a given specification, stating which capabilities have been implemented. The ICS can take several forms: protocol ICS (PICS), profile ICS, profile specific ICS, and information object ICS.

**Protocol Implementation Conformance Statement (PICS):** An ICS for an implementation or system claimed to conform to a given protocol specification.

**PICS proforma:** A document, in the form of a questionnaire, which when completed for an implementation or system becomes a PICS.

## 4 Abbreviations

For the purposes of this ETS, the following abbreviations apply:

ASN.1	Abstract Syntax Notation one
BER	Basic Encoding Rules
c	Conditional
DTID	DestinationTransaction ID
ICS	Implementation Conformance Statement
ID	Identifier
ISDN	Integrated Services Digital Network
IUT	Implementation Under Test
m	Mandatory

n/a	Not Applicable
o	Optional
o.<n>	Optional, but, if chosen, support is required for either at least one or only one of the options in the group labelled by the same numeral <n>
OSI	Open Systems Interconnection
OTID	Originating Transaction ID
PDU	Protocol Data Unit
PICS	Protocol Implementation Conformance Statement
SCS	System Conformance Statement
SUT	System Under Test
TC	Transaction Capabilities
x	Excluded

## 5 Conformance

A PICS proforma that conforms to this PICS proforma specification shall be technically equivalent to annex A, and shall preserve the numbering and ordering of the items in annex A.

A PICS that conforms to this PICS proforma specification shall:

- a) describe an implementation which conforms to ETS 300 287-1 [1];
- b) be a conforming PICS proforma, which has been completed in accordance with the instructions for completion given in clause A.1;
- c) include the information necessary to uniquely identify both the supplier and the implementation.

## iTeh STANDARD PREVIEW (standards.iteh.ai)

[SIST ETS 300 287-2:1998](#)

<https://standards.iteh.ai/catalog/standards/sist/8fc348a2-4f99-4567-adc3-419c3d9b46e8/sist-ets-300-287-2-1998>

**Annex A (normative): PICS proforma for ETS 300 287-1**

Notwithstanding the provisions of the copyright clause related to the text of this ETS, ETSI grants that users of this ETS may freely reproduce the PICS proforma in this annex so that it can be used for its intended purposes and may further publish the completed PICS.

**A.1 Guidance for completing the PICS proforma****A.1.1 Purposes and structure**

The purpose of this PICS proforma is to provide a mechanism whereby a supplier of an implementation of the requirements defined in ETS 300 287-1 [1] may provide information about the implementation in a standardized manner.

The PICS proforma is subdivided into clauses for the following categories of information:

- guidance for completing the PICS proforma;
- identification of the implementation;
- identification of the protocol;
- global statement of conformance;
- explicit statements about the implemented capabilities.

**A.1.2 Abbreviations and conventions**

The PICS proforma contained in this annex is comprised of information in tabular form in accordance with the guidelines presented in ISO/IEC 9646-7 [3].

**Item column** *iTeh STANDARD PREVIEW*  
*(standards.iteh.ai)*

The item column contains a number which identifies the item in the table.

**Item description column**

*SIST ETS 300 287-2:1998*

*<https://standards.iteh.ai/catalog/standards/sist/8fc348a2-4f99-4567-adc3->*

The item description column describes in free text each respective item (e.g. parameters, timers, etc.). It implicitly means "is <item description> supported by the implementation?".

**Status column**

The following notations, defined in ISO/IEC 9646-7 [3], are used for the status column:

- |     |   |
|-----|---|
| m   | mandatory - the capability is required to be supported.   |
| o   | optional - the capability may be supported or not.  |
| n/a | not applicable - in the given context, it is impossible to use the capability.  |
| x   | prohibited (excluded) - there is a requirement not to use this capability in the given context.   |
| o.i | qualified optional - for mutually exclusive or selectable options from a set. "i" is an integer which identifies an unique group of related optional items and the logic of their selection which is defined immediately following the table.                   |
| ci  | conditional - the requirement on the capability ("m", "o", "x" or "n/a") depends on the support of other optional or conditional items. "i" is an integer identifying an unique conditional status expression which is defined immediately following the table. |
