About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and definitions clause of IEC publications issued between 2002 and 2015. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et définitions des publications IEC parues entre 2002 et 2015. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

CONTENTS

FOREWORD.....	9
INTRODUCTION.....	11
1 Scope.....	12
2 Normative references	12
3 Terms, definitions and abbreviations	13
3.1 Terms and definitions.....	13
3.2 Abbreviated terms.....	19
4 Types of disturbance to be measured	20
4.1 General.....	20
4.2 Types of disturbance.....	20
4.3 Detector functions.....	21
5 Connection of measuring equipment.....	21
6 General measurement requirements and conditions	21
6.1 General.....	21
6.2 Disturbance not produced by the equipment under test.....	21
6.2.1 General	21
6.2.2 Compliance (conformity assessment) testing	22
6.3 Measurement of continuous disturbance	22
6.3.1 Narrowband continuous disturbance	22
6.3.2 Broadband continuous disturbance	22
6.3.3 Use of spectrum analyzers and scanning receivers.....	22
6.4 EUT arrangement and measurement conditions	22
6.4.1 General arrangement of the EUT	22
6.4.2 Operation of the EUT.....	25
6.4.3 EUT time of operation	25
6.4.4 EUT running-in time	25
6.4.5 EUT supply	25
6.4.6 EUT mode of operation	25
6.4.7 Operation of multifunction equipment.....	25
6.4.8 Determination of arrangement(s) causing maximum emissions	26
6.4.9 Recording of measurements	26
6.5 Interpretation of measuring results.....	26
6.5.1 Continuous disturbance	26
6.5.2 Discontinuous disturbance	26
6.5.3 Measurement of the duration of disturbance	27
6.6 Measurement times and scan rates for continuous disturbance.....	27
6.6.1 General	27
6.6.2 Minimum measurement times.....	27
6.6.3 Scan rates for scanning receivers and spectrum analyzers	28
6.6.4 Scan times for stepping receivers	29
6.6.5 Strategies for obtaining a spectrum overview using the peak detector.....	29
6.6.6 Timing considerations using FFT-based instruments.....	33
7 Measurement of radiated disturbances	36
7.1 Introductory remarks General.....	36
7.1.1 General remarks and overview of test methods	37

7.1.2	Overview of maximum EUT volumes depending on measurement method, frequency range, and measurement distance	38
7.2	Loop-antenna system measurements (9 kHz to 30 MHz).....	40
7.2.1	General	40
7.2.2	General measurement method	41
7.2.3	Test environment	42
7.2.4	Configuration of the equipment under test.....	42
7.2.5	Measurement uncertainty for LLAS	43
7.3	Open-area test site or semi-anechoic chamber measurements (30 MHz to 1 GHz).....	43
7.3.1	Measurand.....	43
7.3.2	Test site requirements	46
7.3.3	General measurement method	46
7.3.4	Measurement distance.....	47
7.3.5	Antenna height variation	48
7.3.6	Product specification details	48
7.3.7	Measurement instrumentation	50
7.3.8	Field-strength measurements on other outdoor sites.....	50
7.3.9	Measurement uncertainty for OATS and SAC.....	50
7.4	Fully-anechoic room measurements (30 MHz to 1 GHz).....	50
7.4.1	Test set-up and site geometry.....	50
7.4.2	EUT position	53
7.4.3	Cable layout and termination	54
7.4.4	Measurement uncertainty for FAR.....	55
7.5	Radiated emission measurement method (30 MHz to 1 GHz) and radiated immunity test method (80 MHz to 1 GHz) with common test set-up in semi-anechoic chamber.....	55
7.5.1	Applicability	55
7.5.2	EUT perimeter definition and antenna-to-EUT separation distance.....	55
7.5.3	Uniform test volume	56
7.5.4	Specifications for EUT set-up in common emissions/immunity test set-up.....	57
7.5.5	Measurement uncertainty for common emission/immunity set-up and method	63
7.6	Fully-anechoic room and absorber-lined OATS/SAC measurements (1 GHz to 18 GHz)	63
7.6.1	Quantity to measure Measurand	63
7.6.2	Measurement distance.....	64
7.6.3	Set-up and operating conditions of the equipment under test (EUT).....	64
7.6.4	Measurement site	65
7.6.5	Measurement instrumentation	65
7.6.6	Measurement procedure	66
7.6.7	Measurement uncertainty for FAR.....	74
7.7	<i>In situ</i> measurements (9 kHz to 18 GHz).....	74
7.7.1	Applicability of and preparation for <i>in situ</i> measurements.....	74
7.7.2	Field-strength measurements <i>in situ</i> in the frequency range 9 kHz to 30 MHz.....	75
7.7.3	Field-strength measurements <i>in situ</i> in the frequency range above 30 MHz.....	76
7.7.4	<i>In situ</i> measurement of the disturbance effective radiated power using the substitution method.....	77

7.7.5	Documentation of the measurement results	81
7.7.6	Measurement uncertainty for <i>in situ</i> method	81
7.8	Substitution measurements (30 MHz to 18 GHz)	81
7.8.1	General	81
7.8.2	Test site	81
7.8.3	Test antennas	82
7.8.4	EUT configuration	82
7.8.5	Test procedure	83
7.8.6	Measurement uncertainty for substitution method	83
7.9	Reverberation chamber measurements (80 MHz to 18 GHz)	83
7.10	TEM waveguide measurements (30 MHz to 18 GHz)	83
8	Automated measurement of emissions	83
8.1	Introduction – Precautions for automated measurements	83
8.2	Generic measurement procedure	84
8.3	Pre-scan measurements	84
8.3.1	General	84
8.3.2	Determination of the required measurement time	85
8.3.3	Pre-scan requirements for different types of measurements	85
8.4	Data reduction	86
8.5	Emission maximization and final measurement	87
8.6	Post-processing and reporting	88
8.7	Emission measurement strategies with FFT-based measuring instruments	88
Annex A (informative)	Measurement of disturbances in the presence of ambient emissions	89
A.1	General	89
A.2	Terms and definitions	89
A.3	Problem description	89
A.4	Proposed solution	89
A.4.1	Overview	89
A.4.2	Pre-testing the EUT in a shielded room	92
A.4.3	Method of measurement of EUT disturbances in the presence of narrowband ambient emissions	93
A.4.4	Method of measurement of EUT disturbance in the presence of broadband ambient emissions	96
A.5	Determination of the EUT disturbance in case of superposition	98
Annex B (informative)	Use of spectrum analyzers and scanning receivers	103
B.1	General	103
B.2	Overload	103
B.3	Linearity test	103
B.4	Selectivity	103
B.5	Normal response to pulses	103
B.6	Peak detection	103
B.7	Frequency scan rate	104
B.8	Signal interception	104
B.9	Average detection	104
B.10	Sensitivity	104
B.11	Amplitude accuracy	105
Annex C (informative)	Scan rates and measurement times for use with the average detector	106

C.1	Purpose	106
C.2	Suppression of disturbances	106
C.2.1	Suppression of impulsive disturbance	106
C.2.2	Suppression of impulsive disturbance by digital averaging	107
C.2.3	Suppression of amplitude modulation.....	107
C.3	Measurement of slowly intermittent, unsteady or drifting narrowband disturbances	107
C.4	Recommended procedure for automated or semi-automated measurements	109
Annex D (informative)	Explanation of the APD measurement method applying to the compliance test.....	110
Annex E (normative)	Determination of suitability of spectrum analyzers for compliance tests	112
Annex F (informative)	Background for EUT-volume specifications depending on measurement distance and frequency range	113
F.1	General.....	113
F.2	Criterion 1 – Limitation of field-strength underestimations due to a large ratio of EUT volume diameter-to-measurement distance for short-distance measurements	113
F.2.1	General	113
F.2.2	9 kHz to 30 MHz	113
F.2.3	30 MHz to 1 000 MHz	114
F.2.4	1 GHz to 18 GHz	114
F.3	Criterion 2 – Limitation due to near-field effects	115
F.3.1	General	115
F.3.2	9 kHz to 30 MHz	115
F.3.3	30 MHz to 1 000 MHz	115
F.3.4	1 GHz to 18 GHz	117
F.4	Criterion 3 – Limitation due to receive antenna beamwidth.....	118
F.4.1	General	118
F.4.2	9 kHz to 30 MHz	118
F.4.3	30 MHz to 1 000 MHz	118
F.4.4	1 GHz to 18 GHz	120
F.5	Criterion 4 – Limitation due to the results of test site validation	123
F.5.1	General	123
F.5.2	9 kHz to 30 MHz	123
F.5.3	30 MHz to 1 000 MHz	123
F.5.4	1 GHz to 6 GHz or to 18 GHz.....	123
Bibliography.....		124

INTERNATIONAL ELECTROTECHNICAL COMMISSION
INTERNATIONAL SPECIAL COMMITTEE ON RADIO INTERFERENCE

**SPECIFICATION FOR RADIO DISTURBANCE AND IMMUNITY
MEASURING APPARATUS AND METHODS –**

**Part 2-3: Methods of measurement of disturbances and immunity –
Radiated disturbance measurements**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

CISPR 16-2-3 edition 4.1 contains the fourth edition (2016-09) [documents CISPR/A/1176A/FDIS and CISPR/A/1182/RVD] and its amendment 1 (2019-06) [documents CISPR/A/1278/FDIS and CISPR/A/1283/RVD].

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendment 1. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.

International Standard CISPR 16-2-3 has been prepared by CISPR subcommittee A: Radio-interference measurements and statistical methods.

This fourth edition constitutes a technical revision.

This edition includes the following significant technical change with respect to the previous edition: addition of content on correction of the electric field strength to account for phase centre of log-periodic dipole array antennas.

It has the status of a basic EMC publication in accordance with IEC Guide 107, *Electromagnetic compatibility – Guide to the drafting of electromagnetic compatibility publications*.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the CISPR 16 series, published under the general title *Specification for radio disturbance and immunity measuring apparatus and methods*, can be found on the IEC website.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.
